we are all about you

WESLEYAN AUTHORISED UNIT TRUST

HALF YEAR FUND MANAGER REPORT
31 December 2019

DIRECTORS

AHMED FAROOQ BSc, ACMA, DIP IoD
CHAIRMAN
WESLEYAN UNIT TRUST MANAGERS

On 15 March 2018, Ahmed was appointed Chairman of WUTM and on 8 August 2018, became a Director of Wesleyan Assurance Society.

Ahmed became Chief Financial Officer in November 2015, after holding a number of senior roles at Wesleyan. He joined the Society in 2010 from the Phoenix Group and became Head of Finance in 2011, and Managing Director of Wesleyan's General Insurance division in 2014.

JAMES NEEDHAM MBA, FIA
CHIEF EXECUTIVE OFFICER
WESLEYAN UNIT TRUST MANAGERS

On 26 February 2020, James was appointed Chief Executive Officer to the board of Wesleyan Unit Trust Managers.

James has 20 years' actuarial experience; he joined Wesleyan in 2010 and became Chief Actuary in 2018. He is responsible for Wesleyan's actuarial and financial reporting activity and oversees the Society's product development and performance, identifying ways to improve customer outcomes. He is a financial reporting expert and has presented at a number of actuarial conferences.

MARTIN LAWRENCE BSc, ASIP
DIRECTOR
WESLEYAN UNIT TRUST MANAGERS

On 21 April 2016, Martin was appointed to the board of Wesleyan Unit Trust Managers as a Director.

Martin has more than 20 years' experience in investment management, having worked in the industry since graduating from the University of Exeter with a degree in Mathematics. He manages a number of funds including Wesleyan's With Profits Fund, which is currently valued at over £3.5bn.

Martin invests directly in UK and overseas equities, government and corporate bonds, cash, and UK property. He takes a long-term investment approach and keeps our customers and members front-of-mind at all times, having worked at Wesleyan since 1995.

FUND MANAGERS

JAMES HUBBARD, BA, CFA
WESLEYAN INTERNATIONAL GROWTH FUND
WESLEYAN MODERATE-HIGH RISK/REWARD INCOME FUND

James Hubbard joined Wesleyan as an Investment Analyst in January 2011. After graduating with an MA in Economics and Business from the University of Manchester he initially worked for a Corporate Bank in London. James is a CFA (Chartered Financial Analyst) charterholder and has been a Fund Manager since April 2016.

MARTIN LAWRENCE, BSc, ASIP
WESLEYAN MODERATE RISK/REWARD GROWTH FUND*

Martin Lawrence has been a Fund Manager since 2001, and has overall responsibility for managing several equity and multi-asset funds. He joined the Society as an Investment Analyst in 1995 and is a fully qualified Associate of the CFA Society of the UK. Martin is Director of Investments at Wesleyan and is backed by a team of Fund Managers and Analysts who are market sector specialists.

*Marc O'Sullivan became the Fund Manager for the Wesleyan Moderate Risk/Reward Growth Fund from 1 January 2020. Martin Lawrence continues to serve as a Director of Wesleyan Unit Trust Managers and as the Director of Investments for Wesleyan Assurance Society.

PAUL BURTON, BSc, FIA
WESLEYAN LOW RISK/REWARD GROWTH FUND

Paul Burton has been the Fund Manager of the Low Risk Life and Pension funds since launch in January 2012. He has also managed the assets of the Wesleyan Staff Pension Scheme since 1998, and the Society's Non Profit fund since 2012. He joined the Society in 1990, qualifying as an actuary in 1998, working as an Investment Analyst in the preceding five years.

MARC O'SULLIVAN, BSc, CFA
WESLEYAN RISK AVERSE FUND*
WESLEYAN UK GROWTH FUND

Marc O'Sullivan has been a Fund Manager since 2012, managing investments across a number of asset classes. Marc joined the Society as an Investment Analyst in 2003, having graduated from the University of Birmingham with a degree in Economics. Marc has been a CFA (Chartered Financial Analyst) charterholder since 2008.

*Paul Burton became the Fund Manager for the Wesleyan Risk Averse Fund from 1 January 2020.

CHAIRMAN'S STATEMENT

Wesleyan Unit Trust Managers (WUTM) offers six unit trust funds, each with a corresponding risk level, to cater for the financial objectives among those who invest with us. All of WUTM's funds are managed by the same dedicated in-house team who are responsible for Wesleyan's full fund range. Furthermore, as Wesleyan is a mutual, you can rest assured that our Fund Managers are fully committed to maximising the returns for our members and customers over the long term, with a consistent, award-winning approach.

In this report, you can find out more about all our unit trust funds, which are: International Growth Fund (page 9), Low Risk/Reward Growth Fund (page 21), Moderate-High Risk/Reward Income Fund (page 39), Moderate Risk/Reward Growth Fund (page 57), Risk Averse Fund (page 77) and the UK Growth Fund (page 86). For each fund there is a full list of portfolio holdings, a summary of market activities that have shaped their performance, and a view from the associated Fund Manager.

You can invest in any of the aforementioned funds via three products: a Unit Trust Investment Account, a Unit Trust Individual Savings Account (ISA), and a Unit Trust Junior ISA. Furthermore, after listening to feedback from members and customers who wanted a suitable home to grow the cash held by their businesses, in 2019 we made changes that enabled WUTM to accept commercial investments for the first time. Throughout last year, our unit trust funds proved popular with businesses and charities alike, as well as individuals, and we are delighted to have increased the investment options available for the busy professionals we serve.

Our refreshed unit trust funds launched in the same month that the UK voted to leave the EU, in June 2016. The years that followed were marked by noticeable pockets of turbulence for economies across the world and financial markets, with Brexit, the US-China trade deal

and slowing global growth being factors that did little to boost confidence and played a part in worldwide stock market dips in December 2018. However, the agreement of a US-China 'phase one' trade deal was a significant factor that raised market confidence during 2019 and, in December, as the decade came to a close, the UK's Parliamentary deadlock on Brexit was broken when Prime Minister Boris Johnson secured a clear majority. This means that 2020 will see the UK start a new chapter outside the EU, while we continue to work closely with our neighbours in the bloc to secure a UK-EU trade deal before 2021.

Geopolitical factors aside, we saw strong performance across our unit trust funds in 2019, with the majority of them ranked in the top 50% versus their competitors for investment performance, for the three years to the end of December 2019. This is extremely encouraging, given that we focus on investing for the long term, to achieve the strongest possible results. That is why we always make it clear to our members and customers that they should only invest with us if they can do so for a minimum of five years. However, to see such strong performance at this stage, despite the funds only launching in June 2016, is a credit to our fund management team.

