# WESLEYAN AUTHORISED UNIT TRUST

HALF YEAR FUND MANAGER REPORT  
31 December 2020

# DIRECTORS

**IAN MCCAIG**  
**CHAIRMAN**  
**WESLEYAN UNIT TRUST MANAGERS**

On 11 December 2020, Ian was appointed as a Chairman to the Board of Wesleyan Unit Trust Managers.

Ian has been a member of Wesleyan Group's Board of Directors since 30 September 2019 and was appointed to the Society's Risk Committee. Ian has worked across a number of sectors, most recently as CEO of First Utility Ltd. He led the company through several years of successful transformation and significant growth before its acquisition by Shell at the end of 2017. Prior to that Ian was CEO of lastminute.com. Ian also serves on the Boards of M-Kopa Ltd, Seedrs Ltd, English Heritage and Festicket, of which he is Chair.

**JAMES NEEDHAM** MBA, FIA  
**CHIEF EXECUTIVE OFFICER**  
**WESLEYAN UNIT TRUST MANAGERS**

On 26 February 2020, James was appointed Chief Executive Officer to the Board of Wesleyan Unit Trust Managers.

James has 20 years' actuarial experience; he joined Wesleyan in 2010 and became Chief Actuary in 2018. He is responsible for Wesleyan's actuarial and financial reporting activity and oversees the Society's product development and performance, identifying ways to improve customer outcomes. He is a financial reporting expert and has presented at a number of actuarial conferences.

**MARTIN LAWRENCE** BSc, ASIP  
**DIRECTOR**  
**WESLEYAN UNIT TRUST MANAGERS**

On 21 April 2016, Martin was appointed to the Board of Wesleyan Unit Trust Managers as a Director.

Martin joined Wesleyan in 1995 as an Investment Analyst, after graduating from the University of Exeter with a degree in Mathematics, and he subsequently qualified as an Associate of the Chartered Financial Analyst (CFA) Society of the UK. He became a Fund Manager in 2001.

For 20 years, he managed several Wesleyan funds, including its multi-asset With Profits Fund. As Director of Investments at Wesleyan, Martin is responsible for overseeing the management of Wesleyan's funds and its award-winning, in-house Investments team.

# NON-EXECUTIVE DIRECTOR

**ANDREW NEDEN**  
NON-EXECUTIVE DIRECTOR  
WESLEYAN UNIT TRUST MANAGERS

On 11 December 2019, Andrew was appointed as a Non-Executive Director to the Board of Wesleyan Unit Trust Managers.

Andrew has been a member of Wesleyan Group's Board of Directors since November 2014. Andrew worked for 30 years at KPMG, the global accountancy firm, including 18 years as a partner. His roles included Head of Financial Sector Transaction Services in the UK and Global Chief Operating Officer for Financial Services. Andrew also chairs Aetna Insurance Company Limited, is Vice-Chair at the Nottingham Building Society, and is a Non-Executive Director at ABC International Bank PLC.

# FUND MANAGERS

**JAMES HUBBARD, BA, CFA**  
WESLEYAN INTERNATIONAL GROWTH FUND  
WESLEYAN MODERATE-HIGH RISK/REWARD INCOME FUND

James Hubbard joined Wesleyan as an Investment Analyst in January 2011. After graduating with an MA in Economics and Business from the University of Manchester he initially worked for a Corporate Bank in London. James is a CFA (Chartered Financial Analyst) charterholder and has been a Fund Manager since April 2016.

**PAUL BURTON, BSc, FIA**  
WESLEYAN LOW RISK/REWARD GROWTH FUND  
WESLEYAN RISK AVERSE FUND

Paul Burton has been the Fund Manager of the Wesleyan's Low Risk Life and Pension funds since launch in January 2012. He has also managed the assets of the Wesleyan Staff Pension Scheme since 1998, and the Society's Non Profit fund since 2012. He joined the Society in 1990, qualifying as an actuary in 1998, working as an Investment Analyst in the preceding five years.

**MARC O'SULLIVAN, BSc, CFA**  
WESLEYAN MODERATE RISK/REWARD GROWTH FUND  
WESLEYAN UK GROWTH FUND

Marc O'Sullivan has been a Fund Manager since 2012, managing investments across a number of asset classes. Marc joined the Society as an Investment Analyst in 2003, having graduated from the University of Birmingham with a degree in Economics. Marc has been a CFA (Chartered Financial Analyst) charterholder since 2008.

# CHIEF EXECUTIVE OFFICER'S STATEMENT

Since joining Wesleyan Unit Trust Managers (WUTM) as Chief Executive Officer back in February 2020, the COVID-19 pandemic has dominated the investment landscape and global headlines.

As you will already be aware, around the world, many people continue to live their lives under some form of lockdown or restrictions that have been put in place to help manage infection levels. However, while the pandemic's impact is still being felt, the last 12 months have also seen several vaccines receive medical approval, which is a hugely positive step forward. The roll-out of vaccination programmes offers a glimmer of hope that, for all of us, life as we knew it should slowly return once again.

As a business, our constant aim is to provide the best possible financial performance and service for all our clients, many of whom continue to be at the core of the UK's COVID-19 response. While your work has inspired all of us, we can only imagine the toll the pandemic has taken on you. I would like to give you our heartfelt thanks and you can rest assured that we are committed to helping you to achieve a brighter financial future, giving you some peace of mind during these challenging times.

The performance of WUTM's funds has improved in the past six months, as the Investments team's preference for equities over fixed income started to help rather than hinder performance. Our Fund Managers continue to retain a broad preference for the UK market, believing it offers good relative value and excellent recovery potential, especially as the global vaccine roll-out continues.

## WUTM PRODUCT RANGE

There are three WUTM products through which you can invest: a Unit Trust Investment Account, a Unit Trust Individual Savings Account (ISA), and a Unit Trust Junior ISA.

WUTM offers six funds, each with different risk appetites and financial objectives.

These funds are: Risk Averse Fund (page 77), Low Risk/Reward Growth Fund (page 21), Moderate Risk/Reward Growth Fund (page 57), Moderate-High Risk/Reward Income Fund (page 39), UK Growth Fund (page 86), and International Growth Fund (page 9). More information about each fund is available in this document, including fund commentaries and portfolio holdings.

## ACCESSING YOUR WUTM PRODUCTS

Last year saw us launch the WUTM Investor Portal, which gives access to up-to-date valuations and introduces more options for how you can invest with us in the future. If you have not already done so, you can register and log in by visiting [www.wesleyan.co.uk/wutm-online](http://www.wesleyan.co.uk/wutm-online). It is also worth noting that we have removed the initial product charge for customers who decide to take out products online, which is a change we made after listening carefully to our clients' feedback.

## FINANCIAL ADVICE

If you would like advice before making an investment, you can speak to your local Wesleyan Financial Services Consultant by calling us on 0800 980 1278.

Our lines are open 8.30am to 8pm Monday to Wednesday, 8.30am to 7pm Thursday and 8.30am to 5.30pm Friday.

We may collect an Initial Advice Charge on behalf of Wesleyan Financial Services and pay it to them.

## OUTLOOK

The Investments team remains watchful for both short- and long-term changes to economies and forecasts. The past year has seen individuals and businesses change the way they live and operate, particularly through the adoption of new technology. The shuttering of some parts of the service sector, which countries such as the UK heavily rely on, means that consumer

purchasing patterns have been heavily influenced by the pandemic. However, the gradual reopening of economies is likely to lead to consumers being more willing to spend their savings on service-led activities previously classified as 'non-essential.'

