

WESLEYAN

we are all about you

WESLEYAN AUTHORISED UNIT TRUST

HALF YEAR FUND MANAGER REPORT
31 December 2022

DIRECTORS

JAMES NEEDHAM MBA, FIA
CHIEF EXECUTIVE OFFICER
WESLEYAN UNIT TRUST MANAGERS

On 26 February 2020, James was appointed Chief Executive Officer to the Board of Wesleyan Unit Trust Managers.

James has 20 years' actuarial experience; he joined Wesleyan in 2010 and became Chief Actuary in 2018. He is responsible for Wesleyan's actuarial and financial reporting activity and oversees the Society's product development and performance, identifying ways to improve customer outcomes. He is a financial reporting expert and has presented at a number of actuarial conferences.

MARTIN LAWRENCE BSc, ASIP
DIRECTOR
WESLEYAN UNIT TRUST MANAGERS

On 21 April 2016, Martin was appointed to the Board of Wesleyan Unit Trust Managers as a Director.

Martin joined Wesleyan in 1995 as an Investment Analyst, after graduating from the University of Exeter with a degree in Mathematics, and he subsequently qualified as an Associate of the Chartered Financial Analyst (CFA) Society of the UK. He became a Fund Manager in 2001.

For 20 years, he managed several Wesleyan funds, including its multi-asset With Profits Fund. As Director of Investments at Wesleyan, Martin is responsible for overseeing the management of Wesleyan's funds and its award-winning, in-house Investments team.

NON-EXECUTIVE DIRECTOR

IAN MCCAIG
CHAIRMAN
WESLEYAN UNIT TRUST MANAGERS

On 11 December 2020, Ian was appointed as a Chairman to the Board of Wesleyan Unit Trust Managers.

Ian has been a member of Wesleyan Group's Board of Directors since 30 September 2019 and was appointed to the Society's Risk Committee. Ian has worked across a number of sectors, most recently as CEO of First Utility Ltd. He led the company through several years of successful transformation and significant growth before its acquisition by Shell at the end of 2017. Prior to that Ian was CEO of lastminute.com. Ian also serves on the Boards of M-Kopa Ltd, Seedrs Ltd, English Heritage and Festicket, of which he is Chair.

ANDREW NEDEN MA, FCA
NON-EXECUTIVE DIRECTOR
WESLEYAN UNIT TRUST MANAGERS

On 11 December 2019, Andrew was appointed as a Non-Executive Director to the Board of Wesleyan Unit Trust Managers.

Andrew has been a member of Wesleyan Group's Board of Directors since November 2014. Andrew worked for 30 years at KPMG, the global accountancy firm, including 18 years as a partner. His roles included Head of Financial Sector Transaction Services in the UK and Global Chief Operating Officer for Financial Services. Andrew also chairs Aetna Insurance Company Limited, is Vice-Chair at the Nottingham Building Society, and is a Non-Executive Director at ABC International Bank PLC.

FUND MANAGERS

JAMES HUBBARD BA, CFA
WESLEYAN INTERNATIONAL GROWTH FUND
WESLEYAN MODERATE-HIGH RISK/REWARD INCOME FUND

James joined Wesleyan as an Investment Analyst in January 2011. After graduating with an BA in Economics and Business from the University of Manchester he initially worked for a Corporate Bank in London. James is a CFA (Chartered Financial Analyst) charterholder and has been a Fund Manager since April 2016.

PAUL BURTON BSc, FIA
WESLEYAN LOW RISK/REWARD GROWTH FUND
WESLEYAN RISK AVERSE FUND

Paul has been the Fund Manager of Wesleyan's Low Risk Life and Pension funds since launch in January 2012. He has also managed the assets of the Wesleyan Staff Pension Scheme since 1998, and the Society's Non Profit Fund since 2012. He joined the Society in 1990, qualifying as an Actuary in 1998, working as an Investment Analyst in the preceding five years.

MARC O'SULLIVAN BSc, CFA
WESLEYAN MODERATE RISK/REWARD GROWTH FUND

Marc has been a Fund Manager since 2012, managing investments across a number of asset classes. Marc joined the Society as an Investment Analyst in 2003, having graduated from the University of Birmingham with a degree in Economics. Marc has been a CFA (Chartered Financial Analyst) charterholder since 2008.

CAROLINE VINCENT BA, ASIP
WESLEYAN UK GROWTH FUND

Caroline joined Wesleyan as a Fund Manager in 2022, with previous industry experience gained from several senior fund management roles at other investment houses. She holds a degree in Economics from Thames Valley University and is an Associate of the Chartered Financial Analyst (CFA) Society of the UK. Caroline specialises in equities, with experience spanning both emerging and developed markets.

CHIEF EXECUTIVE OFFICER'S STATEMENT

Since my last update in June 2022, the war in Ukraine has raged on with little respite. The effects of the conflict continued to cause big spikes in fuel prices and disruption to food security and supply chains across the world – pushing several non-industrialised countries further into food poverty.

In the UK, as with many parts of the globe, we continued to see the hardest squeeze on household budgets in decades. In the autumn, inflation was at 40-year highs and central banks reacted by continuing to raise interest rates. All this took place alongside upheaval and changes in the UK government's leadership, the likes of which no one could have predicted.

The one thing we know is that markets fear uncertainty and, as a consequence, all key assets suffered at this time, but none more so than bonds. UK government bonds (gilts) in particular nosedived following the announcement of the UK government's mini-Budget. The Bank of England was quick to step in; shaken by the drastic price drop, it proceeded to buy over £19bn of gilts in an unprecedented move. Back in government, turbulence ensued as Prime Minister Liz Truss was out after just 45 days in office, and then Rishi Sunak was in. This helped markets to regain some confidence.

It may seem hard to find the positives among the news stories. However, in the final three months of 2022, investment markets were generally showing clear signs of recovery. This was welcome news, given that, at the start of autumn, they were so badly knocked off course.

"We are long-term investors with an aim to outperform the markets over time."

THE IMPACT OF BONDS AND EQUITIES ON OUR FUNDS' PERFORMANCE

During the second half of 2022, the returns from fixed income assets in the UK were negative. However, while UK equities got off to a weak start, continuing the trend from earlier in the year, they started to gain positive performance ground as a result of the growing belief that inflation had reached its peak.

Our Fund Managers and Analysts had been mindful of the risk that central bank interest rate rises posed to fixed income assets, which helped with how our mixed-asset funds were positioned in the period. Our preference for equities over fixed income assets also gave some protection from all the market volatility. Our lower-risk funds, on the other hand, are required to hold more bonds. As a result, they were less protected. I know this would have been a concern for anyone invested in lower-risk funds, but this was a highly unusual, market-wide issue. Reassuringly, investors are unlikely to see such high levels of bond market volatility again for many years. It's also important to add that none of the bonds in our funds have stopped paying interest and we therefore expect them to deliver on the returns we originally anticipated, given time.

MARKET OUTLOOK AND OUR VIEW ON THE YEAR AHEAD

We know that 2023 is going to be challenging. For example, the war in Ukraine continues and inflation remains high.

Households have been reining in their spending, leading to a reduction in consumer demand. A UK recession is also looking likely, and the Office for Budget Responsibility expects that it will last longer than a year.

However, in more promising news, it's expected that interest rates will start to come down in the next year or so, once inflation really starts to fall – we'll be keeping a close eye on this.

At Wesleyan Unit Trust Managers, our Investments Team remains totally focused on the year ahead. If the events of 2022 have taught us anything, it's that we have to expect the unexpected. What we do know is that our Fund Managers and Analysts take worldwide geopolitical events, along with economic developments and a broad range of data, into consideration. They use their skills and expertise to buy out-of-favour assets for the long-term benefit of our funds, in line with our [sustainable investing approach](#). Hear more from our Fund Managers and their expectations for 2023, starting on page 9.