WUTM's funds maintain diverse portfolios within and across asset classes when possible, covering equities (also known as 'stocks' or 'shares'), government bonds, corporate bonds and cash, depending on the fund and its objective. This diversification, combined with our 'buy and hold' fund management approach, puts us in a strong position for any potential market volatility, both in the UK and overseas.

While stock market volatility may have negative short-term impacts on returns, the reality is that market dips can present our Fund

Managers with numerous trading opportunities, which is a main reason why we are advocates for taking a 'long-term investment view'.

As the digital chimes of Big Ben's temporary replacement brought in a new year, we were able to look back on financial returns for 2019 with a favourable eye, with some of the strongest equity returns we have seen for many years. There is other positive news for our Investments team, which includes our Fund and Property Managers, Analysts, and Communications team: in acknowledgement of our fund performance and the team's combined determination to achieve better outcomes for our customers and the wider industry during 2019, they have been named "Investment Team of the Year" in the insurer category at the Insurance Asset Risk Awards 2020, which is a great honour and something that everyone at Wesleyan is proud of.

Finally, in September 2019, Robert Vaudry stepped down from his position as Chief Executive Officer. I would like to take this opportunity to thank Robert for his services whilst offering a warm welcome to James Needham, who has been appointed as our new Chief Executive Officer. James will continue as Wesleyan's Chief Actuary – a role he has excelled in for several years – and I have every confidence that his considerable talents will be of huge benefit to both roles and to WUTM. Similarly, in December 2019, we also welcomed Ian McCaig and Andrew Neden as Non-Executive Directors, both of whom are also members of the Group Society Board, and I'm pleased that their experience will help to guide the business forward in the future.

AUTHORISED FUND MANAGER REPORT

INTRODUCTION

This is the half year report of the Wesleyan Authorised Unit Trust ('Trust') for the year ended 31 December 2019.

The Trust is managed by Wesleyan Unit Trust Managers Limited ('Manager').

The Trust is an authorised unit trust in an umbrella form and was authorised by the Financial Conduct Authority (FCA) effective 4 September 2015. The Trust is classified under the Collective Investment Scheme Sourcebook ('COLL') as a collective investment scheme authorised under the UCITS Directive.

The Trust was established pursuant to a Trust Deed dated 4 September 2015 (as amended from time to time) made between the Manager and HSBC Bank Plc ('Trustee'). The Trust has an unlimited duration.

Details of the managers and advisors of the Trust are disclosed on page 99.

STRUCTURE OF THE TRUST

The Trust is structured as an umbrella unit trust, in that different funds may be established from time to time by the Manager with the approval of the FCA, the agreement of the Trustee and in accordance with the Trust Deed.

The assets of each fund will be treated as separate from those of every other fund and will be invested in accordance with the investment objective and investment policy applicable to that fund.

Each fund has a specific portfolio to which that fund's assets and liabilities are attributable. So far as the Unitholders are concerned, each fund is treated as a separate entity. Unitholders are not liable for the debts of the Trust or for any other fund.

Subject to the above, each fund will be charged with the liabilities, expenses, costs and charges of the Trust attributable to that fund, and within each fund charges will be allocated between classes in accordance with the terms of issue of units of those classes. Any assets, liabilities, expenses, costs or charges not attributable to a particular fund may be allocated by the Manager in a manner which it believes is fair to the unit holders generally. This will normally be pro rata to the Net Asset Value of the relevant funds.

The base currency of each fund is pounds Sterling.

As at 31 December 2019, the Trust comprised of the following funds:

Wesleyan International Growth Fund

Wesleyan Low Risk/Reward Growth Fund

Wesleyan Moderate-High Risk/Reward Income Fund

Wesleyan Moderate Risk/Reward Growth Fund

Wesleyan Risk Averse Fund

Wesleyan UK Growth Fund

All of the above funds are managed by the Manager. Details of other management and advisors of the funds are disclosed on page 99.

UNITS

The rights represented by units are those of a beneficial interest under the Trust. Several classes of units may be issued in respect of each fund.

Further classes of units may be established from time to time by the Manager with the approval of the FCA, the agreement of the Trustee and in accordance with the Trust Deed. On the introduction of any new class, a revised prospectus will be prepared, setting out the details of each class.

Units in the Trust are not currently listed on any investment exchange.

Holders of income units are entitled to be paid the distributable income attributed to such units on any relevant interim and/or annual income allocation dates. The Manager, at its discretion, may also permit unit holders to elect to reinvest any such distributable income instead of receiving payment. In this event, the income will be used to purchase additional units in the same fund.

Holders of Accumulation units are not entitled to be paid the income attributed to such units, but that income is automatically transferred to (and retained as part of) the capital assets of the relevant fund on the relevant interim and/or annual accounting dates. This is reflected in the price of an accumulation unit.

UNITS IN ISSUE

As at 31 December 2019, Accumulation ("Acc") and Income ("Inc") units are available in the following funds and in the following denominations and classes:

Fund Class	Unit Type	Base Currency	Launch Date	ISIN
Wesleyan International Growth Fund				
Class A	Acc	GBP	03/06/16	GB00BYNYHT49

Class B	Acc	GBP	03/06/16	GB00BYNYHR25
Class X	Acc	GBP	03/06/16	GB00BYNYHS32

None of the above funds hold units in other funds of the Trust.

AUTHORISED FUND MANAGER REPORT continued

UNIT HOLDERS – TAXATION

The information below is a general guide based on current United Kingdom law and HM Revenue & Customs practice which are subject to change. It summarises the tax position of the funds and of direct personal investors who are United Kingdom residents and hold units as investments. This does not detail the tax treatment for corporate or trustee unit holders.

INCOME

The funds may pay dividend distributions (which will be automatically retained in the relevant fund in the case of accumulation units). There is currently a tax free dividend allowance above this allowance from investments not held within an Individual Savings Account are taxed at a rate that depends on the investor's income tax band.

INTEREST

Where a fund pays an interest distribution (which will be automatically retained in the fund in the case of accumulation units) this is gross of the basic rate of tax from 6 April 2016 for some people (depending on their tax bands).

There is currently a tax free Personal Savings Allowance (except for additional rate tax payers). Interest distributions received above this allowance from investments not held within an Individual Savings Account or Junior Individual Savings Account are taxed at a rate that depends on the investor's income tax band.

