WESLEYAN AUTHORISED UNIT TRUST

ANNUAL FUND MANAGER REPORT
& AUDITED FINANCIAL STATEMENTS
30 JUNE 2020

DIRECTORS

AHMED FAROOQ BSc, ACMA, DIP IoD
CHAIRMAN
WESLEYAN UNIT TRUST MANAGERS

On 15 March 2018, Ahmed was appointed Chairman of WUTM and on 8 August 2018, became a Director of Wesleyan Assurance Society.

Ahmed became Chief Financial Officer in November 2015, after holding a number of senior roles at Wesleyan. He joined the Society in 2010 from the Phoenix Group and became Head of Finance in 2011, and Managing Director of Wesleyan's General Insurance division in 2014.

JAMES NEEDHAM MBA, FIA
CHIEF EXECUTIVE OFFICER
WESLEYAN UNIT TRUST MANAGERS

On 26 February 2020, James was appointed Chief Executive Officer to the board of Wesleyan Unit Trust Managers.

James has 20 years' actuarial experience; he joined Wesleyan in 2010 and became Chief Actuary in 2018. He is responsible for Wesleyan's actuarial and financial reporting activity and oversees the Society's product development and performance, identifying ways to improve customer outcomes. He is a financial reporting expert and has presented at a number of actuarial conferences.

MARTIN LAWRENCE BSc, ASIP
DIRECTOR
WESLEYAN UNIT TRUST MANAGERS

On 21 April 2016, Martin was appointed to the board of Wesleyan Unit Trust Managers as a Director.

Martin has more than 20 years' experience in investment management, having worked in the industry since graduating from the University of Exeter with a degree in Mathematics. He manages Wesleyan's With Profits Fund, which is currently valued at approximately £3bn.

Martin invests directly in UK and overseas equities, government and corporate bonds, cash, and UK property. He takes a long-term investment approach and keeps our customers and members front-of-mind at all times, having worked at Wesleyan since 1995.

NON-EXECUTIVE DIRECTORS

IAN MCCAIG
NON-EXECUTIVE DIRECTOR
WESLEYAN UNIT TRUST MANAGERS

On 11 December 2019, Ian was appointed as a Non-Executive Director to the Board of Wesleyan Unit Trust Managers.

Ian has been a member of Wesleyan Group's Board of Directors since 30 September 2019 and was appointed to the Society's Risk Committee. Ian has worked across a number of sectors, most recently as CEO of First Utility Ltd. He led the company through several years of successful transformation and significant growth before its acquisition by Shell at the end of 2017. Prior to that Ian was CEO of lastminute.com. Ian also serves on the Boards of M-Kopa Ltd, Seedrs Ltd, English Heritage and Festicket, of which he is Chair.

NON-EXECUTIVE DIRECTORS continued

ANDREW NEDEN
NON-EXECUTIVE DIRECTOR
WESLEYAN UNIT TRUST MANAGERS

On 11 December 2019, Andrew was appointed as a Non-Executive Director to the Board of Wesleyan Unit Trust Managers.

Andrew has been a member of Wesleyan Group's Board of Directors since November 2014. Andrew worked for 30 years at KPMG, the global accountancy firm, including 18 years as a partner. His roles included Head of Financial Sector Transaction Services in the UK and Global Chief Operating Officer for Financial Services. Andrew also chairs Aetna Insurance Company Limited, is Vice-Chair at the Nottingham Building Society, and is a Non-Executive Director at ABC International Bank PLC.

FUND MANAGERS

JAMES HUBBARD, BA, CFA
WESLEYAN INTERNATIONAL GROWTH FUND
WESLEYAN MODERATE-HIGH RISK/REWARD INCOME FUND

James Hubbard joined Wesleyan as an Investment Analyst in January 2011. After graduating with an MA in Economics and Business from the University of Manchester he initially worked for a Corporate Bank in London. James is a CFA (Chartered Financial Analyst) charterholder and has been a Fund Manager since April 2016.

PAUL BURTON, BSc, FIA
WESLEYAN LOW RISK/REWARD GROWTH FUND
WESLEYAN RISK AVERSE FUND*

Paul Burton has been the Fund Manager of the Low Risk Life and Pension funds since launch in January 2012. He has also managed the assets of the Wesleyan Staff Pension Scheme since 1998, and the Society's Non Profit Fund since 2012. He joined the Society in 1990, qualifying as an Actuary in 1998, working as an Investment Analyst in the preceding five years.

*Paul Burton became the Fund Manager for the Wesleyan Risk Averse Fund from 1 January 2020.

MARC O'SULLIVAN, BSc, CFA
WESLEYAN MODERATE RISK/REWARD GROWTH FUND*
WESLEYAN UK GROWTH FUND

Marc O'Sullivan has been a Fund Manager since 2012, managing investments across a number of asset classes. Marc joined the Society as an Investment Analyst in 2003, having graduated from the University of Birmingham with a degree in Economics. Marc has been a CFA (Chartered Financial Analyst) charterholder since 2008.