OUR PRODUCTS, FUNDS, AND COMMITMENT TO YOU

WUTM offers six funds, each with its own unique risk rating and objectives, to meet our customers' investment needs. These funds are: International Growth Fund (page 9), Low Risk/Reward Growth Fund (page 21), Moderate-High Risk/Reward Income Fund (page 41), Moderate Risk/Reward Growth Fund (page 59), Risk Averse Fund (page 81), and UK Growth Fund (page 90).

There are three WUTM products through which you can invest: a Unit Trust Investment Account, a Unit Trust Individual Savings Account (ISA), and a Unit Trust Junior ISA. Don't forget that you can look at your investment valuations in real time by using the WUTM online Investor Portal. It's easy to register and log in by visiting www.wesleyan.co.uk/wutm-online. Remember, there is no initial charge for customers who decide to take out our products online.

We are long-term investors with an aim to outperform the markets over time. But we are only able to do this because of the skills and expertise of our award-winning Investments Team. In recognition of this, the team was named **"Investment Team of the Year" (re/insurer) at the Insurance Asset Risk Awards 2023**. This is a tremendous achievement in the current climate, and I hope it gives you some comfort in knowing that your investments are in safe hands.

We will always have your best interests at heart when it comes to investing your money. Thank you for continuing to invest with Wesleyan Unit Trust Managers.

AUTHORISED FUND MANAGER REPORT

INTRODUCTION

This is the half year report of the Wesleyan Authorised Unit Trust ('Trust') for the period ended 31 December 2022.

The Trust is managed by Wesleyan Unit Trust Managers Limited ('Manager').

The Trust is an authorised unit trust in an umbrella form and was authorised by the Financial Conduct Authority (FCA) effective 4 September 2015. The Trust is classified under the Collective Investment Scheme Sourcebook ('COLL') as a collective investment scheme authorised under the UCITS Directive.

The Trust was established pursuant to a Trust Deed dated 4 September 2015 (as amended from time to time) made between the Manager and HSBC Bank Plc ('Trustee'). The Trust has an unlimited duration.

Details of the managers and advisers of the Trust are disclosed on page 103.

STRUCTURE OF THE TRUST

The Trust is structured as an umbrella unit trust, in that different funds may be established from time to time by the Manager with the approval of the FCA, the agreement of the Trustee and in accordance with the Trust Deed.

The assets of each fund will be treated as separate from those of every other fund and will be invested in accordance with the investment objective and investment policy applicable to that fund.

Each fund has a specific portfolio to which that fund's assets and liabilities are attributable. So far as the Unitholders are concerned, each fund is treated as a separate entity. Unitholders are not liable for the debts of the Trust or for any other fund.

Subject to the above, each fund will be charged with the liabilities, expenses, costs and charges of the Trust attributable to that fund, and within each fund charges will be allocated between classes in accordance with the terms of issue of units of those classes. Any assets, liabilities, expenses, costs or charges not attributable to a particular fund may be allocated by the Manager in a manner which it believes is fair to the unit holders generally. This will normally be pro rata to the Net Asset Value of the relevant funds.

The base currency of each fund is pounds Sterling.

As at 31 December 2022, the Trust comprised of the following funds:

Wesleyan International Growth Fund

Wesleyan Low Risk/Reward Growth Fund

Wesleyan Moderate-High Risk/Reward Income Fund

Wesleyan Moderate Risk/Reward Growth Fund

Wesleyan Risk Averse Fund

Wesleyan UK Growth Fund

All of the above funds are managed by the Manager. Details of other management and advisers of the funds are disclosed on page 103.

UNITS

The rights represented by units are those of a beneficial interest under the Trust. Several classes of units may be issued in respect of each fund.

Further classes of units may be established from time to time by the Manager with the approval of the FCA, the agreement of the Trustee and in accordance with the Trust Deed. On the introduction of any new class, a revised prospectus will be prepared, setting out the details of each class.

Units in the Trust are not currently listed on any investment exchange.

Holders of income units are entitled to be paid the distributable income attributed to such units on any relevant interim and/or annual income allocation dates. The Manager, at its discretion, may also permit unit holders to elect to reinvest any such distributable income instead of receiving payment. In this event, the income will be used to purchase additional units in the same fund.

Holders of Accumulation units are not entitled to be paid the income attributed to such units, but that income is automatically transferred to (and retained as part of) the capital assets of the relevant fund on the relevant interim and/or annual accounting dates. This is reflected in the price of an accumulation unit.

UNITS IN ISSUE

As at 31 December 2022, Accumulation ("Acc") and Income ("Inc") units are available in the following funds and in the following denominations and classes:

Fund Class	Unit Type	Base Currency	Launch Date	ISIN ¹
Wesleyan International Growth Fund				
Class A	Acc	GBP	03/06/16	GB00BYNYHT49
Class B	Acc	GBP	03/06/16	GB00BYNYHV60

Class B	Acc	GBP	03/06/16	GB00BYNYHR25
Class X	Acc	GBP	03/06/16	GB00BYNYHS32

¹ An International Securities Identification Number (ISIN) codes securities including stocks and bonds with unique identifiable numbers. They are in a consistent format so they can be tracked across markets worldwide and are often used by companies when looking to raise capital, whether that be debt or equity.

None of the above funds hold units in other funds of the Trust.

AUTHORISED FUND MANAGER REPORT continued

UNIT HOLDERS – TAXATION

The information below is a general guide based on current United Kingdom law and HM Revenue & Customs practice which are subject to change. It summarises the tax position of the funds and of direct personal investors who are United Kingdom residents and hold units as investments. This does not detail the tax treatment for corporate or trustee unit holders.

INCOME

The funds may pay dividend distributions (which will be automatically retained in the relevant fund in the case of accumulation units). There is currently a tax free dividend allowance. Dividends received above this allowance from investments not held within an Individual Savings Account are taxed at a rate that depends on the investor's income tax band.

INTEREST

Where a fund pays an interest distribution (which will be automatically retained in the fund in the case of accumulation units) this is gross of the basic rate of tax from 6 April 2016 for some people (depending on their tax bands).

There is currently a tax free Personal Savings Allowance (except for additional rate tax payers). Interest distributions received above this allowance from investments not held within an Individual Savings Account or Junior Individual Savings Account are taxed at a rate that depends on the investor's income tax band.

INCOME EQUALISATION

The first income allocation received by an investor after buying units may include an amount of income equalisation, which will be shown on the issued tax voucher. This is effectively a repayment of the income equalisation paid by the investor as part of the purchase price. It is a return of capital, is not taxable, and should be deducted from the acquisition cost of the units for capital gains tax purposes.

CAPITAL GAINS

Unit holders may be liable to pay capital gains tax on gains arising from the redemption, transfer or other disposal of units. The rate of tax, and available reliefs, will be as applicable from time to time. An exchange of units between classes within a fund is generally not treated as a disposal for this purpose.

Units in each of the funds may be held within Individual Savings Accounts and would be exempt from personal liability to income or capital gains tax. Unit holders who have invested in the funds through an Individual Savings Account or Junior Individual Savings Account should refer to the Key Features Document for further details of how it operates.

REPORTING DATES

The annual and interim accounting date of the Trust and the funds within are as below:

Annual accounting date: 30 June

Interim accounting date: 31 December

The following pages sets out for each of the funds within the Trust:

- ▶ Fund manager report
- ▶ Number of units in circulation and the net asset values per unit
- ▶ Annual financial statements

This annual report of the Trust and the funds within are available on our website (www.wesleyan.co.uk/about/reports-and-accounts). If you have any questions about the report, or if you would like to talk to us about your investments, you can call us on **0330 123 3813**. Lines are open Monday to Friday from 9.00am to 5.00pm.