The scale of the response to the pandemic, in terms of both monetary and fiscal support from governments across the globe, would have been unthinkable just a few years ago. Nevertheless, we believe that governments are likely to continue supporting their economies for the short-term future. New virus strains and other factors still mean that there remains a high degree of uncertainty to navigate; however, we are optimistic that scientific advances will meet any challenges as they arise.

While we anticipate some turbulence in investment markets as we look to the future, we expect that equities will continue to recover throughout the year, particularly after the summer months and the benefits of the international vaccine roll-out become more tangible. Our award-winning Fund Managers will continue to do what they do best – expertly managing your money throughout any short-term volatility, focused on securing stronger long-term financial returns for those of you who invest with us.

\*Collectively, comprises the Authorised Fund Manager Report. Additionally, in each fund it is comprised of the general information and portfolio statement and changes.

Please note: All "IA" sector mentions in this report refer to the Investment Association's fund sectors, which are used across the industry. Each sector has clear criteria that a fund must fulfil. Sectors are typically based on the main asset types the fund invests in. However, funds in any sector may offer a wide range of assets and risk profiles.

# AUTHORISED FUND MANAGER REPORT

## INTRODUCTION

---

This is the half year report of the Wesleyan Authorised Unit Trust ('Trust') for the period ended 31 December 2020.

The Trust is managed by Wesleyan Unit Trust Managers Limited ('Manager').

The Trust is an authorised unit trust in an umbrella form and was authorised by the Financial Conduct Authority (FCA) effective 4 September 2015. The Trust is classified under the Collective Investment Scheme Sourcebook ('COLL') as a collective investment scheme authorised under the UCITS Directive.

The Trust was established pursuant to a Trust Deed dated 4 September 2015 (as amended from time to time) made between the Manager and HSBC Bank Plc ('Trustee'). The Trust has an unlimited duration.

Details of the managers and advisors of the Trust are disclosed on page 99.

## STRUCTURE OF THE TRUST

---

The Trust is structured as an umbrella unit trust, in that different funds may be established from time to time by the Manager with the approval of the FCA, the agreement of the Trustee and in accordance with the Trust Deed.

The assets of each fund will be treated as separate from those of every other fund and will be invested in accordance with the investment objective and investment policy applicable to that fund.

Each fund has a specific portfolio to which that fund's assets and liabilities are attributable. So far as the Unitholders are concerned, each fund is treated as a separate entity. Unitholders are not liable for the debts of the Trust or for any other fund.

Subject to the above, each fund will be charged with the liabilities, expenses, costs and charges of the Trust attributable to that fund, and within each fund charges will be allocated between classes in accordance with the terms of issue of units of those classes. Any assets, liabilities, expenses, costs or charges not attributable to a particular fund may be allocated by the Manager in a manner which it believes is fair to the unit holders generally. This will normally be pro rata to the Net Asset Value of the relevant funds.

The base currency of each fund is pounds Sterling.

**As at 31 December 2020, the Trust comprised of the following funds:**

Wesleyan International Growth Fund

Wesleyan Low Risk/Reward Growth Fund

Wesleyan Moderate-High Risk/Reward Income Fund

Wesleyan Moderate Risk/Reward Growth Fund

Wesleyan Risk Averse Fund

Wesleyan UK Growth Fund

All of the above funds are managed by the Manager. Details of other management and advisors of the funds are disclosed on page 99.

## UNITS

---

The rights represented by units are those of a beneficial interest under the Trust. Several classes of units may be issued in respect of each fund.

Further classes of units may be established from time to time by the Manager with the approval of the FCA, the agreement of the Trustee and in accordance with the Trust Deed. On the introduction of any new class, a revised prospectus will be prepared, setting out the details of each class.

Units in the Trust are not currently listed on any investment exchange.

Holders of income units are entitled to be paid the distributable income attributed to such units on any relevant interim and/or annual income allocation dates. The Manager, at its discretion, may also permit unit holders to elect to reinvest any such distributable income instead of receiving payment. In this event, the income will be used to purchase additional units in the same fund.

Holders of Accumulation units are not entitled to be paid the income attributed to such units, but that income is automatically transferred to (and retained as part of) the capital assets of the relevant fund on the relevant interim and/or annual accounting dates. This is reflected in the price of an accumulation unit.

## UNITS IN ISSUE

As at 31 December 2020, Accumulation ("Acc") and Income ("Inc") units are available in the following funds and in the following denominations and classes:

Fund Class	Unit Type	Base Currency	Launch Date	ISIN <sup>1</sup>
<b>Wesleyan International Growth Fund</b>

Class X	Acc	GBP	03/06/16	GB00BYNYHP01
<b>Wesleyan UK Growth Fund</b>				
Class A	Acc	GBP	03/06/16	GB00BYNYHQ18
Class B	Acc	GBP	03/06/16	GB00BYNYHR25
Class X	Acc	GBP	03/06/16	GB00BYNYHS32

<sup>1</sup>International Securities Identification Number (ISIN) codes securities including stocks and bonds with unique identifiable numbers. They are in a consistent format so they can be tracked across markets worldwide and are often used by companies when looking to raise capital whether that be debt or equity.

None of the above funds hold units in other funds of the Trust.

# AUTHORISED FUND MANAGER REPORT continued

## UNIT HOLDERS – TAXATION

The information below is a general guide based on current United Kingdom law and HM Revenue & Customs practice which are subject to change. It summarises the tax position of the funds and of direct personal investors who are United Kingdom residents and hold units as investments. This does not detail the tax treatment for corporate or trustee unit holders.

## INCOME

The funds may pay dividend distributions (which will be automatically retained in the relevant fund in the case of accumulation units). There is currently a tax free dividend allowance. Dividends received above this allowance from investments not held within an Individual Savings Account are taxed at a rate that depends on the investor's income tax band.

## INTEREST

Where a fund pays an interest distribution (which will be automatically retained in the fund in the case of accumulation units) this is gross of the basic rate of tax from 6 April 2016 for some people (depending on their tax bands).

There is currently a tax free Personal Savings Allowance (except for additional rate tax payers). Interest distributions received above this allowance from investments not held within an Individual Savings Account or Junior Individual Savings Account are taxed at a rate that depends on the investor's income tax band.

## INCOME EQUALISATION

The first income allocation received by an investor after buying units may include an amount of income equalisation, which will be shown on the issued tax voucher. This is effectively a repayment of the income equalisation paid by the investor as part of the purchase price. It is a return of capital, and is not taxable, rather it should be deducted from the acquisition cost of the units for capital gains tax purposes.

## CAPITAL GAINS

Unit holders may be liable to capital gains tax on gains arising from the redemption, transfer or other disposal of units. The rate of tax, and available reliefs, will be as applicable from time to time. An exchange of units between classes within a fund is generally not treated as a disposal for this purpose.

Units in each of the funds may be held within Individual Savings Accounts and would be exempt from personal liability to income or capital gains tax. Unit holders who have invested in the funds through an Individual Savings Account or Junior Individual Savings Account should refer to the Key Features Document for further details of how it operates.

## REPORTING DATES

The annual and interim accounting date of the Trust and the funds within are as below:

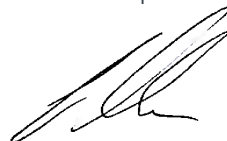

**Annual accounting date: 30 June**

**Interim accounting date: 31 December**

The following pages sets out for each of the funds within the Trust:

- ▶ Fund manager report
- ▶ Number of units in circulation and the net asset values per unit
- ▶ Annual financial statements

This annual report of the Trust and the funds within are available on our website ([www.wesleyan.co.uk/Report](http://www.wesleyan.co.uk/Report)). If you have any questions about the report, or if you would like to talk to us about your investments, you can call us on **0330 123 3813**. Lines are open Monday to Friday from 9.00am to 5.00pm.