*Marc O'Sullivan became the Fund Manager for the Wesleyan Moderate Risk/Reward Growth Fund from 1 January 2020.

“ We continue to focus on serving your needs and are committed to maximising the long-term financial returns for all our customers. ”

Ahmed Farooq
Chairman

CHAIRMAN'S STATEMENT

Since the last Wesleyan Unit Trust Managers (WUTM) Report and Accounts, the COVID-19 pandemic has acted as a raging storm across the international investment landscape. The scale of the virus – unprecedented in recent history – means that it continues to have a dramatic impact on people's lives, the global economy and investment markets too. This environment makes it incredibly difficult for investors to navigate the 'best' course for customers.

Hospital doctors, GPs, dentists, lawyers and teachers have been at the heart of the UK's COVID-19 response and these professions are at the heart of our business. Your dedication to helping others is an inspiration for all of us. During the pandemic, you have provided a lifeline for countless people, including some of our own family, friends and colleagues, so I would like to take a moment here to give you our sincere thanks.

We continue to focus on serving your needs and are committed to maximising the long-term financial returns for all our customers. However, the performance of our funds during this turbulent period has been disappointing, mainly because of our relatively high exposure to what is typically classed as 'growth' assets. This primarily covers UK equities (also known as 'stocks' or 'shares'), which have not performed in line with our expectations, and the UK stock market has also taken a greater hit than other developed stock markets. The assets we have invested in should ultimately perform well over the longer term, but patience is required for the time being, due to the market declines and the volatility we have seen this year.

WUTM's funds are managed by our in-house Fund Managers, who are an integral part of our award-winning Investments team. In 2020, to date, the team has received two major industry accolades – 'Investment Team of the Year' (Insurance Asset Risk Awards) and 'Active Manager of the Year' (Asset Management Awards) – in acknowledgement of their dedication to achieving the best possible outcomes for our customers. This is something we are proud of, particularly given the market turbulence caused by COVID-19 and international lockdowns.

Each of our Fund Managers has worked with us for at least 10 years, creating stability while adding their experience to the team. They are long-term investors in the truest sense, using periods of short-term volatility to find investment opportunities that may have been overlooked by others. The first half of 2020 has presented them with numerous opportunities to buy and sell assets and we have since seen encouraging signs of market recovery.

WUTM offers six unit trust funds, with different risk appetites and financial objectives for those who trust us to invest on their behalf. These funds are: Risk Averse Fund (page 80), Low Risk/Reward Growth Fund (page 22), Moderate Risk/Reward Growth Fund (page 59), Moderate-High Risk/Reward Income Fund (page 40), UK Growth Fund (page 90), and International Growth Fund (page 9). More information about each fund is available in this document, including fund commentaries and portfolio holdings.

You can invest with us via three products: a Unit Trust Investment Account, a Unit Trust Individual Savings Account (ISA), and a Unit Trust Junior ISA. Our unit trust funds continue to prove popular with individuals, businesses and charities alike. Furthermore, after listening to your feedback, earlier this year we launched our online WUTM Investor Portal – you can register and log in by visiting www.wesleyan.co.uk/wutm-online. The portal enables you to access up-to-date valuations for your products and it means you have more options for how you choose to invest with us in the future.

The remainder of the year is unlikely to be plain sailing for investments, due to factors such as COVID-19, the US presidential election in November, Brexit trade talks, and political tensions between China and several countries. However, it is important to remember that we have a long-term growth strategy and we maintain diverse portfolios across and within asset classes when possible, covering equities, government bonds, corporate bonds and cash, depending on the fund and its objective. This diversification, coupled with our 'buy and hold' fund management approach, means that fund performance should continue to recover in the coming months and years.

As part of ongoing work to improve efficiency and prepare for the future, we have reallocated some funds to different Fund Managers within our existing team. I would like to thank Martin Lawrence for managing the Moderate Risk/Reward Growth Fund since its launch in 2016 up until January 2020. Martin will continue to give his expert guidance as a Director of WUTM and as Director of Investments for Wesleyan.

Finally, I have been Chairman of WUTM since March 2018. In this role, one of my key objectives has been to ensure that our clients have a unit trust fund range and investment journey that meets their needs. WUTM has evolved over the last few years to become an investment home not only for individual clients but for their businesses too. The improvements we have made to our service, such as increasing the ways customers can invest and communicate with us, has also given me a great deal of personal satisfaction.

In December, I will be moving to pastures new. It has been an honour to work as part of the WUTM team and the wider Wesleyan Group, alongside investment professionals who keep our customers front-of-mind in all that they do. I have every confidence that this will continue to be the case moving forward and that the business will go from strength to strength under the guidance of my successor, subject to regulatory approval, Ian McCaig. Ian has been a member of Wesleyan Group's Board of Directors since 2019 and has many years' experience gained from similar roles on the Boards of M-Kopa, Seedrs, the British Tourist Authority, English Heritage, and Festicket (which he is also the Chairman of). I wish Ian and the team the very best for the future.

A. Farooq

*Collectively, comprises the Authorised Fund Manager Report. Additionally, in each fund it is comprised of the general information and portfolio statement and changes.