WESLEYAN INTERNATIONAL GROWTH FUND

FUND REVIEW

This is the half-year report for the Wesleyan International Growth Fund covering the period from 1 July 2022 to 31 December 2022. The fund delivered a return after charges of 5.74%* over the period, compared to the benchmark that delivered a return of 3.43%**.

The fund's performance improved over the period following a disappointing prior year. Some of the companies that had previously detracted from fund performance were key drivers of positive performance in the period. The fund's lower exposure to US equities than the benchmark, particularly the technology sector, helped performance despite the continued outperformance of the energy sector, which the fund has limited exposure to.

The market landscape in the reporting period continued to be dominated by soaring inflation and the response of global central banks, attempting to moderate rising prices through raising interest rates at the fastest pace we have seen in recent history. This led to a broad consensus that it was largely inevitable that these actions would lead to a recession in 2023.

Global equity markets rose 3.6% in the six months to 31 December 2022. Unusually for the past decade, the US lagged with a return of 3.1%, whilst the UK (+5.1%) and Europe (+9.5%) were strong performers in the period, the latter reversing some dramatic underperformance in the prior six months. The emerging market index declined (-1.5%), but this masked a large spread between specific countries, with Brazil and India performing well compared to a weak equity market in China.

The largest contributors to the fund's performance were Novo Nordisk (healthcare) and LVMH (luxury goods) – two of the fund's top three holdings, which were both up over 20%. Other notable contributors included Oracle

(technology), Rio Tinto (mining), and Automatic Data Processing (payroll and HR services). The largest detractors were Meta (communication services), Microsoft (technology) and two French-listed gaming names: Ubisoft and BigBen Interactive, which suffered from disappointing results.

In the period, the fund added a new holding in Basic Fit (European gyms) and Worldline (payments). The fund exited positions in E.ON (energy and utilities) and Sylvamo (paper products).

The full list of portfolio holdings can be found later in this report.

FUND OUTLOOK

The equity market weakness last year was largely due to the fallout from the war in Ukraine, rising interest rates and a stalling economic recovery post COVID-19. This was visible through global company profit expectations declining. However, since the turn of the year, there has been a rebound in sentiment and, in fact, small upgrades to profit expectations. This has been helped by several factors including the re-opening of China's economy, slowing inflation rates – aided by falling energy and commodity prices – and stronger company earnings in the final months of 2022 than anticipated.

China operated under severe lockdown restrictions throughout 2022 but announced a pivot from its zero-COVID policy at year-end. This came after increasing public discontent about the government stance, meaning the nation chose to accept the health risks from rapidly spreading COVID cases. A sharp pick-up in activity is already visible in the early Chinese economic data and has fuelled optimism for the global growth outlook in 2023.

Some of the world's largest energy companies fail to meet our sustainability criteria, and not owning them has detracted from fund performance. Looking ahead, we expect the impact to be smaller as

energy prices, particularly in Europe, have declined considerably from their lofty 2022 levels. The mild winter weather and more efficient energy demand management has left European gas storages well supplied for 2023, despite continued sanctions on Russian imports. Elsewhere we have seen a broad easing of commodity prices from peak levels, which helps to bring down the rate of inflation and pave a path to a potentially more sustainable economic recovery.

While the global growth outlook has improved, buoyed by better-than-expected company profits and economic output, risks remain, and the overall outlook is fairly tepid. The recent bounce in equity markets could be too optimistic, especially as the effects of central bank policies, such as raising interest rates, are yet to be fully effective.

We anticipate choppiness in equity markets through the year, as the economic outlook fluctuates. We wouldn't be surprised to see periods of weakness, and therefore have allowed cash levels to grow modestly within the fund. However, the fund remains invested for the long term in companies we believe have resilient characteristics. We expect to continue adding to its emerging market holdings over time, but we also believe that European equities remain attractively valued. There are interesting US-based businesses that we would consider adding to the portfolio if we saw a reduction in company valuations or a decline in the valuation of the US dollar. Whilst we often remind ourselves of the importance of patience when it comes to investing, the mantra may be particularly appropriate this year.

* Fund shown is the X-Class Accumulation series, bid prices at the end of the day. Performance of all unit series are available on page 16.

** The composite benchmark is composed as follows: 95% FTSE All-World - Total Return Index, and 5% SONIA interest rate benchmark. The benchmark is rebalanced annually on 1 January, and makes no allowances for taxes, fees and charges.

WESLEYAN INTERNATIONAL GROWTH FUND continued

GENERAL INFORMATION

Investment objective and policy

The fund aims to provide capital growth over a period of at least five years. We measure the success of the fund as outperforming a benchmark over a rolling five-year period. We do this by comparing the investment performance, after fees and charges, to a composite benchmark which reflects the current risk rating of the fund. The benchmark is a target for the fund.

The composite benchmark is composed as follows: 95% FTSE All-World – Total Return Index, and 5% SONIA interest rate benchmark. The organisation decides which asset classes to invest in based on its investment policy and the specific objectives of each fund.

The Fund will invest predominantly in a diversified portfolio of equities. The equities in which the Fund invests may be issued by companies anywhere in the world.

The Fund may invest in various sectors. The Fund may also invest in fixed interest and other transferable securities, cash, near cash, deposits, money-market instruments and other collective investment schemes.

The Fund may use derivatives for the purpose of efficient portfolio management.

Risk and reward profile

The risk category is based on the rate the fund's value has moved up and down in the past and has remained unchanged from the prior year.

The fund's value can be influenced by changes in stock market prices, currencies and interest rates which can be affected by factors such as political and economic events.

This risk category is calculated in line with European Securities Markets Authority (ESMA) rules using historical data.

This is not a guarantee and may not be a reliable indication of the fund's future risk and reward category.

A fund in the lowest category does not mean a 'risk free' investment.

A fuller explanation of the risk and reward profile and how it can move up and down based on the market volatility, is contained in the fund's Key Investor Information Document (KIID). KIIDs are available at www.wesleyan.co.uk/fund-prices

More information about fund performance, including benchmarks and comparisons, can be found later in this report.

Interim

Group 1: units purchased prior to 1 July 2022

Group 2: units purchased on or after 1 July 2022 and on or before 31 December 2022

Class A Accumulation Units	Net Income	Equalisation	Accumulated 28 February 2023	Accumulated 28 February 2022
Group 1	-	-	-	-
Group 2	-	-	-	-

Class B Accumulation Units	Net Income	Equalisation	Accumulated 28 February 2023	Accumulated 28 February 2022
Group 1	-	-	-	-
Group 2	-	-	-	-

Class X Accumulation Units	Net Income	Equalisation	Accumulated 28 February 2023	Accumulated 28 February 2022
Group 1	0.0496	-	0.0496	-
Group 2	0.0203	0.0293	0.0496	-

Corporate unitholders information

For corporate unitholders all of the income relating to the distribution is 100% franked.

Equalisation

Group 1 and 2 (see top of the page for dates) unitholders receive the same dividend amount per unit. Group 1 payments entirely comprise of income and therefore Equalisation does not apply to this group.

Group 2 payments take into account two components as they are between two dividend dates. Part of the payment for Group 2 unitholders comes from the income that accumulated from the date of unit purchase. The second part comes from partial returns on units that were bought at a higher price when the cash reserve grew. This is known as capital repayment. It is not liable to Income Tax but must be deducted from the cost of the shares for Capital Gains Tax purposes.

WESLEYAN LOW RISK/ REWARD GROWTH FUND

FUND REVIEW

This is the half-year report for the Wesleyan Low Risk/Reward Growth Fund covering the period from 1 July 2022 to 31 December 2022. The fund delivered a return after charges of -4.29%* over the period, compared to the benchmark that delivered a return of -3.92%**.