INCOME EQUALISATION

The first income allocation received by an investor after buying units may include an amount of income equalisation, which will be shown on the issued tax voucher. This is effectively a repayment of the income equalisation paid by the investor as part of the purchase price. It is a return of capital, and is not taxable, rather it should be deducted from the acquisition cost of the units for capital gains tax purposes.

CAPITAL GAINS

Unit holders may be liable to capital gains tax on gains arising from the redemption, transfer or other disposal of units. The rate of tax, and available reliefs, will be as applicable from time to time. An exchange of units between classes within a fund is generally not treated as a disposal for this purpose.

Units in each of the funds may be held within Individual Savings Accounts and would be exempt from personal liability to income or capital gains tax. Unit holders who have invested

in the funds through an Individual Savings Account or Junior Individual Savings Account should refer to the Key Features Document for further details of how it operates.

ASSESSMENT OF THE RISK RELATING TO THE UK EXITING THE EUROPEAN UNION (BREXIT)

The Authorised Corporate Director (ACD) has been managing a Brexit plan for the past two years. Early in the process we decided to concentrate on ensuring that we should be prepared for the worst case scenario. Often referred to as a hard Brexit, this is where the UK leaves the EU with no deal and no transition period. This approach ensures that we are well placed for any political eventuality.

We identified all Supplier relationships where services are provided from the European Economic Area (EEA). We have received confirmation from all suppliers that services will be unaffected in a no deal, no transition scenario.

The Funds are not actively sold to any investors in the EEA outside of the UK.

REPORTING DATES

The annual and interim accounting date of the Trust and the funds within are as below:

Annual accounting date: 30 June

Interim accounting date: 31 December

The following pages sets out for each of the funds within the Trust:

- ▶ Fund manager report
- ▶ Number of units in circulation and the net asset values per unit
- ▶ Annual financial statements

This annual report of the Trust and the funds within are available on our website (www.wesleyan.co.uk/Report). If you have any questions about the report, or if you would like to talk to us about your investments, you can call us on **0330 123 3813**. Lines are open Monday to Friday from 9.00am to 5.00pm.

WESLEYAN INTERNATIONAL GROWTH FUND

FUND REVIEW

This is the half-year report for the Wesleyan International Growth Fund covering the period from 1 July 2019 to 31 December 2019. The underlying unit price performance generated a return of 2.75% compared to the IA Global sector that returned 4.36%*, although this comes after a period of strong performance from 31 December 2018 to 30 June 2019. The fund returned 23.4% compared to 21.9% in the sector in the calendar year to 31 December 2019.

Global markets were up over 5% in the period under review, despite a significant headwind from sterling appreciation. Global economic data continued to show some softening signs in autumn 2019 before appearing to trough in the final months of the year. The US Federal Reserve began injecting liquidity into the market which, combined with similar actions from other major global central banks, helped improve sentiment and economic activity. The period also saw the US and China continue negotiations to resolve a dispute that started in July 2018, after President Trump accused China of unfair trade practices. Market participants spent the period awaiting an easing of the tariffs imposed by each side, which had disrupted global trade flow, only to be disappointed.

Equity markets were led globally by the technology sector, which gained 14% over the period, with healthcare the next best performer at 8%, while all other sectors returned between -2% and 4%. Technology was led by some exceptional performances from the likes of Apple, Microsoft, semiconductor companies Intel and Taiwan Semiconductor Manufacturing Company, Alphabet (formerly Google) and Chinese e-commerce giant Alibaba. The US and Japan led the regional equity markets over the period

with Asia, Europe and emerging markets trailing, although all in positive territory.

Fund performance benefited from another period of good returns from the largest holding: Microsoft. Other notable contributors included Apple, Bank of America, cosmetics giant Estée Lauder, insulin maker Novo Nordisk and luxury goods group LVMH.

The largest detractor from fund performance was payments company PayPal, after a strong performance in the prior six months. Restaurant operator Yum! Brands – owner of Taco Bell and KFC – also detracted from performance after disappointing third quarter results. Other notable detractors were information technology company Oracle, aerospace company Boeing (the 737 MAX aircraft was grounded), technology provider SAP and consumer goods company Unilever.

The only new addition to the portfolio was gaming company Ubisoft Entertainment. We initiated a position after a material decline in the share price after the company announced several future game releases were to be delayed. The fund approximately halved two of its largest holdings, Apple and Samsung, after particularly strong performances from both names.

The full list of portfolio holdings can be found later in this report.

FUND OUTLOOK

The world economy continues to benefit from the stimulus provided by global central banks, coupled with the potential end to some of the trade conflicts that disrupted economic growth in 2019. On 15 January 2020, China and the US signed a 'phase-one trade deal' that included a cut to tariffs on Chinese goods and an ambitious purchase of additional US goods, suggesting 2020 may offer a reduced level of trade-related conflict.

January, however, also saw the world confronted with news of a military clash between the US and Iran, and reports of an outbreak of a new coronavirus in China. The latter, in particular, has the potential to de-rail a fragile global recovery and remains something investors need to monitor closely.

The UK exited the European Union on 31 January and is currently in the transition period scheduled to end on 31 December. European negotiators have argued 11 months is insufficient time to reach an agreement, yet Prime Minister Johnson has so far refused to extend the period. The UK has until the end of June to decide if it wishes to seek an extension, yet evidence of progress towards a successful trade negotiation may bolster UK confidence and domestic investment.

The US election is due to take place in November. From our contact with US management teams, it appears commonplace that the expectation is for President Trump to win a second term, although we remain watchful and cognisant that success from other, more disruptive candidates could impact the investment landscape.

Through all the news flow, we maintain our long-term approach. Volatility often provides chances to redeploy capital, and some of the cash balance held at the end of December has since been used for several new investment opportunities.

WESLEYAN INTERNATIONAL GROWTH FUND continued

GENERAL INFORMATION

Investment objective and policy

The Fund aims to provide capital growth over the medium to long term.

The Fund will invest predominantly in a diversified portfolio of equities.

The equities in which the Fund invests may be issued by companies anywhere in the world. The Fund may invest in various sectors.

The Fund may also invest in fixed interest and other transferable securities, cash, near cash, deposits, money-market instruments and other collective investment schemes.

The Fund may use derivatives for the purpose of efficient portfolio management.

Risk and reward profile

The risk category is based on the rate the fund's value has moved up and down in the past and has remained unchanged from the prior year.