Please note: All "IA" sector mentions in this report refer to the Investment Association's fund sectors, which are used across the industry. Each sector has clear criteria that a fund must fulfil. Sectors are typically based on the main asset types the fund invests in. However, funds in any sector may offer a wide range of assets and risk profiles.

AUTHORISED FUND MANAGER REPORT

INTRODUCTION

This is the annual report of the Wesleyan Authorised Unit Trust ('Trust') for the year ended 30 June 2020.

The Trust is managed by Wesleyan Unit Trust Managers Limited ('Manager').

The Trust is an authorised unit trust in an umbrella form and was authorised by the Financial Conduct Authority (FCA) effective 4 September 2015. The Trust is classified under the Collective Investment Scheme Sourcebook ('COLL') as a collective investment scheme authorised under the UCITS Directive.

The Trust was established pursuant to a Trust Deed dated 4 September 2015 (as amended from time to time) made between the Manager and HSBC Bank Plc ('Trustee'). The Trust has an unlimited duration.

Details of the managers and advisors of the Trust are disclosed on page 147.

STRUCTURE OF THE TRUST

The Trust is structured as an umbrella unit trust, in that different funds may be established from time to time by the Manager with the approval of the FCA, the agreement of the Trustee and in accordance with the Trust Deed.

The assets of each fund will be treated as separate from those of every other fund and will be invested in accordance with the investment objective and investment policy applicable to that fund.

Each fund has a specific portfolio to which that fund's assets and liabilities are attributable. So far as the Unitholders are concerned, each fund is treated as a separate entity. Unitholders are not liable for the debts of the Trust or for any other fund.

Subject to the above, each fund will be charged with the liabilities, expenses, costs and charges of the Trust attributable to that fund, and within each fund charges will be allocated between classes in accordance with the terms of issue of units of those classes. Any assets, liabilities, expenses, costs or charges not attributable to a particular fund may be allocated by the Manager in a manner which it believes is fair to the unit holders generally. This will normally be pro rata to the Net Asset Value of the relevant funds.

The base currency of each fund is pounds Sterling.

As at 30 June 2020, the Trust comprised of the following funds:

Wesleyan International Growth Fund

Wesleyan Low Risk/Reward Growth Fund

Wesleyan Moderate-High Risk/Reward Income Fund

Wesleyan Moderate Risk/Reward Growth Fund

Wesleyan Risk Averse Fund

Wesleyan UK Growth Fund

All of the above funds are managed by the Manager. Details of other management and advisors of the funds are disclosed on page 147.

UNITS

The rights represented by units are those of a beneficial interest under the Trust. Several classes of units may be issued in respect of each fund.

Further classes of units may be established from time to time by the Manager with the approval of the FCA, the agreement of the Trustee and in accordance with the Trust Deed. On the introduction of any new class, a revised prospectus will be prepared, setting out the details of each class.

Units in the Trust are not currently listed on any investment exchange.

Holders of income units are entitled to be paid the distributable income attributed to such units on any relevant interim and/or annual income allocation dates. The Manager, at its discretion, may also permit unit holders to elect to reinvest any such distributable income instead of receiving payment. In this event, the income will be used to purchase additional units in the same fund.

Holders of Accumulation units are not entitled to be paid the income attributed to such units, but that income is automatically transferred to (and retained as part of) the capital assets of the relevant fund on the relevant interim and/or annual accounting dates. This is reflected in the price of an accumulation unit.

UNITS IN ISSUE

As at 30 June 2020, Accumulation ("Acc") and Income ("Inc") units are available in the following funds and in the following denominations and classes:

Fund Class	Unit Type	Base Currency	Launch Date	ISIN ¹
Wesleyan International Growth Fund				
Class A	Acc	GBP	03/06/16	GB00BYNYHT49

Wesleyan Moderate Risk/Reward Growth Fund				
Class B	Acc	GBP	06/06/16	GB00BYVDHJ38
Class X	Acc	GBP	06/06/16	GB00BYSW0W70
Class B	Inc	GBP	06/06/16	GB00BZ161S66
Class X	Inc	GBP	06/06/16	GB00BZ161T73
Wesleyan Risk Averse Fund				
Class A	Acc	GBP	03/06/16	GB00BYNYHM79
Class B	Acc	GBP	03/06/16	GB00BYNYHN86
Class X	Acc	GBP	03/06/16	GB00BYNYHP01
Wesleyan UK Growth Fund				
Class A	Acc	GBP	03/06/16	GB00BYNYHQ18
Class B	Acc	GBP	03/06/16	GB00BYNYHR25
Class X	Acc	GBP	03/06/16	GB00BYNYHS32

¹ International Securities Identification Number (ISIN) codes securities including stocks and bonds with unique identifiable numbers. They are in a consistent format so they can be tracked across markets worldwide and are often used by companies when looking to raise capital whether that be debt or equity.

None of the above funds hold units in other funds of the Trust.