The fund performed slightly behind its benchmark and unitholders have disappointingly received another negative return following the -7.74% of the last reporting year. There are, however, reasons to be optimistic for better future returns, with equity markets showing signs of recovery and bond yields standing much higher.

After a few eventful years, investors might have hoped for a calmer time in markets. We entered the reporting period with the ongoing conflict between Russia and Ukraine still dominating financial markets, with knock-on effects to supply chains contributing to higher global inflation.

The move 'up' in bond yields during the period was well underway, even before Liz Truss and her ill-fated mini-Budget caused a degree of panic in the UK government bond (gilt) market about the level of future government borrowing. Gilts set to mature in 10 years' time saw their yield peak at 4.5% in October, double the 2.25% yield at the start of July. Confidence then returned to markets with the appointment of Rishi Sunak as Prime Minister and yields started to slowly fall.

During the end-of-September turbulence, the fund purchased a short-dated gilt when yields were close to their 2022 high. Pleasingly, its value rose by more than 5% three months later.

In line with our expectations, equity asset classes performed significantly better than bonds during the six months. UK equities outperformed their global equivalent, with

a total return of over 5%. Although the fund remains heavily exposed to the UK, and maintained its preference for equities over bonds, this was not enough to compensate for the fund's allocation to bonds, which detracted from overall performance.

Our preference for corporate bonds over gilts contributed positively to performance, with corporate bonds outpacing gilts significantly (albeit still in the context of negative returns of -5% and -11% respectively). A shorter-dated bond portfolio compared to benchmark also helped relative performance as longer-dated bonds performed worse, as is typical during periods of rising interest rates.

During the period, we increased our exposure to overseas equities – though at a measured pace due to unfavourable exchange rates. In keeping with the established strategy of investing in good quality names during times of individual company weakness, the fund acquired shares in French energy equipment manufacturer Schneider Electric, which subsequently beat market expectations as they reported their third-quarter results.

Pleasingly, the fund saw gains in its international equity portfolio, including contributions from: coffee retailer Starbucks, construction equipment manufacturer Caterpillar, luxury fashion retailer LVMH, general retailer Walmart, and payments company Mastercard.

The full list of portfolio holdings can be found later in this report.

FUND OUTLOOK

The period ended with equity markets displaying optimism for the future. Whilst we still retain our general preference for equities over bonds, this call is less clear-cut following the rise in bond yields seen during 2022.

Financial markets are currently positioned for an economic 'soft landing' – the

expectation being that central banks will successfully curb inflation whilst avoiding a deep or protracted recession – which should bode well for the global economy and equity markets. Whilst a shallow recession is likely in the UK and many other economies during 2023, markets will look through this to signs of future economic growth.

It won't all be plain sailing and there are reasons for caution in the months ahead: unusually low unemployment rates, the global political landscape, and volatile energy markets all have the potential to ensure inflation remains stubbornly high for longer than expected.

It is notable that consumer financial conditions remain very fragile in places. In the UK, with many people's current fixed mortgage terms coming to an end and needing to be refinanced at higher rates, alongside the government stopping its support with energy bill costs, households could continue to be squeezed financially. In contrast, the end of lockdown measures in China could see a resurgence of consumer consumption from built-up savings (as witnessed in Western economies as they ended their lockdown restrictions). As a result, the pace of global growth, and in turn global equity markets, may be very uneven.

* Fund shown is the X-Class Accumulation series, bid prices at the end of the day. Performance of all unit series are available on page 34.

** The composite benchmark is composed as follows: 15% FTSE All-Share - Total Return, 15% FTSE Developed ex UK - Total Return, 32.5% FTSE Actuaries UK Conventional Gilts All Stocks – Total Return, 32.5% iBoxx £ Corporates – Total Return Indices and 5% SONIA interest rate benchmark. The benchmark is rebalanced annually on 1 January, and makes no allowances for taxes, fees and charges.

WESLEYAN LOW RISK / REWARD GROWTH FUND continued

GENERAL INFORMATION

Investment objective and policy

The fund aims to provide capital growth over a period of at least five years. We measure the success of the fund as outperforming a benchmark over a rolling five-year period. We do this by comparing the investment performance, after fees and charges, to a composite benchmark which reflects the current risk rating of the fund. The benchmark is a target for the fund.

From 1 July 2022, the composite benchmark is composed as follows: 15% FTSE All-Share Index, 15% FTSE Developed World ex UK Index, 32.5% FTSE Actuaries UK Conventional Gilts All Stocks Index, 32.5% iBoxx (Sterling) Corporates Index and 5% Sterling Overnight Index Average (SONIA) interest rate benchmark. The organisation decides which asset classes to invest in based on its investment policy and the specific objectives of each fund.

The Fund will invest predominantly in a diversified portfolio of government bonds, corporate bonds, UK and International equities and cash.

Investment will generally be made in sterling denominated assets but the Fund may at the Manager's discretion invest in non-sterling denominated assets.

The Fund may also invest in other fixed interest and transferable securities, near cash, deposits, money-market instruments and other collective investment schemes. More than 35% of the Fund may be invested in government and public securities issued by or on behalf of or guaranteed by the Government of the United Kingdom.

The Fund may use derivatives for the purposes of efficient portfolio management.

Risk and reward profile

The risk category is based on the rate the fund's value has moved up and down in the past and has remained unchanged from the prior year.

The fund's value can be influenced by changes in stock market prices, currencies and interest rates which can be affected by factors such as political and economic events.

This risk category is calculated in line with European Securities Markets Authority (ESMA) rules using historical data.

This is not a guarantee and may not be a reliable indication of the fund's future risk and reward category.

A fund in the lowest category does not mean a 'risk free' investment.

A fuller explanation of the risk and reward profile and how it can move up and down based on the market volatility, is contained in the fund's Key Investor Information Document (KIID). KIIDs are available at www.wesleyan.co.uk/fund-prices

More information about fund performance, including benchmarks and comparisons, can be found later in this report.

Group 2	0.3900	0.3351	0.7251	0.5327

Corporate unitholders information

For corporate unitholders all of the income relating to the distribution is 100% unfranked.

Equalisation

Group 1 and 2 (see top of the page for dates) unitholders receive the same dividend amount per unit. Group 1 payments entirely comprise of income and therefore Equalisation does not apply to this group.

Group 2 payments take into account two components as they are between two dividend dates. Part of the payment for Group 2 unitholders comes from the income that accumulated from the date of unit purchase. The second part comes from partial returns on units that were bought at a higher price when the cash reserve grew. This is known as capital repayment. It is not liable to Income Tax but must be deducted from the cost of the shares for Capital Gains Tax purposes.

WESLEYAN MODERATE-HIGH RISK / REWARD INCOME FUND

FUND REVIEW

This is the half-year report for the Wesleyan Moderate-High Risk/Reward Income Fund covering the period from 1 July 2022 to 31 December 2022. The fund delivered a return after charges of 1.74%*, compared to the benchmark that delivered a return of 1.59%** over the same period.

The period saw some dramatic moves in asset prices. Most notable was the weakness in the fixed income market, where UK government bonds finished down 11% and corporate bonds were down 5%. UK equities delivered a total return of just over 5%, outpacing both the rest of the developed world (+4%) and emerging markets (-1%). The six-month return figures mask some of the underlying volatility in markets. Fixed income assets declined to period lows in October during the short-tenured Liz Truss administration and mini-Budget in the UK, but they recovered by December.

Despite increased uncertainty, fixed income assets failed to offer their usual 'safe haven'. We saw significant interest rate increases from central banks around the globe, as their focus was on curbing the rate of inflation over maintaining economic growth. Therefore, at key points, equities and bonds fell in value together.

The fund modestly outperformed its benchmark in the period. The lower allocation to fixed income assets and positioning towards shorter-duration bonds helped performance. The higher-than-benchmark equity allocation also contributed to performance, particularly the weighting towards the UK market. However, returns were negatively impacted by some companies exposed to the consumer and having lower exposure to the energy sector than the benchmark.