The fund's value can be influenced by changes in stock market prices, currencies and interest rates which can be affected by factors such as political and economic events.

This risk category is calculated in line with European Securities Markets Authority (ESMA) rules using historical data.

This is not a guarantee and may not be a reliable indication of the fund's future risk and reward category.

A fund in the lowest category does not mean a 'risk free' investment.

A fuller explanation of the risk and reward profile of the fund is contained in the fund's Key Investor Information Document (KIID).

Group 2	-	0.0905	0.0905	0.2553

Corporate unitholders' information

For corporate unitholders, all of the income relating to the distribution is 100% franked.

Equalisation

Many funds receive dividends from the companies they invest in. These payments are added to the fund's cash reserve. As this reserve grows, so does the fund's net asset value, which in turn increases the offer price for the fund's units.

At the point of the fund's next dividend payment date, these dividends are paid out to the fund's unitholders and no longer form part of the fund's cash reserve. This usually causes the unit price of the fund to fall.

Group 1 and 2 (see top of the page for dates) unitholders receive the same dividend amount per unit. Group 1 payments entirely comprise of income and therefore Equalisation does not apply to this group.

Group 2 payments take into account two components as they are between two dividend dates. Part of the payment for Group 2 unitholders comes from the income that accumulated from the date of unit purchase. The second part comes from partial returns on units that were bought at a higher price when the cash reserve grew. This is known as capital repayment. It is not liable to Income Tax but must be deducted from the cost of the shares for Capital Gains Tax purposes.

WESLEYAN LOW RISK / REWARD GROWTH FUND

FUND REVIEW

This is the half-year report for the Wesleyan Low Risk/Reward Growth Fund covering the period from 1 July 2019 to 31 December 2019. The underlying unit price performance generated a return of 3.39% over the period compared to the IA Mixed Investment 0-35% Shares sector average of 2.41%*.

A return of 3.39% for a six-month period is highly respectable, considering two-thirds of the fund is invested in bonds. When combined with the 6.69% return achieved in the first six months of the calendar year, unitholders have received a total return over 2019 of 10.30%, well ahead of the sector's 8.70% return.

The six-month period witnessed a number of market-moving events, predominantly with a UK slant on them. Ongoing Brexit-related news and the Conservative victory in the general election had the biggest bearing on domestic markets. New Prime Minister Boris Johnson's 'roll of the dice' in calling an election paid off with a decisive majority and a strong mandate to negotiate the future with our European partners.

October saw positive Irish border discussions between Johnson and his counterpart in Ireland, Leo Varadkar. Sterling rallied on news that a mutually satisfactory solution to Brexit was a possibility and the more domestically-orientated equities outperformed the larger internationally-focused UK companies. This was positive for the Low Risk/Reward Growth Fund equity portfolio due to our focus on companies exposed to the UK economy.

Similarly, once the polling stations closed at 10pm on 12 December, sterling rallied

3 to 4 cents against the US dollar as exit polls predicted that the Conservative Party would far exceed the 326 seats needed for a majority in Parliament. On confirmation the following morning, equities rose and bonds fell in value as redemption yields rose.

Strong relative outperformance by the fund against the sector was seen in the last four months of the period, with the fund well-positioned to take advantage of market reaction to the election. An example of this was shown by our activity in the shares of Marks & Spencer - a purchase was made in early October following a prolonged period of underperformance, and this position was sold the day after the election for a total return in excess of 35%.

Markets also had ongoing US-China trade negotiations to deal with, alongside fears of a potential recession in the US - as even a shallow recession is likely to hurt sentiment in global markets. These fears were partly allayed by a series of interest rate cuts in the US.

Brexit affected not only the UK but also Europe, with Germany in particular adversely affected by a lack of demand from the UK in the final quarter of the year, increasing the chance of a technical recession.

A full list of portfolio holdings can be found later in this report.

FUND OUTLOOK

We continue to see equities as providing the best long-term value and the UK market as being better value than overseas developed markets. Thus, it remains our intention to position the fund towards the upper end of its 35% equity ceiling whilst seeking to add

value by taking positions in shorter-dated bonds.

Over the long term, returns on the scale of those seen in 2019, for a fund such as the Low Risk/Reward Growth Fund, are unlikely to be sustainable. At the end of the reporting period, UK government bonds were valued on redemption yields below 1.5% over all durations, limiting the opportunity for earning high long-term returns. In such a scenario, we intend to concentrate on trying to add value by trading in different maturities as and when we feel opportunities present themselves.

Government bond redemption yields in a number of European countries are negative. This means that investors are paying these governments for the privilege to lend them money. Whilst we do not believe that this scenario will play out in the UK it does illustrate that yields can continue to fall and that zero is not the floor for yields. However, we remain cautious about the value in owning longer-dated maturing bonds until we see higher yields for them. We prefer to position the bond portfolio in shorter-dated bonds and might use periods of volatility to take positions in longer-dated bonds when they are out of favour, in order to add value for unitholders.

At the time of writing, markets face a number of uncertainties. President Trump has been acquitted in his impeachment trial and the spread of a new coronavirus is currently being contained by combined international efforts. The latter shows that unpredictable events can be prevalent in markets and that it is difficult to mitigate their effects.

WESLEYAN LOW RISK / REWARD GROWTH FUND continued

GENERAL INFORMATION

Investment objective and policy

The aim of the Manager is to provide capital growth over the medium to long term, principally through investments in a diversified portfolio of government and corporate bonds, UK and international equities, and cash.

Investment will generally be made in Sterling denominated assets but the Fund may at the Manager's discretion invest in non-Sterling denominated assets.

The fund may also invest in other fixed interest and transferable securities, near cash, deposits, money-market instruments and other collective investment schemes.

More than 35% of the fund may be invested in government and public securities issued by or on behalf of or guaranteed by the Government of the United Kingdom.

The Fund may use derivatives for the purposes of efficient portfolio management.

Risk and reward profile

The risk category is based on the rate the fund's value has moved up and down in the past and has remained unchanged from the prior year.

The risk category is based on the rate the fund's value has moved up and down in the past.

The fund's value can be influenced by changes in stock market prices, currencies and interest rates which can be affected by factors such as political and economic events.

This risk category is calculated in line with European Securities Markets Authority (ESMA) rules using historical data.

This is not a guarantee and may not be a reliable indication of the fund's future risk and reward category.

A fund in the lowest category does not mean a 'risk free' investment.

A fuller explanation of the risk and reward profile of the fund is contained in the fund's Key Investor Information Document (KIID).