AUTHORISED FUND MANAGER REPORT continued

UNIT HOLDERS – TAXATION

The information below is a general guide based on current United Kingdom law and HM Revenue & Customs practice which are subject to change. It summarises the tax position of the funds and of direct personal investors who are United Kingdom residents and hold units as investments. This does not detail the tax treatment for corporate or trustee unit holders.

INCOME

The funds may pay dividend distributions (which will be automatically retained in the relevant fund in the case of accumulation units). There is currently a tax free dividend allowance above this allowance from investments not held within an Individual Savings Account are taxed at a rate that depends on the investor's income tax band.

INTEREST

Where a fund pays an interest distribution (which will be automatically retained in the fund in the case of accumulation units) this is gross of the basic rate of tax from 6 April 2016 for some people (depending on their tax bands).

There is currently a tax free Personal Savings Allowance (except for additional rate tax payers). Interest distributions received above this allowance from investments not held within an Individual Savings Account or Junior Individual Savings Account are taxed at a rate that depends on the investor's income tax band.

INCOME EQUALISATION

The first income allocation received by an investor after buying units may include an amount of income equalisation, which will be shown on the issued tax voucher. This is effectively a repayment of the income equalisation paid by the investor as part of the purchase price. It is a return of capital, and is not taxable, rather it should be deducted from the acquisition cost of the units for capital gains tax purposes.

CAPITAL GAINS

Unit holders may be liable to capital gains tax on gains arising from the redemption, transfer or other disposal of units. The rate of tax, and available reliefs, will be as applicable from time to time. An exchange of units between classes within a fund is generally not treated as a disposal for this purpose.

Units in each of the funds may be held within Individual Savings Accounts and would be exempt from personal liability to income or capital gains tax. Unit holders who have invested

in the funds through an Individual Savings Account or Junior Individual Savings Account should refer to the Key Features Document for further details of how it operates.

ASSESSMENT OF THE RISK RELATING TO THE UK EXITING THE EUROPEAN UNION (BREXIT)

The Manager has been managing a Brexit plan for the past two years. Early in the process we decided to concentrate on ensuring that we should be prepared for the worst case scenario. Often referred to as a hard Brexit, this is where the UK leaves the EU with no deal and no transition period. This approach ensures that we are well placed for any political eventuality.

We identified all Supplier relationships where services are provided from the European Economic Area (EEA). We have received confirmation from all suppliers that services will be unaffected in a no deal, no transition scenario.

The Funds are not actively sold to any investors in the EEA outside of the UK.

REPORTING DATES

The annual and interim accounting date of the Trust and the funds within are as below:

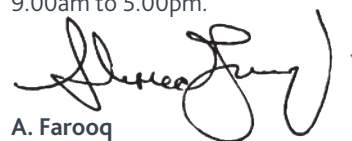

Annual accounting date: 30 June

Interim accounting date: 31 December

The following sections sets out for each of the funds within the Trust:

- ▶ Fund manager report
- ▶ Number of units in circulation and the net asset values per unit
- ▶ Annual financial statements

This annual report of the Trust and the funds within are available on our website (www.wesleyan.co.uk/Report). If you have any questions about the report, or if you would like to talk to us about your investments, you can call us on **0330 123 3813**. Lines are open Monday to Friday from 9.00am to 5.00pm.

A. Farooq

Wesleyan Unit Trust Managers Limited

WESLEYAN INTERNATIONAL GROWTH FUND

FUND REVIEW

This is the full-year report for the Wesleyan International Growth Fund covering the year to 30 June 2020. The underlying unit price performance generated a return of 1.1% compared to the IA Global sector that returned 5.4%*.

Global equity markets were up by just over 5% at the half-year point (31 December 2019), before the spread of COVID-19 caused a large decline in equity markets in February and March, and a corresponding move into 'safe haven' assets like government bonds. US markets make up more than half of the global equity market, and it may not have been a coincidence that on 23 March – the same day the Federal Reserve stated it was "committed to use its full range of tools to support the US economy" – US equity markets started to recover from their lows. Central banks around the world also acted to support their economies, which contributed to global markets ending the six months to 30 June 2020 marginally up, and up 5.7% for the full year to the same end date.

US equity markets recovered more quickly than many others. This was partly driven by their high exposure to technology and pharmaceutical companies and because the US also imposed lockdown restrictions for a shorter duration than other nations. China has recovered well too, with its stock market reaching new highs, supported by increased stimulus, and Japan also ended the period in positive territory. In contrast, the slower reopening of European economies has impacted their performance, with markets in the UK, Italy, France and Spain down, and only Germany has delivered positive performance in the EU.

The fund underperformed the IA Global sector by 4.3% over the year, losing some of the gains and stronger performance from the previous year. When compared to global markets, the most notable reason behind the fund's underperformance was its underweight positioning in technology companies, combined with its failure not to own some of the best-performing names.