The largest contributors to the fund's performance were Novo Nordisk (healthcare), Unilever (consumer goods), BP (oil and gas) and Elementis (industrials). The biggest detractors included GlaxoSmithKline (pharmaceuticals), which faced litigation

risks, and Future (marketing) due to declines in expected advertising spend. Other detractors included Gym Group (leisure) and Ubisoft (gaming).

In the reporting period, the fund purchased several new holdings and added to existing positions, particularly within the fund's overseas equities. We added positions in Alphabet (Google's parent company), after a considerable decline in the share price, and Saint Gobain, a France-based construction and materials group. The fund also acquired shares in TotalEnergies (oil and gas), Merck KGaA (healthcare), Deutsche Post (logistics) and Walmart (retail). Despite the overseas focus, there were several top-ups of UK holdings. The largest single addition was a new holding in Genus, a healthcare business focused on agriculture and nutrition. Over the period we received funds from the takeover of Euromoney (B2B communications) and sold our position in Marston's (pub company). We also trimmed our position in Wilmington (information and training provider) after a period of strong performance and sold Micro Focus (software) after the company received a takeover bid.

Within the fixed income part of the portfolio, we felt the increase in yields available offered an attractive entry point and so we added to the fund's holdings in government bonds.

The full list of portfolio holdings can be found later in this report.

FUND OUTLOOK

Since the turn of the year, markets have responded optimistically, driven by better-than-expected economic data, the re-opening of the Chinese economy, and further evidence of falling inflation – such as the costs of energy, logistics and commodities generally declining.

A key driver of the optimism has come from an improving outlook in Europe. Economists started the year forecasting a protracted UK and European recession in 2023 and beyond,

but economic data has since come in better than expected and European energy prices have dropped.

China, having struggled with its zero-COVID policy, shifted stance in December 2022 to allow a relaxation of restrictions, amid public disquiet. This pivot helped improve growth expectations for 2023.

Despite these early positive indications, we are still cautious about the year ahead. We can see the drivers of the recent optimism, but we are also aware of the risks to the recently improved economic growth outlook. Energy and goods inflation has generally dropped, meaning the inflation rate should continue to decline over the coming months. Declines in inflation are less clear from the wages and the services-side of the economy, as demonstrated by public-sector strikes in the UK. Central banks are continuing to put the brakes on economic growth through monetary policy, such as raising interest rates, which historically takes one to two years to have an impact. This poses potential challenges to the spending power of companies and individuals for the next few years.

The fund should benefit from an economic recovery through its equity positioning, which is broadly in line with the benchmark, particularly with a skew towards medium- and smaller-sized businesses. Usually, you would expect a higher weighting towards equities, given our preference for equities over fixed income assets over the long term, so this positioning reflects our awareness of the risks in the coming year. In line with this thinking, the fund's cash allocation remains elevated and the fund is also positioned with a higher weighting to government bonds than it has been in the past few years. Government bonds offer more attractive yields than they have in the recent past and should offer a degree of protection.

* Fund shown is the X-Class Accumulation series, bid prices at the end of the day. Performance of all unit series are available on page 52.

** The composite benchmark is composed as follows: 37.5% FTSE All-Share - Total Return, 32.5% FTSE Developed ex UK - Total Return, 5% FTSE Emerging Markets - Total Return, 10% FTSE Actuaries UK Conventional Gilts All Stocks - Total Return, 10% iBoxx £ Corporates - Total Return Indices and 5% SONIA interest rate benchmark. The benchmark is rebalanced annually on 1 January, and makes no allowances for taxes, fees and charges.

GENERAL INFORMATION

Investment objective and policy

The fund aims to provide capital/income growth over a period of at least five years. We measure the success of the fund as outperforming a benchmark over a rolling five-year period. We do this by comparing the investment performance, after fees and charges, to a composite benchmark which reflects the current risk rating of the fund. The benchmark is a target for the fund.

From 1 July 2022, the composite benchmark is composed as follows: 37.5% FTSE All-Share Index, 32.5% FTSE Developed World ex-UK Index, 5% FTSE Emerging Markets Index, 10% FTSE Actuaries UK Conventional Gilts All Stocks Index, 10% iBoxx (Sterling) Corporates Index and 5% Sterling Overnight Index Average (SONIA) interest rate benchmark. The organisation decides which asset classes to invest in based on its investment policy and the specific objectives of each fund.

The Fund will invest in UK and international equities (largely dividend paying) with the remainder largely being invested in fixed interest securities.

The Fund may also invest in other transferable securities, cash, near cash, deposits, money-market instruments and other collective investment schemes.

More than 35% of the Fund may be invested in government and public securities issued by or on behalf of or guaranteed by the Government of the United Kingdom.

The Fund may use derivatives for the purpose of efficient portfolio management.

Risk and reward profile

The risk category is based on the rate the fund's value has moved up and down in the past and has remained unchanged from the prior year.

The fund's value can be influenced by changes in stock market prices, currencies and interest rates which can be affected by factors such as political and economic events.

This risk category is calculated in line with European Securities Markets Authority (ESMA) rules using historical data.

This is not a guarantee and may not be a reliable indication of the fund's future risk and reward category.

A fund in the lowest category does not mean a 'risk free' investment.

A fuller explanation of the risk and reward profile and how it can move up and down based on the market volatility, is contained in the fund's Key Investor Information Document (KIID). KIIDs are available at www.wesleyan.co.uk/fund-prices

More information about fund performance, including benchmarks and comparisons, can be found later in this report.

Corporate unitholders information

For corporate unitholders all of the income relating to the distribution is 100% franked.

Equalisation

Group 1 and 2 (see top of the page for dates) unitholders receive the same dividend amount per unit. Group 1 payments entirely comprise of income and therefore Equalisation does not apply to this group.

Group 2 payments take into account two components as they are between two dividend dates. Part of the payment for Group 2 unitholders comes from the income that accumulated from the date of unit purchase. The second part comes from partial returns on units that were bought at a higher price when the cash reserve grew. This is known as capital repayment. It is not liable to Income Tax but must be deducted from the cost of the shares for Capital Gains Tax purposes.

WESLEYAN MODERATE RISK/REWARD GROWTH FUND

FUND REVIEW

This is the half-year report for the Wesleyan Moderate Risk/Reward Growth Fund covering the period from 1 July 2022 to 31 December 2022. The fund delivered a return after charges of -0.11%* over the period, compared to the benchmark that delivered a return of -0.84%**.

Following a difficult first six months for most major asset classes, the second half of 2022 provided a more mixed backdrop. The UK stock market rose by almost 5%, marginally outperforming stock markets in other developed countries, whilst bond market returns were firmly negative – weighed down by rising interest rates. This was a reasonable backdrop for the fund, as its higher exposure to UK equities and lower exposure to the steep declines in bond markets resulted in the fund slightly outperforming its benchmark.

The period under review began in an encouraging manner, with strong equity returns in July, as several key economies were growing more strongly than expected and hopes began to rise that interest rates were approaching a peak. There was, however, political turmoil in the UK – as Prime Minister Johnson announced his resignation. Liz Truss was eventually appointed as his successor in early September, at a time when global inflation rates continued to move higher, alarming financial markets.

The incoming Truss government also put serious pressure on UK assets after a swathe of tax cuts and spending policies were announced, causing concern amongst investors about how these policies would be funded. In response, UK borrowing rates surged and the value of sterling plummeted to almost parity against the US dollar. At one point, the Bank of England had to reassure bond investors by pledging to buy £65bn of long-dated government bonds.