Wesleyan Unit Trust Managers Limited

# WESLEYAN INTERNATIONAL GROWTH FUND

## FUND REVIEW

This is the half-year report for the Wesleyan International Growth Fund covering the period from 1 July 2020 to 31 December 2020.

The fund delivered a return after charges of 13.5%\* compared to the benchmark that delivered a return of 11.6%\*\*.

The global economy shrank by around 3.5% in 2020, according to International Monetary Fund (IMF) estimates, while Europe was more negatively impacted in the year - illustrated by the UK and Spain both declining by double-digits. After aggressive stimulus measures and a shorter than average lockdown, the US is expected to contract in line with the global economy. In contrast to much of the world, China, whose assertive containment measures were particularly effective, is estimated to have grown its economy during the year.

November saw the announcement of three successful vaccine trials, with two vaccines being approved in the UK by the end of December. This helped equity markets to look beyond the continued challenges – and potential future waves of COVID-19 infections – and towards a recovery as a result of vaccination programmes having the desired effect.

Global equity markets were up 12% in the six-month period. The North American equity market kept pace (+12%), despite having strongly outperformed in the prior

six months. Emerging markets (+16%) and Asia Pacific ex Japan (+18%) were some of the stronger performers, particularly Chinese equity markets that were buoyed by the nation's strong economic recovery. The UK (+9%) and Europe (+11%) were relative laggards, despite a resolution to the Brexit trade negotiations and underperforming global markets in the previous six months.

Several of the fund's investment trust holdings helped drive performance, such as Pacific Horizon Investment Trust and JP Morgan Japanese Fund, both up over 30%. Other positive contributors included LVMH (luxury conglomerate), PayPal (digital payments) and Estée Lauder (cosmetics). Notable detractors from the fund's performance included Bayer (chemicals), pharmaceutical companies Roche and GlaxoSmithKline, as well as its exposure to the energy sector.

After a strong period of performance, the fund trimmed its holding in Pacific Horizon Investment Trust. The fund initiated a new position in Starbucks, a name that we have been watching for some time.

The full list of portfolio holdings can be found later in this report.

## FUND OUTLOOK

The near-term global outlook will be dominated by fluctuating infection levels, risks from new virus strains and rolling

lockdowns. However, as we approach the end of the summer months, vaccination programmes should drive a tangible recovery as restrictions are eased.

We expect central banks to keep monetary policy supportive and allow inflation levels to rise. While much of the anticipated inflation is expected to be temporary, there remains a risk that supply chains become stressed and price level increases start to become more lasting.

Generally, US markets are more highly valued than elsewhere, although as ever we look on a company by company basis. The victory of Joe Biden in the US Presidential election buoyed markets as a less volatile approach to international relations is anticipated, although there is now a possible risk of tax reform as the Democrats have control of both the House of Representatives and the Senate.

Multiple risks remain to derail a steady global recovery, including geopolitical tensions, vaccine production and distribution disruptions. Forward-looking equity markets largely anticipate a global recovery and, given those elevated expectations, we anticipate the level of volatility to also remain high. However, we believe that equity markets will continue to push forward as signs of a recovery become more evident.

\* Fund shown is the X-Class Accumulation series, bid prices at the end of the day. Performance of all unit series are available on pages 16-17.

\*\* The composite benchmark is composed as follows: 95% FTSE All-World - Total Return Index, and 5% SONIA interest rate benchmark. The benchmark is rebalanced annually on 1 January, and makes no allowances for taxes, fees and charges.

# WESLEYAN INTERNATIONAL GROWTH FUND continued

## GENERAL INFORMATION

### Investment objective and policy

The fund aims to provide capital growth over a period of at least five years. We measure the success of the fund as outperforming a benchmark over a rolling 5-year period. We do this by comparing the investment performance, before fees and charges, to a composite benchmark which reflects the current risk rating of the fund.

The composite benchmark is composed as follows: 95% FTSE All-World - Total Return Index, and 5% SONIA interest rate benchmark. Invested capital is however at risk and there is no guarantee that the objective will be attained over this or any period.

The Fund will invest predominantly in a diversified portfolio of equities. The equities in which the Fund invests may be issued by companies anywhere in the world.

The Fund may invest in various sectors. The Fund may also invest in fixed interest and other transferable securities, cash, near cash, deposits, money-market instruments and other collective investment schemes.

The Fund may use derivatives for the purpose of efficient portfolio management.

### Risk and reward profile

The risk category is based on the rate the fund's value has moved up and down in the past. The risk rating for Share Class A and B has increased from the prior year. Share Class X has a risk category of 5.

The fund's value can be influenced by changes in stock market prices, currencies and interest rates which can be affected by factors such as political and economic events.

This risk category is calculated in line with European Securities Markets Authority (ESMA) rules using historical data.

This is not a guarantee and may not be a reliable indication of the fund's future risk and reward category.

A fund in the lowest category does not mean a 'risk free' investment.

A fuller explanation of the risk and reward profile and how it can move up and down based on the market volatility, is contained in the fund's Key Investor Information Document (KIID). KIIDs are available at [www.wesleyan.co.uk/fund-prices](http://www.wesleyan.co.uk/fund-prices)

<sup>3</sup> Fund benchmarking began on 01.02.2020. As a result, comparative data for the full accounting year was not available.

Past performance is not a guide to future performance. The price of units and distributions credited may go down as well as up. Investments in unit trusts should normally be regarded as long-term investments.

## UNAUDITED DISTRIBUTIONS for the period ended 31 December 2020

### Distribution tables (pence per unit)

#### Interim

Group 1: units purchased prior to 1 July 2020

Group 2: units purchased on or after 1 July 2020 and on or before 31 December 2020

Class A Accumulation Units	Net Income	Equalisation	Accumulated 26 February 2021	Accumulated 28 February 2020
Group 1	-	-	-	-
Group 2	-	-	-	-

Class B Accumulation Units	Net Income	Equalisation	Accumulated 26 February 2021	Accumulated 28 February 2020
Group 1	-	-	-	-
Group 2	-	-	-	-

Class X Accumulation Units	Net Income	Equalisation	Accumulated 26 February 2021	Accumulated 28 February 2020
Group 1	-	-	-	0.0905
Group 2	-	-	-	0.0905

### Corporate unitholders' information

For corporate unitholders all of the income relating to the distribution is 100% franked.

### Equalisation

Many funds receive dividends from the companies they invest in. These payments are added to the fund's cash reserve. As this reserve grows, so does the fund's net asset value, which in turn increases the offer price for the fund's units.

At the point of the fund's next dividend payment date, these dividends are paid out to the fund's unitholders and no longer form part of the fund's cash reserve. This usually causes the unit price of the fund to fall.

Group 1 and 2 (see top of the page for dates) unitholders receive the same dividend amount per unit. Group 1 payments entirely comprise of income and therefore Equalisation does not apply to this group.

Group 2 payments take into account two components as they are between two dividend dates. Part of the payment for Group 2 unitholders comes from the income that accumulated from the date of unit purchase. The second part comes from partial returns on units that were bought at a higher price when the cash reserve grew. This is known as capital repayment. It is not liable to Income Tax but must be deducted from the cost of the shares for Capital Gains Tax purposes.