COVID-19 accelerated themes and trends that were already visible before the crisis, such as a greater level of digital and home working. Within the technology sector, it is a relatively narrow group of stocks that have

led the market, such as Apple (up over 92%), Microsoft (up 58%), Nvidia (up 139%) and others such as Adobe, Facebook, Alphabet, ASML, and Shopify. Despite Microsoft being the fund's largest position at 5.7% (at period end), not owning many of the other names listed has hurt performance. Facebook, another of the fund's technology holdings, performed well (up 21%), although it underperformed the wider technology sector.

There were several positive contributors to performance over the period. PayPal performed strongly, as online sales grew despite the pandemic. Pacific Horizon Investment Trust (focused on Asian markets) delivered good returns, and healthcare names Novo Nordisk (the world's largest insulin maker), new holding Ambu (a provider of medical equipment) and Roche (the Swiss pharmaceutical and diagnostics company) have continued to perform extremely well.

The most significant detractors came from the leisure, transport and financial sectors, with Boeing and Royal Caribbean among the worst performers. Despite reducing banking positions in February, the fund still owns positions in other financial businesses such as Lloyds Banking Group, Société Générale, Bank of America, and American Express, which have struggled during the period.

The fund made several other notable purchases, including acquiring new holdings in Diageo (beverages), InterContinental Hotels (international hotel operator), Agilent (life sciences), BigBen Interactive (video game developer), and Booking Holdings (travel technology company). The fund added to its position in Amadeus IT (airline and hotel technology).

The fund also made several sales and fully sold out of Apple in the period on valuation grounds, albeit too early with the benefit of hindsight. We also sold out of JP Morgan, IBM and reduced the position in Koninklijke Philips (healthcare).

The full list of portfolio holdings can be found later in this report.

Fund outlook

Equity markets are looking beyond the market disruptions and company earnings challenges of 2020, buoyed by economic stimulus programmes. Government bond

market valuations suggest modest growth and inflation in the coming years, and the corporate bond market is anticipating a lower level of corporate distress than in previous recessions.

Generally, economists are forecasting a 'V- or U-shaped' recovery, with the average forecast expecting global GDP to reach 2019 levels in the next few years. July and early August saw economists dim their recovery expectations, as economic data disappointed and other data suggested the recovery may have begun to stagnate in places, particularly in the US.

Although India and Brazil are yet to peak from their first wave, 'second waves' of COVID-19 infections are appearing in Japan, Australia, the US and certain parts of Europe. Whilst these economies are likely to benefit from better management processes and their learnings from earlier experiences, there are also likely to be further economic repercussions.

The US presidential election is due in November, with candidate Joe Biden the current front-runner. There is a risk of President Trump making tactical but unpredictable moves in a bid to retain office, at a time when global relationships are already strained. China, meanwhile, has gradually been displaying more assertive behaviour on several issues, highlighted by the new National Security Law in Hong Kong. This has strained many of its global relationships, particularly with the US, Australia, Canada and the UK.

The UK has the additional hurdle of agreeing a trade agreement with Europe and having it in place by 31 December. There has not been any meaningful progress to date, although European trade negotiations are typically agreed at the 'last minute'.

The fund is driven by 'bottom-up' stock selection, seeking to invest in the best investment ideas from anywhere in the world. We are expecting bouts of market volatility over the coming year as companies and sectors experience challenges associated with the economic environment. As such, we remain watchful for opportunities to deploy cash into attractive long-term investments for the fund.

WESLEYAN INTERNATIONAL GROWTH FUND continued

GENERAL INFORMATION

Investment objective and policy

The fund aims to provide capital growth over a period of at least five years. We measure the success of the fund as outperforming a benchmark over a rolling 5-year period. We do this by comparing the investment performance, before fees and charges, to a composite benchmark which reflects the current risk rating of the fund.

The composite benchmark is composed as follows: 95% FTSE All-World - Total Return Index, and 5% SONIA interest rate benchmark. Invested capital is however at risk and there is no guarantee that the objective will be attained over this or any period.

The Fund will invest predominantly in a diversified portfolio of equities. The equities in which the Fund invests may be issued by companies anywhere in the world.

The Fund may invest in various sectors. The Fund may also invest in fixed interest and other transferable securities, cash, near cash, deposits, money-market instruments and other collective investment schemes.

The Fund may use derivatives for the purpose of efficient portfolio management.

Risk and reward profile

The risk category is based on the rate the fund's value has moved up and down in the past. The risk rating for Share Class A and B has increased from the prior year. Share Class X has a risk category of 5.

The fund's value can be influenced by changes in stock market prices, currencies and interest rates which can be affected by factors such as political and economic events.

This risk category is calculated in line with European Securities Markets Authority (ESMA) rules using historical data.

This is not a guarantee and may not be a reliable indication of the fund's future risk and reward category.

A fund in the lowest category does not mean a 'risk free' investment.

A fuller explanation of the risk and reward profile and how it can move up and down based on the market volatility, is contained in the fund's Key Investor Information Document (KIID). KIIDs are available at www.wesleyan.co.uk/fund-prices

More information about fund performance, including benchmarks and comparisons, can be found later in this report.

Group 2	0.4913	0.4324	0.9237	1.2847

Corporate unitholders' information

For corporate unitholders, all of the income relating to the distribution is 100% franked.