Corporate unitholders information

For corporate unitholders, all of the income relating to the distribution is 100% unfranked.

Equalisation

Many funds receive dividends from the companies they invest in. These payments are added to the fund's cash reserve. As this reserve grows, so does the fund's net asset value, which in turn increases the offer price for the fund's units.

At the point of the fund's next dividend payment date, these dividends are paid out to the fund's unitholders and no longer form part of the fund's cash reserve. This usually causes the unit price of the fund to fall.

Group 1 and 2 (see top of the page for dates) unitholders receive the same dividend amount per unit. Group 1 payments entirely comprise of income and therefore Equalisation does not apply to this group.

Group 2 payments take into account two components as they are between two dividend dates. Part of the payment for Group 2 unitholders comes from the income that accumulated from the date of unit purchase. The second part comes from partial returns on units that were bought at a higher price when the cash reserve grew. This is known as capital repayment. It is not liable to Income Tax but must be deducted from the cost of the shares for Capital Gains Tax purposes.

WESLEYAN MODERATE-HIGH RISK / REWARD INCOME FUND

FUND REVIEW

This is the half-year report for the Wesleyan Moderate-High Risk/Reward Income Fund covering the period from 1 July 2019 to 31 December 2019. The underlying unit price performance generated a return of 4.44% compared to the IA Mixed Investment 40-85% sector that returned an average of 4.37%*.

In the period under review, global equity and fixed income markets delivered six months of positive performance. The December general election victory saw Boris Johnson continue as Prime Minister and the subsequent strong sterling appreciation presented a headwind for the more internationally-exposed largest UK companies, which underperformed the more domestically-focused medium-sized and smaller UK companies.

Global equities ended the period up 5% overall, notably driven by the performance of technology companies such as Apple, Microsoft, Alphabet (formerly Google) and semiconductor manufacturers Intel and Taiwan Semiconductor Manufacturing Company. Fixed income markets were also up, though UK government bonds underperformed UK corporate bonds, while cash returns remained negligible.

The fund is positioned towards the top end of its range in equities (particularly UK equities) and towards the bottom in UK government and corporate bonds, which boosted performance over the period. A high cash balance, in contrast, detracted from performance.

The fund's position in UK housebuilders (Bellway and Persimmon) contributed positively to performance over the period. Other strong contributions came from technology giant Microsoft, defence and support services company Babcock, and healthcare names GlaxoSmithKline, Novo Nordisk and AstraZeneca. The largest detractions to performance came from Deutsche Telekom, engineering company Renishaw, small-cap healthcare company Clinigen, and technology company EMIS.

Several new positions were started and others bolstered over the period. Most notably, a position was initiated in Fever-Tree as concerns around a peaking UK gin market caused the shares to decline materially and meant investors largely ignored the international potential of the group. Other notable new holdings include Facebook, Vesuvius (a UK-based steel industry supplier) and OneSavings Bank (a small UK specialist lender). We added to the modest position already held in Hargreaves Lansdown as the valuation declined. Positions were exited in both Merlin Entertainments and Greene King after successful cash takeover bids.

The full list of portfolio holdings can be found later in this report.

FUND OUTLOOK

Global growth forecasts were quickly brought into question in January 2020 following a military clash between the US and Iran. This was swiftly followed by the reported outbreak of a new coronavirus in

the Chinese district of Wuhan. Of the two, the coronavirus remains most likely to disrupt markets in 2020.

The UK exited the European Union on 31 January 2020 and is currently in a transition period that lasts until 31 December 2020. The EU has cautioned on the short duration of time with which to conduct talks. Sterling has now lost much of the strength we saw after the Conservative election win, yet we expect sterling to reverse course and end the year higher than it started 2020.

There are several key events for the remainder of 2020 that we continue to watch closely. Most notable is the US election in November, where it is widely expected that President Trump will secure a second term. While it remains unclear who the opposing Democrat candidate is likely to be, a successful Presidential bid from certain candidates could have profound impacts on markets.

Generally, we see the challenges markets face in 2020 as surmountable, and believe that underlying economics are starting to improve, assisted by the increase in liquidity provided by central banks. Cash returns are likely to remain low, but for a mixed asset portfolio cash offers some flexibility and optionality in times of volatility. We retain our preference for equities over fixed income, and while we expect cash returns to remain muted it provides a level of optionality for a mixed asset fund.

* Source: FE fundinfo. Return shown is the X-Class Accumulation series, bid prices at noon.

GENERAL INFORMATION

Investment objective and policy

The aim of the Manager is to provide a competitive level of income, together with the potential for long term capital growth, principally by investing in UK and international equities (largely dividend paying) with the remainder largely invested in fixed interest securities.

The Fund may also invest in other transferable securities (including non-UK equities), cash, near cash, deposits, money-market instruments and other collective investment schemes.

More than 35% of the fund may be invested in government and public securities issued by or on behalf of or guaranteed by the Government of the United Kingdom.

The Fund may use derivatives for the purpose of efficient portfolio management.

Risk and reward profile

The risk category is based on the rate the fund's value has moved up and down in the past and has remained unchanged from the prior year.

The risk category is based on the rate the fund's value has moved up and down in the past.

The fund's value can be influenced by changes in stock market prices, currencies and interest rates which can be affected by factors such as political and economic events.

This risk category is calculated in line with European Securities Markets Authority (ESMA) rules using historical data.

This is not a guarantee and may not be a reliable indication of the fund's future risk and reward category.

A fund in the lowest category does not mean a 'risk free' investment.

A fuller explanation of the risk and reward profile of the fund is contained in the fund's Key Investor Information Document (KIID).

Corporate unitholders information

For corporate unitholders, all of the income relating to the distribution is 100% franked.

Equalisation

Many funds receive dividends from the companies they invest in. These payments are added to the fund's cash reserve. As this reserve grows, so does the fund's net asset value, which in turn increases the offer price for the fund's units.

At the point of the fund's next dividend payment date, these dividends are paid out to the fund's unitholders and no longer form part of the fund's cash reserve. This usually causes the unit price of the fund to fall.

Group 1 and 2 (see top of the page for dates) unitholders receive the same dividend amount per unit. Group 1 payments entirely comprise of income and therefore Equalisation does not apply to this group.

Group 2 payments take into account two components as they are between two dividend dates. Part of the payment for Group 2 unitholders comes from the income that accumulated from the date of unit purchase. The second part comes from partial returns on units that were bought at a higher price when the cash reserve grew. This is known as capital repayment. It is not liable to Income Tax but must be deducted from the cost of the shares for Capital Gains Tax purposes.