# WESLEYAN LOW RISK / REWARD GROWTH FUND

## FUND REVIEW

This is the half-year report for the Wesleyan Low Risk/Reward Growth Fund covering the period from 1 July 2020 to 31 December 2020. The fund delivered a return after charges of 5.3%\* compared to the benchmark that delivered a return of 4.3%\*\*.

The fund's return – of more than 5% – during the six-month reporting period was impressive given the volatile market conditions. UK equities fell by more than 4% in both July and October, and a rally that was seen in August was virtually cancelled out by September's retreat. The late summer and autumn months saw the Low Risk/Reward Fund underperform competitors in its sector before finishing the period strongly.

November brought a turnaround in equity markets due to a decisive US Presidential election and, arguably more importantly, the announcement of three highly effective vaccines for COVID-19. UK equity markets returned more than 12% in November alone, which led to a 9% total return over the six-month period. The effect was most pronounced in so called 'mid-cap' and 'small-cap' companies – those outside of the biggest 100 UK companies. These companies collectively saw returns in excess of 20% during the period.

UK equities have still underperformed their global peers, but with market valuations at lower levels we believe this trend could reverse soon as global economies continue

to recover. The UK's bias towards the service industry, and in particular hospitality, has seen UK companies underperform during the pandemic.

Markets attempt to look through short-term events to a time in the future when the economy has fully reopened. Of course, there will unfortunately be a number of corporate failures – it is hoped that new companies will emerge to fill this void and create employment opportunities.

We use periods of market weakness to purchase shares in companies we believe have been unfairly marked down below fair value and where the share price is not reflecting future growth prospects. In some cases, such as beverage multinational Diageo, we took advantage of periods of share price strength and sold during the period (for a 20% profit in four months, in this particular case), but in other cases such as life assurer Legal and General, and housebuilder Taylor Wimpey, we have retained our holdings. These two purchases were standing on unrealised profits since our purchase in September, making 33% and 47% respectively at year end. Other purchases made have shown much smaller profits or even losses, but we invest in companies we believe show good long-term potential at a price that fails to factor in this potential.

A full list of portfolio holdings can be found later in this report.

## FUND OUTLOOK

When we first entered lockdown in late March 2020, few would have expected us to still be operating under the 'work at home if possible' mantra as we entered 2021. Despite attempts to suppress the spread of COVID-19, its resilience has unfortunately been relentless. The roll-out of a number of highly effective vaccines should allow a gradual relaxation of restrictions and enable the economy to reopen in a controlled manner. However, different strains of the virus are a cause for concern, especially if existing vaccines are unable to provide sufficient protection.

There will undoubtedly be pent-up demand from consumers to spend savings accumulated over the lockdown periods. We expect this to help drive the recovery in economic growth and positive share price reactions from a number of companies. We consider UK equities to be more attractive relative to international peers and have positioned the portfolio with this in mind. With bonds trading at low interest rates, there is likely to be limited long-term value in fixed interest investments.

Whilst many global uncertainties remain as we progress through 2021, we look forward with optimism to continued recovery in financial markets, but we are mindful that 'black swan' events such as COVID-19 can derail them.

\* Fund shown is the X-Class Accumulation series, bid prices at the end of the day. Performance of all unit series are available on pages 32-35.

\*\* The composite benchmark is composed as follows: 22.5% FTSE All-Share - Total Return, 7.5% FTSE Developed ex UK - Total Return, 32.5% FTSE Actuaries UK Conventional Gilts All Stocks – Total Return, 32.5% iBoxx £ Corporates – Total Return Indices and 5% SONIA interest rate benchmark. The benchmark is rebalanced annually on 1 January, and makes no allowances for taxes, fees and charges.

# WESLEYAN LOW RISK / REWARD GROWTH FUND continued

## GENERAL INFORMATION

### Investment objective and policy

The fund aims to provide capital growth over a period of at least five years. We measure the success of the fund as outperforming a benchmark over a rolling 5-year period. We do this by comparing the investment performance, before fees and charges, to a composite benchmark which reflects the current risk rating of the fund.

The composite benchmark is composed as follows: 22.5% FTSE All-Share - Total Return, 7.5% FTSE Developed ex UK - Total Return, 32.5% FTSE Actuaries UK Conventional Gilts All Stocks - Total Return, 32.5% iBoxx £ Corporates - Total Return Indices and 5% SONIA interest rate benchmark. Invested capital is however at risk and there is no guarantee that the objective will be attained over this or any period.

The Fund will invest predominantly in a diversified portfolio of government bonds, corporate bonds, UK and International equities and cash.

Investment will generally be made in sterling denominated assets but the Fund may at the Manager's discretion invest in non-Sterling denominated assets.

The Fund may also invest in other fixed interest and transferable securities, near cash, deposits, money-market instruments and other collective investment schemes. More than 35% of the Fund may be invested in government and public securities issued by or on behalf of or guaranteed by the Government of the United Kingdom.

The Fund may use derivatives for the purposes of efficient portfolio management.

### Risk and reward profile

The risk category is based on the rate the fund's value has moved up and down in the past and has increased from the prior year.

The fund's value can be influenced by changes in stock market prices, currencies and interest rates which can be affected by factors such as political and economic events.

This risk category is calculated in line with European Securities Markets Authority (ESMA) rules using historical data.

This is not a guarantee and may not be a reliable indication of the fund's future risk and reward category.

A fund in the lowest category does not mean a 'risk free' investment.

A fuller explanation of the risk and reward profile and how it can move up and down based on the market volatility, is contained in the fund's Key Investor Information Document (KIID). KIIDs are available at [www.wesleyan.co.uk/fund-prices](http://www.wesleyan.co.uk/fund-prices)

**More information about fund performance, including benchmarks and comparisons, can be found later in this report.**

<sup>3</sup> Fund benchmarking began on 01.02.2020. As a result, comparative data for the full accounting year was not available.

Past performance is not a guide to future performance. The price of units and distributions credited may go down as well as up. Investments in unit trusts should normally be regarded as long-term investments.

Group 1	0.5260	-	0.5260	0.7907
Group 2	0.2620	0.2640	0.5260	0.7907

### Corporate unitholders information

For corporate unitholders, all of the income relating to the distribution is 100% unfranked.

### Equalisation

Many funds receive dividends from the companies they invest in. These payments are added to the fund's cash reserve. As this reserve grows, so does the fund's net asset value, which in turn increases the offer price for the fund's units.

At the point of the fund's next dividend payment date, these dividends are paid out to the fund's unitholders and no longer form part of the fund's cash reserve. This usually causes the unit price of the fund to fall.

Group 1 and 2 (see top of the page for dates) unitholders receive the same dividend amount per unit. Group 1 payments entirely comprise of income and therefore Equalisation does not apply to this group.

Group 2 payments take into account two components as they are between two dividend dates. Part of the payment for Group 2 unitholders comes from the income that accumulated from the date of unit purchase. The second part comes from partial returns on units that were bought at a higher price when the cash reserve grew. This is known as capital repayment. It is not liable to Income Tax but must be deducted from the cost of the shares for Capital Gains Tax purposes.

# WESLEYAN MODERATE-HIGH RISK / REWARD INCOME FUND

## FUND REVIEW

This is the half-year report for the Wesleyan Moderate-High Risk/Reward Income Fund covering the period from 1 July 2020 to 31 December 2020. The fund delivered a return after charges of 8.1%\* compared to the benchmark that delivered a return of 8.0%\*\*.

COVID-19 has had significant social and economic consequences throughout 2020. The summer months saw health services better able to manage the virus and falling infection levels saw some countries able to ease restrictions while anticipating and preparing for a later resurgence. In the final months of the year, three highly successful vaccine trials were published with two vaccines approved in the UK before the period end.