Equalisation

Many funds receive dividends from the companies they invest in. These payments are added to the fund's cash reserve. As this reserve grows, so does the fund's net asset value, which in turn increases the offer price for the fund's units.

At the point of the fund's next dividend payment date, these dividends are paid out to the fund's unitholders and no longer form part of the fund's cash reserve. This usually causes the unit price of the fund to fall.

Group 1 and 2 (see top of the page for dates) unitholders receive the same dividend amount per unit. Group 1 payments entirely comprise of income and therefore Equalisation does not apply to this group.

Group 2 payments take into account two components as they are between two dividend dates. Part of the payment for Group 2 unitholders comes from the income that accumulated from the date of unit purchase. The second part comes from partial returns on units that were bought at a higher price when the cash reserve grew. This is known as capital repayment. It is not liable to Income Tax but must be deducted from the cost of the shares for Capital Gains Tax purposes.

WESLEYAN LOW RISK / REWARD GROWTH FUND

FUND REVIEW

This is the full-year report for the Wesleyan Low Risk/Reward Growth Fund covering the year to 30 June 2020. The underlying unit price performance generated a return of -2.41% over the period compared to the IA Mixed Investment 0%-35% Shares sector average of 1.27%*.

The fund's overall performance is disappointing, after a very strong performance during the first six months of the reporting period. However, in the most recent six months, the portfolio's bias towards UK equities and corporate bonds – which underperformed UK government bonds (gilts) – adversely affected performance.

At the start of 2020, we believed that UK equities would be a strong performer relative to other developed equity markets, partly due to more clarity resulting from the decisive general election result in December 2019 and as progress was made on Brexit negotiations with the EU.

However, we were cautious on the valuation levels of the gilt market, in particular long-dated gilts which only yielded just above 1% at the start of 2020. Therefore, we positioned the portfolio mainly in short- to medium-dated bonds, which have not performed as strongly as longer-dated gilts in the first six months of 2020.

In addition, our high equity weighting at the start of the year contributed to the fund underperforming peers, as equities came under pressure from the economic effects of the measures taken to protect against

COVID-19. UK equities fell 35% from their peak during March and underperformed global peers, partly due to their bias towards the financial and energy sectors, both of which suffered disproportionately during the downturn. The fund's corporate bond portfolio was also badly affected by the fragility of the equity market, as investors became concerned about the ability of some companies to manage their debts.

Our contracyclical approach to investing means that we buy equities during periods of market weakness. This means that in times of falling markets we sometimes invest earlier than others, as we try to position the equity portfolio to benefit from the anticipated economic recovery.

The recent turbulence in equity markets led to a 'flight to quality', with investors seeking safety in gilts. This also meant that corporate bonds underperformed gilts, as the difference in the yield between a government bond and a corporate bond increased dramatically during the worst of the equity market fall. The 'bounce backs' that followed resulted in around half of this underperformance being recovered.

The full list of portfolio holdings can be found later in this report.

Fund outlook

Financial markets still face several sources of uncertainty: beating COVID-19, the ongoing Brexit trade deal negotiations, increased geopolitical tensions, and the US presidential election later this year.

We expect interest rates to remain at very low levels for years to come and for equities to be the best-performing asset class over the long term. Although dividend payments have been suspended by a number of companies, from a bond holder's perspective this should serve to strengthen their balance sheets. The economic downturn that has followed from measures to protect the population against COVID-19 means that many companies will have to 'right size' themselves. This may mean that they are stronger once the world normalises, with a lower cost base, which will be better over the long term but potentially painful for equity holders in the short term.

Short-dated gilts are valued on negative yields at the time of writing. This reflects the market's view that there will be low interest rates for many years to come as well as the possibility of negative interest rates, and that some investors are prepared to pay in order to own 'safe' government bonds.

Based on current valuations, we expect to position the gilt portfolio towards shorter-duration bonds, which will provide more downside protection if interest rates rise. We will seek to add value by buying medium- or long-dated bonds in times of price weakness, constantly looking for suitable trading opportunities – a strategy that we have successfully followed for a number of years.

GENERAL INFORMATION

Investment objective and policy

The fund aims to provide capital growth over a period of at least five years. We measure the success of the fund as outperforming a benchmark over a rolling 5-year period. We do this by comparing the investment performance, before fees and charges, to a composite benchmark which reflects the current risk rating of the fund.

The composite benchmark is composed as follows: 22.5% FTSE All-Share - Total Return, 7.5% FTSE Developed ex UK - Total Return, 32.5% FTSE Actuaries UK Conventional Gilts All Stocks – Total Return, 32.5% iBoxx £ Corporates – Total Return Indices and 5% SONIA interest rate benchmark. Invested capital is however at risk and there is no guarantee that the objective will be attained over this or any period.

The Fund will invest predominantly in a diversified portfolio of government bonds, corporate bonds, UK and International equities and cash.

Investment will generally be made in sterling denominated assets but the Fund may at the Manager’s discretion invest in non-Sterling denominated assets.