Liz Truss was eventually forced to step down after just 45 days in office and was ultimately replaced by Rishi Sunak. After replacing Kwasi Kwarteng as Chancellor, Jeremy Hunt promptly reversed the tax cuts announced by his predecessor, which soothed market concerns about the UK economy's future financial

health. Sterling also staged a recovery and UK government bonds rose in price, reflecting the market view that Jeremy Hunt would be a 'safer' pair of hands than the previous Chancellor.

November proved to be a strong month for global equities, as investors once again entertained the prospect that inflation would soon peak – signalling the end of the interest rate-hiking cycle. European energy prices declined in the face of a seasonably mild autumn and the prospect of a milder winter, providing much needed respite for consumers and businesses. Eurozone inflation also declined for the first time in 17 months, and by more than expected. A softening in tensions between the US and China was also viewed favourably by financial markets as they headed into the festive period. Equities with exposure to China posted strong gains, as hope that the country's economic reopening from COVID-19 lockdown measures would unleash pent-up consumer demand and restimulate its economy.

Bouts of weakness in share prices allowed the fund to make purchases in global names such as adidas, Adobe (software), Alphabet (communication services), BASF (chemicals), Disney, Meta (communication services) and Microsoft, helping to grow the fund's broader global exposure. Underperformance in emerging market stocks during October provided an opportunity for the fund to make several well-timed purchases in some investment trusts, to boost exposure to some of the world's fastest growing economies.

Given the fund's steady stream of bond maturities, corporate and government bond purchases were also made during the period, to ensure the fund retains an appropriate balance of asset classes. Coupled with this, the fallout from the UK's mini-Budget debacle – when interest rates surged higher – allowed the fund to buy several UK government bonds and corporate bonds at attractive valuations.

The full list of portfolio holdings can be found later in this report.

FUND OUTLOOK

Inflationary pressures are thankfully abating across the globe, giving consumers and businesses a much-needed opportunity to catch their breath following a period of rapid price rises. The market narrative is fixated on how quickly that trend will continue, which is a crucial debate because, since inflation has begun to cool, market expectations for interest rate increases have shifted significantly lower. In fact – markets are assuming that interest rates in the UK and US will peak at lower levels than previously thought, followed by rate cuts.

Markets have begun 2023 in an optimistic mood, with both bond and equity markets gaining value, reflecting the prospect of slowing inflation and lower interest rates on the horizon. Although this is welcome, we are alert that central banks remain fearful about reigniting inflationary pressures before they are confident the current wave of price increases has subsided. Falling borrowing costs, coupled with low unemployment, might combine to move the prices of goods and services higher, especially if demand remains higher than supply. The geopolitical backdrop also remains uncertain. As the Ukrainian army reclaims key regions, we, like many commentators, are still unsure about what Russia's ultimate aims are in this conflict, with escalation still a risk.

In the short term, we think there will be volatility ahead, as investors contend with a likely drop in global company earnings. As such, we are mindful that we have moved into a phase where markets are trying to place an 'appropriate' valuation at a time of declining corporate profits. As we digest incoming financial results from companies, and statements from central banks, we are working diligently to understand the type and depth of any recession we may have to navigate. Overlaying our 'contracyclical' investment stance and long-term lens, looking much further ahead than most other investors, we remain more positive on the longer-term returns we can generate from equities, and this underpins our conviction to make selective purchases in periods of market weakness like we saw last year.

* Fund shown is the X-Class Accumulation series, bid prices at the end of the day. Performance of all unit series are available on page 74.

** The composite benchmark is composed as follows: 27.5% UK FTSE All Share - Total Return, 25% FTSE Developed ex UK - Total Return, 2.5% FTSE Emerging Markets - Total Return, 20% FTSE Actuaries UK Conventional Gilts All Stocks - Total Return, 20% iBoxx £ Corporates - Total Return Indices and 5% SONIA interest rate benchmark. The benchmark is rebalanced annually on 1 January, and makes no allowances for taxes, fees and charges.

WESLEYAN MODERATE RISK / REWARD GROWTH FUND continued

GENERAL INFORMATION

Investment objective and policy

The fund aims to provide capital growth over a period of at least five years. We measure the success of the fund as outperforming a benchmark over a rolling five-year period. We do this by comparing the investment performance, after fees and charges, to a composite benchmark which reflects the current risk rating of the fund. The benchmark is a target for the fund.

From 1 July 2022, the composite benchmark is composed as follows: 27.5% FTSE All-Share Index, 25% FTSE Developed World ex-UK index, 2.5% FTSE Emerging Markets Index, 20% FTSE Actuaries UK Conventional Gilts All Stocks Index, 20% iBoxx (Sterling) Corporate Index and 5% Sterling Overnight Index Average (SONIA) interest rate benchmark. The organisation decides which asset classes to invest in based on its investment policy and the specific objectives of each fund.

The Fund will invest predominantly in a diversified portfolio of UK and international equities, government bonds, corporate bonds and cash. Investments will be made across various sectors and may include companies anywhere in the world.

The Fund may also invest in other fixed interest and transferable securities, near cash, deposits and money-market instruments and other collective investment schemes. More than 35% of the Fund may be invested in government and public securities issued by or on behalf of or guaranteed by the Government of the United Kingdom.

The Fund may use derivatives for the purposes of efficient portfolio management.

Risk and reward profile

The risk category is based on the rate the fund's value has moved up and down in the past and has remained unchanged from the prior year. The fund's value can be influenced by changes in stock market prices, currencies and interest rates which can be affected by factors such as political and economic events.

This risk category is calculated in line with European Securities Markets Authority (ESMA) rules using historical data.

This is not a guarantee and may not be a reliable indication of the fund's future risk and reward category.

A fund in the lowest category does not mean a 'risk free' investment.

A fuller explanation of the risk and reward profile and how it can move up and down based on the market volatility, is contained in the fund's Key Investor Information Document (KIID). KIIDs are available at www.wesleyan.co.uk/fund-prices

More information about fund performance, including benchmarks and comparisons, can be found later in this report.

Corporate unitholders information (Unaudited)

For corporate unitholders all of the income relating to the distribution is 100% franked.

Equalisation

Group 1 and 2 (see top of the page for dates) unitholders receive the same dividend amount per unit. Group 1 payments entirely comprise of income and therefore Equalisation does not apply to this group.

Group 2 payments take into account two components as they are between two dividend dates. Part of the payment for Group 2 unitholders comes from the income that accumulated from the date of unit purchase. The second part comes from partial returns on units that were bought at a higher price when the cash reserve grew. This is known as capital repayment. It is not liable to Income Tax but must be deducted from the cost of the shares for Capital Gains Tax purposes.

WESLEYAN RISK AVERSE FUND

FUND REVIEW

This is the half-year report for the Wesleyan Risk Averse Fund, covering the period from 1 July 2022 to 31 December 2022. The fund delivered a return after charges of -4.68%* over the period, compared to the benchmark that delivered a return of -3.75%**.

A negative return is not what unitholders would expect from a risk averse fund invested in short-dated UK government bonds (gilts), especially after a return of -5.50% in the previous accounting year. In addition, the fund is 0.93% behind its benchmark for the six-month period.

However, returns have improved from the market lows of mid-October. Furthermore, although recent performance has been disappointing, the fund has outperformed its benchmark by more than 3% over the previous two years.

Many of the themes in the first half of 2022 continued in the reporting period. Financial markets were heavily affected by the ongoing conflict in Ukraine and the prospect of a global recession, although the 'depth' of any recession was the subject of much debate. In addition, inflation remained at elevated levels, partly driven by soaring global energy and food prices. The standard central bank response to higher-than-expected inflation is to increase short-term interest rates – investors' expectations of further interest rate rises therefore led to higher gilt yields and lower prices.

As we moved into autumn, already-delicate financial markets were badly shaken by the September mini-Budget, which saw new Prime Minister Liz Truss set out plans for growing the UK economy. These measures included a number of unfunded tax cuts. Bond market investors reacted badly to these proposals, seeing a likelihood of high levels of gilt issuance, which in turn pushed yields higher.