In economic terms, we saw a strong recovery in global output from the lows of March and April. The length and severity of lockdowns, as well as stimulus measures, help explain the wide range of outcomes across different regions. Among developed markets, Europe was impacted the most, while the US performed in line with the global average. While the strict containment measures taken by China were criticised, they proved effective and allowed for a quicker reopening of the economy. Uniquely amongst major countries China is forecast to have grown its Gross Domestic Product (GDP) in 2020.

There was a significant sell-off in equity markets as hospitalisations and deaths initially rose, but global equities were quick to see the path to eventual recovery, led by the US. During this period, UK equity markets (+9.3%) were helped by a late rally as a Brexit trade deal was finally achieved, but still rose by less than the Developed World ex UK (+12.0%). Markets were led in later months by more cyclical sectors, such as financial services and commodities.

The fund bought several new holdings in the period, including Schroder British Opportunities Trust (private equity & small cap fund), Elementis (chemicals) and Future (media). The fund later added to its holding in Future, after the proposed GoCo acquisition was taken unfavourably by the market. Other top-ups include Diageo (beverages) and Bellway (housebuilding). The fund sold around half of its position in Tyman after it recovered very strongly on the back of encouraging US housing data and news flow.

The broad positioning of the fund benefited performance over the period, as equities outperformed fixed income assets. However, the overweight allocation to UK equities and disappointing overseas equity selection negated much of the benefit.

Within equities, positive contributions to performance came from InterContinental

Hotels (hotel operator), Elementis, Dignity (funeral director), as well as beverage companies Fever-Tree and Diageo. The largest negative contributions came from pharmaceutical companies GlaxoSmithKline and AstraZeneca, as well as Reckitt Benckiser (personal products), Sage (accounting software) and BP (oil and gas).

The full list of portfolio holdings can be found later in this report.

## FUND OUTLOOK

Equity volatility is likely to remain elevated as markets navigate an uncertain landscape. We anticipate the monetary and fiscal backdrop to remain supportive, with clear signals from some central banks that they intend to allow inflation to rise.

With vaccinations being rapidly rolled-out in the UK, it is likely that many of the economic challenges and restrictions faced in the winter months will dissipate as the recovery gathers momentum into the second half of 2021. With a similar narrative globally, we expect equities to continue their recovery in 2021 and we retain our relative preference for equities versus bonds. Fixed income markets remain unattractive given the historically low yields available, while across equity markets we see the UK as particularly attractive.

\* Fund shown is the X-Class Accumulation series, bid prices at the end of the day. Performance of all unit series are available on pages 50-52.

\*\* The composite benchmark is composed as follows: 55% FTSE All-Share - Total Return, 15% FTSE Developed ex UK - Total Return, 5% FTSE Emerging Markets - Total Return, 10% FTSE Actuaries UK Conventional Bonds Gilts All Stocks - Total Return, 10% iBoxx £ Corporates - Total Return Indices and 5% SONIA interest rate benchmark. The benchmark is rebalanced annually on 1 January, and makes no allowances for taxes, fees and charges.

## GENERAL INFORMATION

### Investment objective and policy

The fund aims to provide capital/income growth over a period of at least five years. We measure the success of the fund as outperforming a benchmark over a rolling 5- year period. We do this by comparing the investment performance, before fees and charges, to a composite benchmark which reflects the current risk rating of the fund.

The composite benchmark is composed as follows: 55% FTSE All-Share - Total Return, 15% FTSE Developed ex UK - Total Return, 5% FTSE Emerging Markets - Total Return, 10% FTSE Actuaries UK Conventional Bonds Gilts All Stocks - Total Return, 10% iBoxx £ Corporates - Total Return Indices and 5% SONIA interest rate benchmark. Invested capital is however at risk and there is no guarantee that the objective will be attained over this or any period.

The Fund will invest in UK and international equities (largely dividend paying) with the remainder largely being invested in fixed interest securities.

The Fund may also invest in other transferable securities (including non-UK equities), cash, near cash, deposits, money-market instruments and other collective investment schemes.

More than 35% of the Fund may be invested in government and public securities issued by or on behalf of or guaranteed by the Government of the United Kingdom.

The Fund may use derivatives for the purpose of efficient portfolio management.

### Risk and reward profile

The risk category is based on the rate the fund's value has moved up and down in the past and has increased from the prior year.

The fund's value can be influenced by changes in stock market prices, currencies and interest rates which can be affected by factors such as political and economic events.

This risk category is calculated in line with European Securities Markets Authority (ESMA) rules using historical data.

This is not a guarantee and may not be a reliable indication of the fund's future risk and reward category.

A fund in the lowest category does not mean a 'risk free' investment.

A fuller explanation of the risk and reward profile and how it can move up and down based on the market volatility, is contained in the fund's Key Investor Information Document (KIID). KIIDs are available at [www.wesleyan.co.uk/fund-prices](http://www.wesleyan.co.uk/fund-prices)

**More information about fund performance, including benchmarks and comparisons, can be found later in this report.**

<sup>1</sup> Transaction costs include dealing costs, broker commission, stamp duty and other explicit investment costs.

<sup>2</sup> The composite benchmark comprises of indices set out in the investment objective and policy for the fund on page 40.

<sup>3</sup> Fund benchmarking began on 01.02.2020. As a result, comparative data for the full accounting year was not available.

Past performance is not a guide to future performance. The price of units and distributions credited may go down as well as up. Investments in unit trusts should normally be regarded as long-term investments.

Group 2	0.1146	0.3087	0.4233	0.5941

### Corporate unitholders information

For corporate unitholders all of the income relating to the distribution is 100% franked.

### Equalisation

Many funds receive dividends from the companies they invest in. These payments are added to the fund's cash reserve. As this reserve grows, so does the fund's net asset value, which in turn increases the offer price for the fund's units.

At the point of the fund's next dividend payment date, these dividends are paid out to the fund's unitholders and no longer form part of the fund's cash reserve. This usually causes the unit price of the fund to fall.

Group 1 and 2 (see top of the page for dates) unitholders receive the same dividend amount per unit. Group 1 payments entirely comprise of income and therefore Equalisation does not apply to this group.

Group 2 payments take into account two components as they are between two dividend dates. Part of the payment for Group 2 unitholders comes from the income that accumulated from the date of unit purchase. The second part comes from partial returns on units that were bought at a higher price when the cash reserve grew. This is known as capital repayment. It is not liable to Income Tax but must be deducted from the cost of the shares for Capital Gains Tax purposes.

# WESLEYAN MODERATE RISK / REWARD GROWTH FUND

## FUND REVIEW

This is the half-year report for the Wesleyan Moderate Risk/Reward Growth Fund covering the period from 1 July to 31 December 2020. The fund delivered a return after charges of 8.3%\* compared to the benchmark that delivered a return of 6.3%\*\*.

Following an incredibly challenging start to 2020, as the COVID-19 pandemic shuttered economies and sent global equity markets into freefall, an absence of economic improvements during the summer months meant that stock markets began to drift steadily lower. However, the last two months of the calendar year delivered encouraging news on a few crucial fronts, providing a glimpse of a much sought-after pathway to sustainable economic recovery.

Firstly, the closely contested US Presidential election, held on 3 November, eventually revealed that Democrat candidates Joe Biden and Kamala Harris were the projected winners. The improving clarity on the US political landscape was quickly eclipsed by the news of a viable vaccine following trial data from a collaboration between Pfizer & BioNTech, and financial markets quickly sought to price-in what this could mean for the global economy.