The Fund may also invest in other fixed interest and transferable securities, near cash, deposits, money-market instruments and other collective investment schemes. More than 35% of the Fund may be invested in government and public securities issued by or on behalf of or guaranteed by the Government of the United Kingdom.

The Fund may use derivatives for the purposes of efficient portfolio management.

Risk and reward profile

The risk category is based on the rate the fund’s value has moved up and down in the past and has increased from the prior year.

The fund’s value can be influenced by changes in stock market prices, currencies and interest rates which can be affected by factors such as political and economic events.

This risk category is calculated in line with European Securities Markets Authority (ESMA) rules using historical data.

This is not a guarantee and may not be a reliable indication of the fund’s future risk and reward category.

A fund in the lowest category does not mean a ‘risk free’ investment.

A fuller explanation of the risk and reward profile and how it can move up and down based on the market volatility, is contained in the fund’s Key Investor Information Document (KIID). KIIDs are available at www.wesleyan.co.uk/fund-prices

More information about fund performance, including benchmarks and comparisons, can be found later in this report.

Past performance is not a guide to future performance. The price of units and distributions credited may go down as well as up. Investments in unit trusts should normally be regarded as long-term investments.

Corporate unitholders information

For corporate unitholders, all of the income relating to the distribution is 100% unfranked.

Equalisation

Many funds receive dividends from the companies they invest in. These payments are added to the fund's cash reserve. As this reserve grows, so does the fund's net asset value, which in turn increases the offer price for the fund's units.

At the point of the fund's next dividend payment date, these dividends are paid out to the fund's unitholders and no longer form part of the fund's cash reserve. This usually causes the unit price of the fund to fall.

Group 1 and 2 (see top of the page for dates) unitholders receive the same dividend amount per unit. Group 1 payments entirely comprise of income and therefore Equalisation does not apply to this group.

Group 2 payments take into account two components as they are between two dividend dates. Part of the payment for Group 2 unitholders comes from the income that accumulated from the date of unit purchase. The second part comes from partial returns on units that were bought at a higher price when the cash reserve grew. This is known as capital repayment. It is not liable to Income Tax but must be deducted from the cost of the shares for Capital Gains Tax purposes.

WESLEYAN MODERATE-HIGH RISK / REWARD INCOME FUND

FUND REVIEW

This is the full-year report for the Wesleyan Moderate-High Risk/Reward Income Fund covering the year to 30 June 2020. The underlying unit price performance generated a return of -7.91% compared to the IA Mixed Investment 40-85% sector that returned -0.11%*

Events that would typically span years have been compressed into months, as the world has been forced to adapt to the COVID-19 pandemic. Confronted with a highly transmissible virus, many countries restricted mobility to reduce the spread, and large parts of the global economy were closed. Governments have responded with varying policies but are focusing on protecting jobs and the vulnerable, as the virus has a disproportionate impact on low-income earners.

Global equity markets finished the year to 30 June 2020 up just over 5%, although this masks the 25% decline we saw after the market peaked on 20 February. However, markets have largely recovered, as central banks and governments responded to the pandemic with an unprecedented level of economic stimulus. The UK government bond market (gilts) performed strongly (up 11% over the 12 months) as investors sought 'safe haven' assets. The UK corporate bond market, meanwhile, was also up over 6%, as the support packages on offer are expected to assist companies and households through the pandemic.

The fund has underperformed the sector by 7.8%, driven by several major factors. Firstly, the fund has been weighted towards equities with a strong relative bias towards the UK equity market, which has underperformed its global peers – the UK declined by 13% over the period, while the rest of the global equity market rose by 7.7%, dominated by the US and technology giants. The second

area to highlight is the lower percentage of the fund allocated to gilts, particularly those with longer maturity dates, which performed strongly in the period as investors sought 'safe' assets.

The largest positive contributors to the fund's performance include Microsoft, Novo Nordisk (leading insulin maker), Reckitt Benckiser (household products), and AstraZeneca. The biggest detractors from performance have come from the fund's underweight, yet still significant, positions in energy giants Shell and BP, as the oil price declined significantly during the escalating pandemic. The fund added to both holdings over the period as, in our view, market expectations around future oil prices had become too pessimistic. Other detractors from performance included InterContinental Hotels (international hotel operator) and Diageo (beverages).

Trading activity in the second half of the reporting period – as well as the names already mentioned – included additions to several existing holdings, such as Diageo and Fever-Tree (beverages), Hargreaves Lansdown (wealth management platform) and Bunzl (distribution). The fund created a new position in Carnival (cruise operator) over the period.

The fund sold its positions in HICL Infrastructure and LXi REIT, as their strong performance was a useful source of cash to invest in other opportunities that arose from the recent market volatility. In the corporate bond portfolio, the fund acquired a new bond holding issued by Nationwide Building Society.

The full list of portfolio holdings can be found later in this report.

Fund outlook

The short-term economic outlook remains uncertain. Inflation expectations are modest, while GDP in most countries is expected to

recover to 2019 levels in the next few years. The recovery is broadly expected to be 'V- or U-shaped', although we are watching closely to see if the recovery can be sustained.