At the height of this market turbulence, gilts set to mature in 10 years' time hit a

yield of 4.5%. This level was double the 2.25% at the start of July. A move of this scale was equivalent to a 17% price fall. The subsequent resignation of Liz Truss calmed markets as the arrival of a new Prime Minister, Rishi Sunak, seemed to steady the ship. As confidence slowly returned to the gilt market, yields started to fall but ended the period ahead of their end-of-June levels.

UK inflation, having peaked at 11.1% in October on the CPI measure, ended the period at a lower level but still above 10%. To put this into context, it should be remembered that the Bank of England's Monetary Policy Committee (MPC) is mandated to keep inflation within 1% of a central 2% target rate. In attempts to bring inflation down, the MPC increased interest rates on four occasions in the reporting period, taking the rate from 1.25% to 3.5%.

Rising bond yields – hence falling prices – were not just a UK phenomenon but affected global bond markets too. With the prices of long-dated gilts falling more than shorter-dated ones, we were content to keep the fund positioned in shorter-dated bonds. In the summer, to guard against the worst effects of high inflation, the fund acquired a short-dated index-linked gilt. In times of high inflation, index-linked bonds benefit from their interest and redemption payments increasing in line with inflation.

The full list of portfolio holdings can be found later in this report.

FUND OUTLOOK

We expect further interest rate rises to be announced by the MPC, taking the end-of-year 3.5% interest rate to between 4% and 4.5% during 2023, the peak depending on progress made in reducing UK inflation.

Once inflation is deemed to have been brought under control, there will be potential for rate decreases to follow. However, we do not see the bank rate (of interest) returning to the low levels of

'barely above zero' seen at the start of the COVID-19 pandemic. In reality, a long-term bank rate of around 3%, just above the 2% target inflation rate, would be a more 'normal' level for a stable economy. Whether the UK economy gets back to that state soon is a major question for investors – we have the situation of a looming recession, albeit probably a shallow one, whilst still seeing unemployment at very low levels. We do, however, expect the economic slowdown to contribute to growing levels of unemployment, as firms look to streamline their operations or, in some cases, cease trading.

When yields move upwards, as we saw in 2022, future cashflows from existing holdings are unaffected, but a rise in yields places a lower value on bonds because prices and yields are inversely related. The higher yields we are now seeing mean that future returns are likely to be higher than those expected at the start of the reporting period.

Whilst unitholders have seen a mid-single digit negative return in this six-month reporting period, there will be a recovery of losses for those who remain invested for the long term because, given time, returns will still come through in the future. Whilst this 'time-shifting' of returns does not help investors looking to disinvest in the shorter term, it should give comfort to longer-term investors.

* Fund shown is the X-Class Accumulation series, bid prices at the end of the day. Performance of all unit series are available on page 85.

** The composite benchmark is composed as follows: 85% FTSE Actuaries UK Conventional Gilts up to 5 Years – Total Return, 5% FTSE Actuaries UK Conventional Bonds Gilts over 15 Years – Total Return, 7.5% FTSE Actuaries UK Index Linked Government Bonds Gilts All Stocks – Total Return and 2.5% SONIA interest rate benchmark.

GENERAL INFORMATION

Investment objective and policy

The fund aims to provide capital growth over a period of at least five years. We measure the success of the fund as outperforming a benchmark over a rolling five-year period. We do this by comparing the investment performance, after fees and charges, to a composite benchmark which reflects the current risk rating of the fund. The benchmark is a target for the fund.

The composite benchmark is composed as follows: 85% FTSE Actuaries UK Conventional Gilts up to 5 years, 5% FTSE Actuaries UK Conventional Gilts over 15 years, 7.5% FTSE Actuaries UK Index Linked Government Bonds All Stocks – Total Return Index and 2.5% SONIA interest rate benchmark. The organisation decides which asset classes to invest in based on its investment policy and the specific objectives of each fund.

The Fund will invest predominantly through Sterling denominated (or hedged back to Sterling) government backed securities, with a rating the same or higher than that of the UK, with at least 80% invested in UK government securities (Gilts).

The Fund may also invest in other fixed interest and transferable securities, near cash, deposits, money-market instruments and other collective investment schemes.

More than 35% of the Fund may be invested in government and public securities issued by or on behalf of or guaranteed by the Government of the United Kingdom.

Risk and reward profile

The risk category is based on the rate the fund's value has moved up and down in the past and has remained unchanged from the prior year.

The fund's value can be influenced by changes in stock market prices, currencies and interest rates which can be affected by factors such as political and economic events.

This risk category is calculated in line with European Securities Markets Authority (ESMA) rules using historical data.

This is not a guarantee and may not be a reliable indication of the fund's future risk and reward category.

A fund in the lowest category does not mean a 'risk free' investment.

A fuller explanation of the risk and reward profile and how it can move up and down based on the market volatility, is contained in the fund's Key Investor Information Document (KIID). KIIDs are available at www.wesleyan.co.uk/fund-prices

More information about fund performance, including benchmarks and comparisons, can be found later in this report.

UNAUDITED DISTRIBUTIONS for the period ended 31 December 2022

Distribution tables (pence per unit)

Interim

Group 1: units purchased prior to 1 July 2022

Group 2: units purchased on or after 1 July 2022 and or before 31 December 2022

Class A Accumulation Units	Net Income	Equalisation	Accumulated 28 February 2023	Accumulated 28 February 2022
Group 1	0.5926	-	0.5926	0.5464
Group 2	0.3412	0.2514	0.5926	0.5464

Class B Accumulation Units	Net Income	Equalisation	Accumulated 28 February 2023	Accumulated 28 February 2022
Group 1	0.1502	-	0.1502	0.1009
Group 2	0.1182	0.0320	0.1502	0.1009

Class X Accumulation Units	Net Income	Equalisation	Accumulated 28 February 2023	Accumulated 28 February 2022
Group 1	0.3972	-	0.3972	0.3662
Group 2	0.1887	0.2085	0.3972	0.3662

Corporate unitholders information

For corporate unitholders all of the income relating to the distribution is 100% unfranked.

Equalisation

Group 1 and 2 (see top of the page for dates) unitholders receive the same dividend amount per unit. Group 1 payments entirely comprise of income and therefore Equalisation does not apply to this group.

Group 2 payments take into account two components as they are between two dividend dates.

Part of the payment for Group 2 unitholders comes from the income that accumulated from the date of unit purchase.

The second part comes from partial returns on units that were bought at a higher price when the cash reserve grew.

This is known as capital repayment. It is not liable to Income Tax but must be deducted from the cost of the shares for Capital Gains Tax purposes.

WESLEYAN UK GROWTH FUND

FUND REVIEW

This is the half-year report for the Wesleyan UK Growth Fund covering the period from 1 July 2022 to 31 December 2022. The fund delivered a return after charges of 3.16%* over the period, compared to the benchmark that delivered a return of 4.93%**.

The period in question saw the continuation of surging inflation, which was proven to be anything but transitory and took many – including US Federal Reserve Chair Jerome Powell – by surprise. Central banks were forced to continue with aggressive interest rate increases throughout the year, in a bid to control inflation. This led to spiking bond yields and added to market volatility. As inflation continued to rise sharply, economic growth started to slow, leaving many economies in a state known as stagflation.

Markets feared that central banks could raise interest rates 'too high, too quickly', which would have risked a hard landing and the greater likelihood of a deep global recession. As markets are forward-looking, they began to fall because of those same fears.