WESLEYAN MODERATE RISK / REWARD GROWTH FUND

FUND REVIEW

This is the half-year report for the Wesleyan Moderate Risk/Reward Growth Fund covering the period from 1 July to 31 December 2019. The underlying unit price performance generated a return of 5.06% compared to the IA Mixed Investment 20-60% Shares sector average of 3.59%*.

Investment markets started the reporting period on a positive footing as the US and China agreed to re-start trade talks. However, growing US recession fears prompted stock markets to decline and bond markets to rise on the prospect of lower interest rates. Reductions to interest rates were duly delivered by the US Federal Reserve and the European Central Bank.

Recession fears rapidly faded during the final calendar quarter of 2019 and stock markets resumed their march higher. The agreement of a 'phase one' trade deal between the US and China combined with stabilising global economic data to rekindle optimism and propel US markets to new record highs.

The global picture was not uniformly bright, however. Germany was still weighed down by stalling industrial production, France was plagued by public strikes over pension reforms and there were anti-Beijing protests in Hong Kong. Oil prices also spiked higher after drone attacks on large Saudi oil production facilities, which rekindled tensions in the Middle East.

As a mixed asset fund, the Moderate Risk/Reward Growth Fund is well-placed to absorb these bond and equity market gyrations, delivering a smoother longer-term journey for unitholders through investment markets, which can be unpredictable and volatile over shorter time periods.

The build up to Boris Johnson becoming the UK Prime Minister, in July, saw the value of sterling fall below \$1.25 as the market sensed an increased likelihood of

a harder-Brexit. The ensuing demand for safe-haven assets compressed the 10-year UK government bond yield to below 0.5% at one point. Weak data stemming from the construction industry, high street retailing and residential house price growth did little to improve the mood as autumn arrived.

UK employment data remained a rare bright spot, with wage growth and unemployment statistics providing some reassurance to the Bank of England, who left UK interest rates unchanged at 0.75% throughout the whole reporting period.

Brexit news, rarely out of the headlines, reached fever pitch in autumn as the proroguing of Parliament was overturned by the Supreme Court. A series of events led to the Brexit deadline being extended to 31 January 2020, whilst a general election was called for 12 December 2019. The 80-seat winning majority gave Prime Minister Johnson a strong mandate to get parliamentary approval for his new EU Withdrawal Agreement.

Sterling initially rose to \$1.35 on the general election result but subsequently faded as attention turned towards the difficulties of agreeing a trade deal during the transition period and before the 'end of 2020' deadline. Overall, the UK noticeably underperformed US and European stock markets in 2019, principally due to this prolonged Brexit uncertainty.

Purchases of fixed income assets were limited. In the period under review, a Legal & General bond was acquired alongside a collection of short-dated UK government treasury bills, which served as alternatives to longer-dated gilt market purchases.

The fund benefited from strong gains by its pharmaceutical stocks – GlaxoSmithKline and AstraZeneca. There were also big rises from shares in Apple, and the fund's water and electricity sector holdings. Existing

investments in resource companies, such as BP, Royal Dutch Shell and Glencore detracted from performance during the six-month period.

The full list of portfolio holdings can be found later in this report.

FUND OUTLOOK

Whilst we have far more clarity around the Brexit timetable, as the UK has now officially left the EU, we are acutely aware of the tight deadline for agreeing a trade deal with the EU by 31 December 2020. We continue to see value in the UK stock market, but acknowledge that trade agreements are key catalysts for starting to unlock this hidden value and so we must remain patient investors.

The prospects for the global economy look much brighter than they did only a few months ago, but some of this is already factored into the share prices of markets such as the US, where technology valuations have become somewhat stretched and require strong earnings growth to justify current share prices. We will therefore continue to be highly selective when choosing new investments, paying close attention to the valuations being paid. We will also continue to monitor developments regarding the new coronavirus outbreak.

In fixed income, we continue to see very limited value in holding longer-dated UK government bonds, given the persistence of exceptionally low yields. Instead, we look for trading opportunities to generate better returns for our unitholders. Corporate bonds have also performed very strongly in recent years, so we remain cautious investors here too, and we do not expect significant changes to cash returns.

WESLEYAN MODERATE RISK / REWARD GROWTH FUND continued

GENERAL INFORMATION

Investment objective and policy

The Fund aims to provide capital growth over the medium to long term.

The Fund will invest predominantly in a diversified portfolio of UK and international equities, government bonds, corporate bonds and cash.

Investments will be made across various sectors and may include companies anywhere in the world.

The Fund may also invest in other fixed interest and transferable securities, near cash, deposits and money-market instruments and other collective investment schemes.

More than 35% of the Fund may be invested in government and public securities issued by or on behalf of or guaranteed by the Government of the United Kingdom

The Fund may use derivatives for the purposes of efficient portfolio management.

Risk and reward profile

The risk category is based on the rate the fund's value has moved up and down in the past and has remained unchanged from the prior year.

The fund's value can be influenced by changes in stock market prices, currencies and interest rates which can be affected by factors such as political and economic events.

This risk category is calculated in line with European Securities Markets Authority (ESMA) rules using historical data.

This is not a guarantee and may not be a reliable indication of the fund's future risk and reward category.

A fund in the lowest category does not mean a 'risk free' investment.

A fuller explanation of the risk and reward profile of the fund is contained in the fund's Key Investor Information Document (KIID).

Corporate unitholders information (Unaudited)

For corporate unitholders, all of the income relating to the distribution is 100% franked.

Equalisation

Many funds receive dividends from the companies they invest in. These payments are added to the fund's cash reserve. As this reserve grows, so does the fund's net asset value, which in turn increases the offer price for the fund's units.

At the point of the fund's next dividend payment date, these dividends are paid out to the fund's unitholders and no longer form part of the fund's cash reserve. This usually causes the unit price of the fund to fall.

Group 1 and 2 (see top of the page for dates) unitholders receive the same dividend amount per unit. Group 1 payments entirely comprise of income and therefore Equalisation does not apply to this group.

Group 2 payments take into account two components as they are between two dividend dates. Part of the payment for Group 2 unitholders comes from the income that accumulated from the date of unit purchase. The second part comes from partial returns on units that were bought at a higher price when the cash reserve grew. This is known as capital repayment. It is not liable to Income Tax but must be deducted from the cost of the shares for Capital Gains Tax purposes.