Hard-hit sectors such as leisure, energy and financial services, which suffered during the sell-off earlier in the year, began to rebound as optimism continued to grow. December also provided us with an early piece of festive good news, as the seemingly never-ending

Brexit negotiations finally concluded with the UK and EU clinching a trade agreement.

During the reporting period, the fund maintained a preference for long-term growth assets, choosing to make several purchases as stock market valuations declined. Purchases of St. Modwen Properties, Taylor Wimpey and Vistry are examples of where the fund has sought to increase its exposure to the UK residential property market. The fund exited its position in Hammerson, a commercial property owner, due to concerns regarding the financial strength of the company.

Well-timed purchases in insurer Aviva, specialist investment company Merian Chrysalis, recruiter Hays and engineering firm Melrose Industries have all contributed encouraging gains. A selection of corporate and government bond purchases were also made during the period, ensuring the fund maintained an appropriate balance of asset classes. The preference has been to make purchases in a range of shorter-dated bonds, which have relatively shorter time periods until their scheduled maturity.

The full list of portfolio holdings can be found later in this report.

## FUND OUTLOOK

Financial markets began 2021 cautiously, faced with the prospect of new virus strains on top of the already devastating impact of COVID-19 on the global community. The reimposition of lockdowns, following spikes

in transmissions, infections and deaths, have undoubtedly been a short-term setback.

However, this is set against a backdrop of a vaccination programme, gradually declining hospitalisations and a growing number of viable vaccines which will hopefully address concerns about variant strains.

Although financial markets are likely to be accompanied by volatility, with many nations rolling out vaccination programmes it seems likely that a gradual return to normality is on the horizon. Growth assets, such as equities, should benefit from this if consumer confidence recovers and increased spending facilitates a recovery in some of the hardest-hit sectors of the global economy.

With our long-term lens, we continue to see little value in government bonds when yields are at historically low levels. Inflationary pressures could even be rekindled if economic growth gains traction during 2021, especially if there is tightness in supply chains and friction in global trade routes. We remain cautiously optimistic that lockdown measures can eventually contain the recent virus infection wave – buying sufficient time for mass vaccinations. This scenario should be favourable for our fund positioning, although potential bouts of volatility, including any COVID-related setbacks, will require investors to maintain patience and a long-term view during these uncertain times.

\* Fund shown is the X-Class Accumulation series, bid prices at the end of the day. Performance of all unit series are available on pages 70-73.

\*\* The composite benchmark is composed as follows: 40% UK FTSE All Share - Total Return, 12.5% FTSE Developed ex UK - Total Return, 2.5% FTSE Emerging Markets - Total Return, 20% FTSE Actuaries UK Conventional Bonds Gilts All Stocks - Total Return, 20% iBoxx £ Corporates - Total Return Indices and 5% SONIA interest rate benchmark. The benchmark is rebalanced annually on 1 January, and makes no allowances for taxes, fees and charges.

# WESLEYAN MODERATE RISK / REWARD GROWTH FUND continued

## GENERAL INFORMATION

### Investment objective and policy

The fund aims to provide capital growth over a period of at least five years. We measure the success of the fund as outperforming a benchmark over a rolling 5-year period. We do this by comparing the investment performance, before fees and charges, to a composite benchmark which reflects the current risk rating of the fund.

The composite benchmark is composed as follows: 40% UK FTSE All Share - Total Return, 12.5% FTSE Developed ex UK - Total Return, 2.5% FTSE Emerging Markets - Total Return, 20% FTSE Actuaries UK Conventional Bonds Gilts All Stocks - Total Return, 20% iBoxx £ Corporates - Total Return Indices and 5% SONIA interest rate benchmark. Invested capital is however at risk and there is no guarantee that the objective will be attained over this or any period.

The Fund will invest predominantly in a diversified portfolio of UK and international equities, government bonds, corporate bonds and cash. Investments will be made across various sectors and may include companies anywhere in the world.

The Fund may also invest in other fixed interest and transferable securities, near cash, deposits and money-market instruments and other collective investment schemes. More than 35% of the Fund may be invested in government and public securities issued by or on behalf of or guaranteed by the Government of the United Kingdom.

The Fund may use derivatives for the purposes of efficient portfolio management.

### Risk and reward profile

The risk category is based on the rate the fund's value has moved up and down in the past and has remained unchanged from the prior year. The fund's value can be influenced by changes in stock market prices, currencies and interest rates which can be affected by factors such as political and economic events.

This risk category is calculated in line with European Securities Markets Authority (ESMA) rules using historical data.

This is not a guarantee and may not be a reliable indication of the fund's future risk and reward category.

A fund in the lowest category does not mean a 'risk free' investment.

A fuller explanation of the risk and reward profile and how it can move up and down based on the market volatility, is contained in the fund's Key Investor Information Document (KIID). KIIDs are available at [www.wesleyan.co.uk/fund-prices](http://www.wesleyan.co.uk/fund-prices)

**More information about fund performance, including benchmarks and comparisons, can be found later in this report.**

Group 2	0.0822	0.3906	0.4728	0.8127

### Corporate unitholders information (Unaudited)

For corporate unitholders all of the income relating to the distribution is 100% franked.

#### Equalisation

Many funds receive dividends from the companies they invest in. These payments are added to the fund's cash reserve. As this reserve grows, so does the fund's net asset value, which in turn increases the offer price for the fund's units.

At the point of the fund's next dividend payment date, these dividends are paid out to the fund's unitholders and no longer form part of the fund's cash reserve. This usually causes the unit price of the fund to fall.

Group 1 and 2 (see top of the page for dates) unitholders receive the same dividend amount per unit. Group 1 payments entirely comprise of income and therefore Equalisation does not apply to this group.

Group 2 payments take into account two components as they are between two dividend dates. Part of the payment for Group 2 unitholders comes from the income that accumulated from the date of unit purchase. The second part comes from partial returns on units that were bought at a higher price when the cash reserve grew. This is known as capital repayment. It is not liable to Income Tax but must be deducted from the cost of the shares for Capital Gains Tax purposes.

# WESLEYAN RISK AVERSE FUND

## FUND REVIEW

This is the half-year report for the Wesleyan Risk Averse Fund covering the period from 1 July 2020 to 31 December 2020. The fund delivered a return after charges of 0.2%\* compared to the benchmark that delivered a return of -0.1%\*\*.

As the world tried to get to grips with the COVID-19 pandemic, markets remained volatile during the six-month period. During this time, amongst multiple economic data announcements, which were often difficult to predict, there were three key events that impacted markets.

Firstly, at the start of November there was a decisive result in the US Presidential election. Whilst the result was not immediately clear-cut, the early signs were pointing to a victory led by Democrat Joe Biden, with the possibility of a split between control of the Senate and the House of Representatives. This was a near-perfect outcome for financial markets – they reasonably expected increased stimulus from the new US President, without the same fears of an even higher government debt pile, which could have been the case with a different election outcome.

Secondly, a few days after the US election result, pharmaceutical companies Pfizer & BioNTech announced that the vaccine they had been testing for COVID-19 showed 90% efficacy. Not only was the announcement of a working vaccine highly positive for the entire world, the level of efficacy was much higher than had been hoped for. This announcement was followed later in November by similar positive vaccine news from trials conducted by Moderna and the AstraZeneca/Oxford University joint venture.

Finally, on Christmas Eve, the outline of a trade deal between the EU and the UK was announced, over four years after the UK voted to leave. It had been much delayed and did not include some important areas to the UK economy such as financial services, but it represented good progress. Once ratified by both the British parliament and EU sovereign nations, it allowed 2021 to start with companies having a clearer idea of how they would conduct trade with EU-based suppliers and customers.