In the UK, the summer saw the start of a political drama that resulted in three Prime Ministers within three months. When Boris Johnson reluctantly resigned following a loss of the public's trust, Liz Truss was nominated as the new Prime Minister. Truss and her then Chancellor, Kwasi Kwarteng, announced a 'mini-Budget' which shook markets due to its proposals of unfunded tax cuts that would have led to even higher levels of UK debt. This caused bond prices to fall aggressively leading to a collapse in the pound (sterling) and falling equity prices; this was a new phenomenon where all three fell simultaneously. The aftermath saw UK 10-year bond yields soar and the pound fall close to parity with the US dollar. As a result, the Bank of England intervened and announced a temporary bond-buying programme to help bring a degree of stability back into the market.

After such a costly debacle, both Truss and Kwarteng were swiftly replaced by a new Chancellor, Jeremy Hunt, and new a Prime Minister, Rishi Sunak, and most of the mini-Budget's proposals were reversed. This helped to restore some calm in UK markets.

The chief detractors of the fund's performance were the telecoms company BT, communications firm Future, and house builder Persimmon. Glencore, the mining firm, and Flutter, the entertainment group, positively added to the benchmark's performance but, due to our Sustainable Investing Policy, we were not able to hold them.

We also added to our positions in banks Natwest and OSB, and Centrica the energy distributor. We took some profits in BHP, HSBC, Tate & Lyle, and Shell. We initiated new positions in Genus, a healthcare business focused on agriculture and nutrition, and Sage, the software company.

FUND OUTLOOK

Gas prices in Europe have fallen sharply during the last six months and this, coupled with a very mild winter, has resulted in a reduction in energy prices that has also helped to reduce global inflation. But the fear is that inflation has now spread to the services sector, which is harder to reduce, as these components, such as wages, are more embedded in the economy. Although inflation is modestly declining it may not fall fast enough and central banks could therefore continue to increase interest rates. Despite this, the International Monetary Fund believes that most major economies will grow this year, except the UK. This will require strong stock picking to avoid stocks most exposed to recessionary headwinds.

Data suggests that the jobs market is still relatively strong and household savings are still relatively high. To a large extent, this has enabled many consumers to continue

with their spending habits. This should allow resilient, consumer-related sectors to maintain their earnings. But many sectors, namely IT and manufacturing, for example, will start to see earnings fall, as the effects of inflation and dampening demand start to feed through.

China reversed its stringent zero-COVID policy in late 2022, and it is expected that its economy and markets will follow a similar 're-opening' path to other markets when their lockdowns ceased. This could result in strong demand in some sectors such as energy and materials but will add to inflationary pressure, leading to increased prices, as demand for some products increases.

We expect the UK market to continue to rebound in the short term but that volatility is a risk and the rally will slow as further evidence of an economic slow-down begins to be felt. The key question is: to what extent will the expected growth in China offset any recessionary factors in the UK? Either way, the UK will continue to be 'good value' relative to Europe and the US, as many stocks and sectors continue to trade on attractive valuations.

* Fund shown is the X-Class Accumulation series, bid prices at the end of the day. Performance of all unit series are available on page 97.

** The composite benchmark is composed as follows: 95% FTSE All Share – Total Return Index, and 5% SONIA interest rate benchmark. The benchmark is rebalanced annually on 1 January, and makes no allowances for taxes, fees and charges.

GENERAL INFORMATION

Investment objective and policy

The fund aims to provide capital growth over a period of at least five years. We measure the success of the fund as outperforming a benchmark over a rolling five-year period. We do this by comparing the investment performance, after fees and charges, to a composite benchmark which reflects the current risk rating of the fund. The benchmark is a target for the fund.

The composite benchmark is composed as follows: 95% FTSE All Share – Total Return Index, and 5% SONIA interest rate benchmark. The organisation decides which asset classes to invest in based on its investment policy and the specific objectives of each fund.

The Fund will invest predominantly in a diversified portfolio of UK equities. Under normal circumstances the emphasis will be on equity shares in the UK. The Fund may invest in various sectors.

The Fund may also invest in fixed interest and other transferable securities (including non-UK equities), cash, near cash, deposits, money-market instruments and other collective investment schemes.

The Fund may use derivatives for the purposes of efficient portfolio management.

Risk and reward profile

The risk category is based on the rate the fund’s value has moved up and down in the past and has remained unchanged from the prior year.

The fund’s value can be influenced by changes in stock market prices, currencies and interest rates which can be affected by factors such as political and economic events.

This risk category is calculated in line with European Securities Markets Authority (ESMA) rules using historical data.

This is not a guarantee and may not be a reliable indication of the fund’s future risk and reward category.

A fund in the lowest category does not mean a ‘risk free’ investment.

A fuller explanation of the risk and reward profile and how it can move up and down based on the market volatility, is contained in the fund’s Key Investor Information Document (KIID). KIIDs are available at www.wesleyan.co.uk/fund-prices

More information about fund performance, including benchmarks and comparisons, can be found later in this report.

J. Needham
Chief Executive Officer

UNAUDITED DISTRIBUTIONS for the period ended 31 December 2022

Distribution tables (pence per unit)

Interim

Group 1: units purchased prior to 1 July 2022

Group 2: units purchased on or after 1 July 2022 and or before 31 December 2022

Class A Accumulation Units	Net Income	Equalisation	Accumulated 28 February 2023	Accumulated 26 February 2022
Group 1	4.7271	-	4.7271	4.8814
Group 2	2.1706	2.5565	4.7271	4.8814

Class B Accumulation Units	Net Income	Equalisation	Accumulated 28 February 2023	Accumulated 26 February 2022
Group 1	4.0174	-	4.0174	4.1451
Group 2	1.2718	2.7456	4.0174	4.1451

Class X Accumulation Units	Net Income	Equalisation	Accumulated 28 February 2023	Accumulated 26 February 2022
Group 1	5.2302	-	5.2302	5.3681
Group 2	2.5850	2.6452	5.2302	5.3681

Corporate unitholders information

For corporate unitholders all of the income relating to the distribution is 100% franked.

Equalisation

Group 1 and 2 (see top of the page for dates) unitholders receive the same dividend amount per unit. Group 1 payments entirely comprise of income and therefore Equalisation does not apply to this group.

Group 2 payments take into account two components as they are between two dividend dates. Part of the payment for Group 2 unitholders comes from the income that accumulated from the date of unit purchase. The second part comes from partial returns on units that were bought at a higher price when the cash reserve grew. This is known as capital repayment. It is not liable to Income Tax but must be deducted from the cost of the shares for Capital Gains Tax purposes.

NOTES TO THE TRUST'S FINANCIAL STATEMENTS

These are the unaudited interim accounts of the Trust and the funds within for the period ended 31 December 2022. Disclosed below is the basis of preparation for the unaudited interim accounts.

ACCOUNTING POLICIES

1. Basis of preparation

The financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments, in compliance with the Financial Conduct Authority's Collective Investments Schemes sourcebook. They have been prepared in accordance with applicable UK accounting standards, Trust Deed and in accordance with FRS 102 and in accordance with the Statement of Recommended Practice for Financial Statements of UK Authorised Funds issued by the Investment Association in May 2014 (the 2014 SORP) and amended in June 2017. Unless otherwise stated all accounting policies are consistent with those of the prior year.

These financial statements are prepared on a going concern basis. The Manager has made an assessment of the Funds' ability to continue as a going concern, and is satisfied it has the resources to continue in business for the foreseeable future and is not aware of any material uncertainties that may cast significant doubt on this assessment.

2. Taxation

The charge for taxation is based on the results for the period. In general, the tax accounting treatment follows that of the original amount. Deferred tax is provided on all timing differences that have originated but not reversed at the balance sheet date other than those recorded as permanent differences.

Deferred tax is provided at the average rate of tax expected to apply.

Deferred tax assets and liabilities are not discounted to reflect the time value of money.

Note that deferred tax assets are recognised only to the extent they are regarded as recoverable.