WESLEYAN RISK AVERSE FUND

FUND REVIEW

As previously communicated to unitholders, on 21 January 2019 the fund moved sector from the IA Short Term Money Market sector to the IA UK Gilts sector.

This is the half-year report for the Wesleyan Risk Averse Fund covering the period from 1 July 2019 to 31 December 2019. The underlying unit price in the fund increased by 0.48% over the period, trailing the IA UK Gilts sector average which grew by 1.59% over the same period*. The fund's assets continue to be invested in a selection of relatively short-dated UK gilts. This remains a conscious decision to minimise unitholders' exposure to long-dated gilts, which have the potential to exhibit more price volatility than we currently feel is warranted for a 'risk-averse' fund. A key feature of gilts is the relationship between prices and yield, i.e. as gilt prices rise, the associated yields fall correspondingly. This inverse relationship between prices and yields is more pronounced for gilts with long maturity dates and, in periods of heightened uncertainty and fear, longer-dated gilts tend to outperform their shorter-dated peers.

July and August were testaments to this narrative. As domestic fears of a hard "Brexit" began to increase in July, gilt yields declined as investors sought safe-haven assets. This became even more

pronounced in August, when the fractious trade relationship between the US and China resulted in retaliatory tariffs being applied to additional consignments of imported goods.

The UK political landscape also remained a constant source of volatility for gilt markets during the period. With Boris Johnson appointed as Prime Minister in July, after winning the Conservative leadership contest, he managed to successfully renegotiate the UK's Withdrawal Agreement in October. This was followed by a conclusive general election victory that provided much needed clarity for financial markets. With uncertainty beginning to dissipate, gilt prices retreated in the final quarter of 2019, although the declines were not enough to offset the strong gains made between July and September.

Even though the reporting period ended with more clarity for investors, the volatility encountered along the way left its mark on key areas of the UK economy. Inflation, as measured by the annual change in the Consumer Prices Index, fell from 2% - the level targeted by the Bank of England's Monetary Policy Committee (MPC) - to 1.3% in December. Steady declines in retail sales have also been a worrying feature for the consumer-led UK economy. With a flurry of survey data suggesting that the economy was close to stagnating, two members of the MPC

believed there was sufficient evidence to warrant voting for an interest rate cut at the December meeting.

The full list of portfolio holdings can be found later in this report.

FUND OUTLOOK

2020 began with a dawning realisation that the MPC was perhaps far closer to cutting interest rates than markets were anticipating. However, a string of recently updated surveys provided a glimpse of the growing optimism that may yet permeate the economy. With UK gilt yields declining in the first few weeks of the year, resulting in most long-dated gilts yielding around 1%, worries about the progress on trade talks and global growth remain key concerns for investors.

As the UK attempts to achieve a broad-based trade agreement with our EU counterparts, before the end of 2020, it is possible that some investors are already positioned in gilts to potentially protect from the fallout from any adverse news headlines. However, any positive developments on trade talks, coupled with a general improvement in the underlying economy, could lead to yields moving higher. These types of sentiment-driven market gyrations may provide us with opportunities to reposition existing holdings in a more favourable yield environment.

GENERAL INFORMATION

Investment objective and policy

The Fund aims to provide an attractive level of yield together with a high level of capital security.

The Fund will invest predominantly through Sterling denominated (or hedged back to Sterling) government backed securities, with a rating the same or higher than that of the UK, with at least 80% invested in UK government securities (Gilts).

The Fund may also invest in other fixed interest and transferable securities, near cash, deposits, money-market instruments and other collective investment schemes.

More than 35% of the Fund may be invested in government and public securities issued by or on behalf of or guaranteed by the Government of the United Kingdom.

Risk and reward profile

The risk category is based on the rate the fund's value has moved up and down in the past and has remained unchanged from the prior year.

The fund's value can be influenced by changes in stock market prices, currencies and interest rates which can be affected by factors such as political and economic events.

This risk category is calculated in line with European Securities Markets Authority (ESMA) rules using historical data.

This is not a guarantee and may not be a reliable indication of the fund's future risk and reward category.

A fund in the lowest category does not mean a 'risk free' investment.

A fuller explanation of the risk and reward profile of the fund is contained in the fund's Key Investor Information Document (KIID).

Group 2	0.4879	-	0.4879	0.3187

Corporate unitholders information

For corporate unitholders, all of the income relating to the distribution is 100% unfranked.

Equalisation

Many funds receive dividends from the companies they invest in. These payments are added to the fund's cash reserve. As this reserve grows, so does the fund's net asset value, which in turn increases the offer price for the fund's units.

At the point of the fund's next dividend payment date, these dividends are paid out to the fund's unitholders and no longer form part of the fund's cash reserve. This usually causes the unit price of the fund to fall.

Group 1 and 2 (see top of the page for dates) unitholders receive the same dividend amount per unit. Group 1 payments entirely comprise of income and therefore Equalisation does not apply to this group.

Group 2 payments take into account two components as they are between two dividend dates. Part of the payment for Group 2 unitholders comes from the income that accumulated from the date of unit purchase. The second part comes from partial returns on units that were bought at a higher price when the cash reserve grew. This is known as capital repayment. It is not liable to Income Tax but must be deducted from the cost of the shares for Capital Gains Tax purposes.

WESLEYAN UK GROWTH FUND

FUND REVIEW

This is the half-year report for the Wesleyan UK Growth Fund covering the period from 1 July 2019 to 31 December 2019. The underlying unit price increased by 5.87%, underperforming the IA UK All Companies sector average which appreciated by 8.11%* over the same period.

Despite facing a series of unprecedented events, UK equities managed to post positive returns during the six-month review period. July began calmly for UK financial markets, as Boris Johnson became Prime Minister after winning the Conservative Party leadership contest. Global equity markets also drew comfort from the US Federal Reserve providing additional support to financial markets in the form of a July interest rate cut. August, however, proved to be far more challenging, as an escalation in the simmering trade war between the US and China caused stock markets to take fright. Frustrated by a lack of progress on trade talks, President Trump announced additional tariffs on Chinese imports. Unsurprisingly, but nonetheless harmful for equity performance, China retaliated by imposing tariffs on another tranche of US imports.

UK politics took centre stage in autumn. Fearing the potential repercussions from a 'hard Brexit', a majority of MPs forced the new Prime Minister to seek an extension to the existing 31 October deadline - the date on which the UK was scheduled to leave the EU - if an agreement to avoid a 'hard Brexit' could not be reached with his EU counterparts. Additionally, having failed to

keep Parliament in a state of suspension, the Prime Minister turned his attention to renegotiating an exit deal with the EU. October heralded an announcement that a deal had been secured and this caused a rally in the value of sterling, a move which was fortified by the decisive result of December's general election.