These three major events led to rallies in equity markets and falls in bond prices. With the fund being predominantly positioned in short-dated bonds the downside effect was limited on unitholders compared to those funds invested in longer-dated bonds.

From summer onwards, there was speculation about the possibility of negative interest rates in the UK. Short-dated UK government bonds (gilts) traded on negative redemption yields throughout this reporting period, reflecting the possibility of a negative bank rate.

The fund's return over the six-month period was only marginally positive at 0.2% but it was well ahead of the average fund in the sector, which produced a return of -1.02%.

The fund's outperformance of the sector is the type of result that unitholders should expect in these market conditions, with the Wesleyan Risk Averse Fund being positioned mainly in short-dated gilts with an average duration of around five years. When yields fall the fund is likely to underperform competitors, because in such a scenario long-dated gilts outperform shorter-dated ones. The situation is reversed when interest rates rise. We expect that, by being

positioned in this manner, unitholders will see a more consistent level of return and not experience the potentially large fluctuations that could occur by investing in longer-dated gilts.

The full list of portfolio holdings can be found later in this report.

## FUND OUTLOOK

We expect interest rates to remain at low levels for some time. The reduction in the Bank of England base rate of interest to 0.1% on 19 March 2020 looks unlikely to be reversed until the economy shows the strength to withstand higher rates. The extent to which the UK economy has suffered and how long it will take for it to recover should not be underestimated.

Retreats of 3% and nearly 19% in Gross Domestic Product (GDP) in the first two calendar quarters of 2020 show the extent of the decline in economic activity. The 16% third quarter recovery reflected a degree of pent-up demand, although once a form of normality returns to our economy there will be a number of companies that will either have to right-size their business by cutting jobs or no longer be able to operate.

We expect interest rates to remain at low levels for the foreseeable future, to support the economy. Future returns to unitholders are likely to be low, but we will try to add value by selectively trading in and out of gilts of different durations. Our focus is on trying to provide a return in excess of that which unitholders could earn on cash deposits, rather than investing in longer-dated gilts where there is more price volatility.

\* Fund shown is the X-Class Accumulation series, bid prices at the end of the day. Performance of all unit series are available on pages 81-82.

\*\* The composite benchmark is composed as follows: 90% FTSE Actuaries UK Conventional Bonds Gilts All Stocks – Total Return, 5% FTSE Actuaries UK-Index Linked Gilts All Stocks – Total Return Indices and 5% SONIA interest rate benchmark. The benchmark is rebalanced annually on 1 January, and makes no allowances for taxes, fees and charges.

## GENERAL INFORMATION

### Investment objective and policy

The fund aims to provide capital growth over a period of at least five years. We measure the success of the fund as outperforming a benchmark over a rolling 5- year period. We do this by comparing the investment performance, before fees and charges, to a composite benchmark which reflects the current risk rating of the fund.

The composite benchmark is composed as follows: 90% FTSE Actuaries UK Conventional Bonds Gilts All Stocks - Total Return, 5% FTSE Actuaries UK-Index Linked Gilts All Stocks - Total Return Indices and 5% SONIA interest rate benchmark. Invested capital is however at risk and there is no guarantee that the objective will be attained over this or any period.

The Fund will invest predominantly through Sterling denominated (or hedged back to Sterling) government backed securities, with a rating the same or higher than that of the UK, with at least 80% invested in UK government securities (Gilts).

The Fund may also invest in other fixed interest and transferable securities, near cash, deposits, money-market instruments and other collective investment schemes.

More than 35% of the Fund may be invested in government and public securities issued by or on behalf of or guaranteed by the Government of the United Kingdom.

### Risk and reward profile

The risk category is based on the rate the fund's value has moved up and down in the past and has remained unchanged from the prior year.

The fund's value can be influenced by changes in stock market prices, currencies and interest rates which can be affected by factors such as political and economic events.

This risk category is calculated in line with European Securities Markets Authority (ESMA) rules using historical data.

This is not a guarantee and may not be a reliable indication of the fund's future risk and reward category.

A fund in the lowest category does not mean a 'risk free' investment.

A fuller explanation of the risk and reward profile and how it can move up and down based on the market volatility, is contained in the fund's Key Investor Information Document (KIID). KIIDs are available at [www.wesleyan.co.uk/fund-prices](http://www.wesleyan.co.uk/fund-prices)

**More information about fund performance, including benchmarks and comparisons, can be found later in this report.**

## UNAUDITED DISTRIBUTIONS for the period ended 31 December 2020

### Distribution tables (pence per unit)

#### Interim

Group 1: units purchased prior to 1 July 2020.

Group 2: units purchased on or after 1 July 2020 and or before 31 December 2020.

Class A Accumulation Units	Net Income	Equalisation	Accumulated 26 February 2021	Accumulated 28 February 2020
Group 1	0.5776	-	0.5776	0.7279
Group 2	0.3321	0.2455	0.5776	0.7279

Class B Accumulation Units	Net Income	Equalisation	Accumulated 26 February 2021	Accumulated 28 February 2020
Group 1	0.1177	-	0.1177	0.2226
Group 2	0.0239	0.0938	0.1177	0.2226

Class X Accumulation Units	Net Income	Equalisation	Accumulated 26 February 2021	Accumulated 28 February 2020
Group 1	0.3872	-	0.3872	0.4879
Group 2	0.1971	0.1901	0.3872	0.4879

### Corporate unitholders information

For corporate unitholders all of the income relating to the distribution is 100% Unfranked.

### Equalisation

Many funds receive dividends from the companies they invest in. These payments are added to the fund's cash reserve. As this reserve grows, so does the fund's net asset value, which in turn increases the offer price for the fund's units.

At the point of the fund's next dividend payment date, these dividends are paid out to the fund's unitholders and no longer form part of the fund's cash reserve. This usually causes the unit price of the fund to fall.

Group 1 and 2 (see top of the page for dates) unitholders receive the same dividend amount per unit. Group 1 payments entirely comprise of income and therefore Equalisation does not apply to this group.

Group 2 payments take into account two components as they are between two dividend dates. Part of the payment for Group 2 unitholders comes from the income that accumulated from the date of unit purchase. The second part comes from partial returns on units that were bought at a higher price when the cash reserve grew. This is known as capital repayment. It is not liable to Income Tax but must be deducted from the cost of the shares for Capital Gains Tax purposes.

## WESLEYAN UK GROWTH FUND

### FUND REVIEW

This is the half-year report for the Wesleyan UK Growth Fund covering the period from 1 July 2020 to 31 December 2020. The fund delivered a return after charges of 11.1%\* compared to the benchmark that delivered a return before taxes and charges of 8.8%\*\*.

During summer 2020, UK economic activity displayed encouraging signs of recovery as government schemes, such as the 'Eat Out to Help Out' initiative and a VAT cut for the leisure sector, reignited consumer optimism. However, these measures proved to be temporary boosts and the UK stock market drifted lower until November, as investors wrestled with the uncertainty of stalling Brexit negotiations and the reintroduction of regional lockdown measures due to increasing infection rates. The UK economy was relatively resilient in the last six months of 2020, although the significant decline in economic activity earlier in the year will initially leave the UK economy noticeably smaller than it was in 2019.

As infection rates began to climb during the final months of 2020, lockdowns were reintroduced. However, stock markets received a boost in November, following positive news regarding the development of an effective COVID-19 vaccine. Hard hit sectors, such as travel & leisure, quickly rallied to reflect this sense of newfound optimism, despite the growing second wave of infections.