The broad UK stock market rose in value by around 5.5% in the six-month period, but this masked the varying performances of the underlying companies. The largest and most valuable multinational companies rose by an average of 3.7% in the period, as their overseas earnings were held back by a strengthening pound and the protracted trade-war rhetoric between the US and China. Smaller companies, with more exposure to the improving UK political landscape, grew by around 14%. Although it was encouraging to see the fund outperform the general UK stock market, the performance versus peers has unfortunately been held back by many of the larger portfolio holdings, with more dependency and exposure to the global economy.

During the period, the fund disposed of its holding in leisure operator Merlin Entertainment, following a successful takeover bid it received earlier in the year. Profits were also taken in pharmaceutical company AstraZeneca, UK investment trust Henderson Smaller Companies, clothing retailer Next and pub company Mitchells & Butlers - all following strong share price performances. The fund initiated a new position in Bodycote and added to its holding of Senior, both industrial engineering companies.

The full list of portfolio holdings can be found later in this report.

FUND OUTLOOK

Hopes for a promising start to 2020 were quickly dashed by a military clash between the US and Iran in the Middle East. Despite the rapid de-escalation of the confrontation, markets were not afforded any respite as the emergence of a new coronavirus in China, the second largest economy in the world, sent investors into a state of flux. Many companies, across a diverse range of sectors, were quickly discounted by investors trying to predict who would be affected by slower global economic growth. From a humanitarian perspective, we remain hopeful that this outbreak is quickly contained and a medical solution can be found to reduce the mortality rate. Furthermore, progress on this front should also help equity assets to recover lost ground.

Given the UK's departure from the EU, attention has quickly shifted to the ambitious plan to secure a comprehensive trade deal before the end of the year. With related headlines likely to have a significant bearing on the value of sterling, interest rates and UK-listed assets, we feel that volatility will remain a key market feature over the course of 2020. With a long-term lens we believe UK equities appear attractive, from a valuation perspective, and any short-term market volatility could present us with a window of opportunity to enhance unitholder returns.

*Source: FE fundinfo. Return shown is the X-Class Accumulation series, bid prices at noon.

GENERAL INFORMATION

Investment objective and policy

The Fund aims to provide capital growth over the medium to long term.

The Fund will invest predominantly in a diversified portfolio of UK equities.

Under normal circumstances the emphasis will be on equity shares in the UK. The Fund may invest in various sectors.

The Fund may also invest in fixed interest and other transferable securities (including non-UK equities), cash, near cash, deposits, money-market instruments and other collective investment schemes.

The Fund may use derivatives for the purposes of efficient portfolio management.

Risk and reward profile

The risk category is based on the rate the fund’s value has moved up and down in the past and has remained unchanged from the prior year.

The fund’s value can be influenced by changes in stock market prices, currencies and interest rates which can be affected by factors such as political and economic events.

This risk category is calculated in line with European Securities Markets Authority (ESMA) rules using historical data.

This is not a guarantee and may not be a reliable indication of the fund’s future risk and reward category.

A fund in the lowest category does not mean a ‘risk free’ investment.

A fuller explanation of the risk and reward profile of the fund is contained in the fund’s Key Investor Information Document (KIID).

UNAUDITED DISTRIBUTIONS for the period ended 31 December 2019

Distribution tables (pence per unit)

Interim

Group 1: units purchased prior to 1 July 2019.

Group 2: units purchased on or after 1 July 2019 and on or before 31 December 2019

Class A Accumulation Units	Net Income	Equalisation	Accumulated 28 February 2020	Accumulated 28 February 2019
Group 1	6.2499	-	6.2499	5.3567
Group 2	2.5446	3.7053	6.2499	5.3567

Class B Accumulation Units	Net Income	Equalisation	Accumulated 28 February 2020	Accumulated 28 February 2019
Group 1	5.4847	-	5.4847	4.6587
Group 2	2.4604	3.0243	5.4847	4.6587

Class X Accumulation Units	Net Income	Equalisation	Accumulated 28 February 2020	Accumulated 28 February 2019
Group 1	6.6720	-	6.6720	5.7696
Group 2	2.9313	3.7407	6.6720	5.7696

Corporate unitholders information

For corporate unitholders, all of the income relating to the distribution is 100% franked.

Equalisation

Many funds receive dividends from the companies they invest in. These payments are added to the fund's cash reserve. As this reserve grows, so does the fund's net asset value, which in turn increases the offer price for the fund's units.

At the point of the fund's next dividend payment date, these dividends are paid out to the fund's unitholders and no longer form part of the fund's cash reserve. This usually causes the unit price of the fund to fall.

Group 1 and 2 (see top of the page for dates) unitholders receive the same dividend amount per unit. Group 1 payments entirely comprise of income and therefore Equalisation does not apply to this group.

Group 2 payments take into account two components as they are between two dividend dates. Part of the payment for Group 2 unitholders comes from the income that accumulated from the date of unit purchase. The second part comes from partial returns on units that were bought at a higher price when the cash reserve grew. This is known as capital repayment. It is not liable to Income Tax but must be deducted from the cost of the shares for Capital Gains Tax purposes.

NOTES TO THE TRUST'S FINANCIAL STATEMENTS

These are the unaudited interim accounts of the Trust and the funds within for the period ended 31 December 2019. Disclosed below is the basis of preparation for the unaudited interim accounts.

ACCOUNTING POLICIES

1. Basis of preparation

The financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments, in compliance with the Financial Conduct Authority's Collective Investments Schemes sourcebook. They have been prepared in accordance with applicable UK accounting standards, Trust Deed and in accordance with FRS 102 and in accordance with the Statement of Recommended Practice for Financial Statements of UK Authorised Funds issued by the Investment Management Association in May 2014 (the 2014 SORP) and amended in June 2017. The accounting policies applied to these accounts are consistent with those applied in the accounts for the year ended 30 June 2019.

2. Taxation

The charge for taxation is based on the results for the year. In general, the tax accounting treatment follows that of the original amount. Deferred tax is provided on all timing differences that have originated but not reversed at the balance sheet date other than those recorded as permanent differences.

Deferred tax is provided at the average rate of tax expected to apply.

Deferred tax assets and liabilities are not discounted to reflect the time value of money.

Note that deferred tax assets are recognised only to the extent they are regarded as recoverable.