From a political standpoint, the closely contested US Presidential election yielded a winner and calmed global markets. Additionally, the seemingly never-ending Brexit saga finally reached a finale before the end of the calendar year, providing much-needed relief and clarity regarding the future trading relationship between the UK and EU. This outcome will hopefully begin to address a key concern harboured by potential investors who may have previously avoided UK equities.

During the reporting period, a holding in the fund, RSA Group, recommended a takeover approach from rivals within the insurance sector. This provided a good opportunity for the UK Growth Fund to make an opportunistic sale to raise proceeds.

The strong performance of mining companies BHP Group and Rio Tinto also provided the fund with a chance to take profits from a sector which was one of the few bright spots in the UK stock market during 2020. Purchases were made in Galliford Try, St. Modwen Properties and Taylor Wimpey, with a view to gradually increase exposure in the UK residential property sector. The fund exited its position in Hammerson, due to the uncertainty surrounding the company's ability to withstand the tough retail environment and other challenges faced by large commercial property owners.

The full list of portfolio holdings can be found later in this report.

### FUND OUTLOOK

As we entered 2021, new strains of the virus started to become a greater cause for concern, with a rise in COVID-related infection rates, hospitalisations and deaths being a tragic reality. The roll-out of vaccinations, alongside existing lockdown measures, provides hope that the economy can gradually reopen.

Volatility will inevitably be with us on this journey. Concerns surrounding new strains of the virus, mounting government debt following stimulus packages, and elevated levels of unemployment will all need to be worked through to ensure we move forward on a sustainable footing.

UK equities have suffered, arguably disproportionately, in the face of the pandemic and geopolitical uncertainty. As a result, the valuation of the UK stock market continues to look attractive versus global peers and other asset classes. If COVID-19 concerns can be addressed, through a successful roll-out of effective vaccines, there is a logical case that consumer and corporate optimism can gradually return. In this scenario we would expect to see a return to growth in the profitability and dividend flows from our holdings, which we believe will underpin healthy returns for long-term investors in UK equities.

\* Fund shown is the X-Class Accumulation series, bid prices at the end of the day. Performance of all unit series are available on pages 93-94.

\*\* The composite benchmark is composed as follows: 95% FTSE All Share - Total Return Index, and 5% SONIA interest rate benchmark. The benchmark is rebalanced annually on 1 January, and makes no allowances for taxes, fees and charges.

## GENERAL INFORMATION

### Investment objective and policy

The fund aims to provide capital growth over a period of at least five years. We measure the success of the fund as outperforming a benchmark over a rolling 5-year period. We do this by comparing the investment performance, before fees and charges, to a composite benchmark which reflects the current risk rating of the fund.

The composite benchmark is composed as follows: 95% FTSE All Share - Total Return Index, and 5% SONIA interest rate benchmark. Invested capital is however at risk and there is no guarantee that the objective will be attained over this or any period.

The Fund will invest predominantly in a diversified portfolio of UK equities. Under normal circumstances the emphasis will be on equity shares in the UK. The Fund may invest in various sectors.

The Fund may also invest in fixed interest and other transferable securities (including non-UK equities), cash, near cash, deposits, money-market instruments and other collective investment schemes.

The Fund may use derivatives for the purposes of efficient portfolio management.

### Risk and reward profile

The risk category is based on the rate the fund’s value has moved up and down in the past and has increased from the prior year.

The fund’s value can be influenced by changes in stock market prices, currencies and interest rates which can be affected by factors such as political and economic events.

This risk category is calculated in line with European Securities Markets Authority (ESMA) rules using historical data.

This is not a guarantee and may not be a reliable indication of the fund’s future risk and reward category.

A fund in the lowest category does not mean a ‘risk free’ investment.

A fuller explanation of the risk and reward profile and how it can move up and down based on the market volatility, is contained in the fund’s Key Investor Information Document (KIID). KIIDs are available at [www.wesleyan.co.uk/fund-prices](http://www.wesleyan.co.uk/fund-prices)

**More information about fund performance, including benchmarks and comparisons, can be found later in this report.**

**J. Needham**  
Chief Executive Officer

## UNAUDITED DISTRIBUTIONS for the period ended 31 December 2020

### Distribution tables (pence per unit)

#### Interim

Group 1: units purchased prior to 1 July 2020.

Group 2: units purchased on or after 1 July 2020 and or before 31 December 2020.

Class A Accumulation Units	Net Income	Equalisation	Accumulated 26 February 2021	Accumulated 28 February 2020
Group 1	2.6914	-	2.6914	6.2499
Group 2	1.4360	1.2554	2.6914	6.2499

Class B Accumulation Units	Net Income	Equalisation	Accumulated 26 February 2021	Accumulated 28 February 2020
Group 1	2.1603	-	2.1603	5.4847
Group 2	0.8759	1.2844	2.1603	5.4847

Class X Accumulation Units	Net Income	Equalisation	Accumulated 26 February 2021	Accumulated 28 February 2020
Group 1	3.1054	-	3.1054	6.6720
Group 2	1.0579	2.0475	3.1054	6.6720

### Corporate unitholders information

For corporate unitholders all of the Income relating to the distribution is 100% franked.

### Equalisation

Many funds receive dividends from the companies they invest in. These payments are added to the fund's cash reserve. As this reserve grows, so does the fund's net asset value, which in turn increases the offer price for the fund's units.

At the point of the fund's next dividend payment date, these dividends are paid out to the fund's unitholders and no longer form part of the fund's cash reserve. This usually causes the unit price of the fund to fall.

Group 1 and 2 (see top of the page for dates) unitholders receive the same dividend amount per unit. Group 1 payments entirely comprise of income and therefore Equalisation does not apply to this group.

Group 2 payments take into account two components as they are between two dividend dates. Part of the payment for Group 2 unitholders comes from the income that accumulated from the date of unit purchase. The second part comes from partial returns on units that were bought at a higher price when the cash reserve grew. This is known as capital repayment. It is not liable to Income Tax but must be deducted from the cost of the shares for Capital Gains Tax purposes.

# NOTES TO THE TRUST'S FINANCIAL STATEMENTS

These are the unaudited interim accounts of the Trust and the funds within for the period ended 31 December 2020. Disclosed below is the basis of preparation for the unaudited interim accounts.

## ACCOUNTING POLICIES

---

### 1. Basis of preparation

The financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments, in compliance with the Financial Conduct Authority's Collective Investments Schemes sourcebook. They have been prepared in accordance with applicable UK accounting standards, Trust Deed and in accordance with FRS 102 and in accordance with the Statement of Recommended Practice for Financial Statements of UK Authorised Funds issued by the Investment Association in May 2014 (the 2014 SORP) and amended in June 2017. Unless otherwise stated all accounting policies are consistent with those of the prior year.

These financial statements are prepared on a going concern basis. The Manager has made an assessment of the Funds' ability to continue as a going concern, and is satisfied it has the resources to continue in business for the foreseeable future and is not aware of any material uncertainties that may cast significant doubt on this assessment.

### 2. Taxation

The charge for taxation is based on the results for the year. In general, the tax accounting treatment follows that of the original amount. Deferred tax is provided on all timing differences that have originated but not reversed at the balance sheet date other than those recorded as permanent differences.

Deferred tax is provided at the average rate of tax expected to apply.

Deferred tax assets and liabilities are not discounted to reflect the time value of money.

Note that deferred tax assets are recognised only to the extent they are regarded as recoverable.