There are a number of obstacles facing the global economy, which we are closely monitoring, and these must be overcome in order to continue the recovery from the impact of the pandemic. Firstly, the international community needs to effectively manage any re-emergences of the virus. Secondly, it must carefully handle the gradual withdrawal of stimulus measures, such as various international furlough schemes that have been supporting employment. Many economies are being left with elevated debt piles as a result of tackling the crisis, which will also need to be managed well to minimise any negative impact on future economic growth.

Political risks around the world have risen too. China, for example, has taken a more assertive stance on several issues, including the new Hong Kong security law. As a result, tensions have grown between China and several major developed economies, most notably the US, UK and Australia. A misstep or misunderstanding on either side, with any of these parties, could potentially escalate quickly.

Investment markets are likely to remain volatile for some time, as some sectors and asset classes disappoint or experience setbacks. We continue to view valuations in government bond markets as relatively unattractive over the prescribed investment horizon and intend to remain more heavily allocated towards equities. Our investment process leads us to review and add to positions in companies that have been overlooked by the market, focusing on businesses we believe are high quality and offer long-term potential. We are already seeing some good opportunities and have been adding new holdings to the portfolio since the period end.

GENERAL INFORMATION

Investment objective and policy

The fund aims to provide capital/income growth over a period of at least five years. We measure the success of the fund as outperforming a benchmark over a rolling 5- year period. We do this by comparing the investment performance, before fees and charges, to a composite benchmark which reflects the current risk rating of the fund.

The composite benchmark is composed as follows: 55% FTSE All-Share - Total Return, 15% FTSE Developed ex UK - Total Return, 5% FTSE Emerging Markets – Total Return, 10% FTSE Actuaries UK Conventional Bonds Gilts All Stocks – Total Return, 10% iBoxx £ Corporates – Total Return Indices and 5% SONIA interest rate benchmark. Invested capital is however at risk and there is no guarantee that the objective will be attained over this or any period.

The Fund will invest in UK and international equities (largely dividend paying) with the remainder largely being invested in fixed interest securities.

The Fund may also invest in other transferable securities (including non-UK equities), cash, near cash, deposits, money-market instruments and other collective investment schemes.

More than 35% of the Fund may be invested in government and public securities issued by or on behalf of or guaranteed by the Government of the United Kingdom.

The Fund may use derivatives for the purpose of efficient portfolio management.

Risk and reward profile

The risk category is based on the rate the fund’s value has moved up and down in the past and has increased from the prior year.

The fund’s value can be influenced by changes in stock market prices, currencies and interest rates which can be affected by factors such as political and economic events.

This risk category is calculated in line with European Securities Markets Authority (ESMA) rules using historical data.

This is not a guarantee and may not be a reliable indication of the fund’s future risk and reward category.

A fund in the lowest category does not mean a ‘risk free’ investment.

A fuller explanation of the risk and reward profile and how it can move up and down based on the market volatility, is contained in the fund’s Key Investor Information Document (KIID). KIIDs are available at www.wesleyan.co.uk/fund-prices

More information about fund performance, including benchmarks and comparisons, can be found later in this report.

Corporate unitholders information

For corporate unitholders, all of the income relating to the distribution is 100% franked.

Equalisation

Many funds receive dividends from the companies they invest in. These payments are added to the fund's cash reserve. As this reserve grows, so does the fund's net asset value, which in turn increases the offer price for the fund's units.

At the point of the fund's next dividend payment date, these dividends are paid out to the fund's unitholders and no longer form part of the fund's cash reserve. This usually causes the unit price of the fund to fall.

Group 1 and 2 (see top of the page for dates) unitholders receive the same dividend amount per unit. Group 1 payments entirely comprise of income and therefore Equalisation does not apply to this group.

Group 2 payments take into account two components as they are between two dividend dates. Part of the payment for Group 2 unitholders comes from the income that accumulated from the date of unit purchase. The second part comes from partial returns on units that were bought at a higher price when the cash reserve grew. This is known as capital repayment. It is not liable to Income Tax but must be deducted from the cost of the shares for Capital Gains Tax purposes.

WESLEYAN MODERATE RISK / REWARD GROWTH FUND

FUND REVIEW

This is the full-year report for the Wesleyan Moderate Risk/Reward Growth Fund covering the year to 30 June 2020. The underlying unit price performance generated a return of -5.5% compared to the IA Mixed Investment 20-60% Shares sector average which declined by 0.6%*.

The fund's disappointing performance began during the rapidly evolving fallout from the COVID-19 pandemic, and it can be attributed to three main characteristics of the portfolio positioning.

Firstly, the fund has retained a preference for long-term growth assets, as demonstrated by a relatively higher weighting to equities. Stock markets act as a barometer for economic growth prospects, so share prices began to rapidly decline as the immediate outlook surrounding the pandemic began to darken.

Secondly, the UK stock market was a notable underperformer during the period, mostly because it has a higher level of exposure to sectors which bore the brunt of 'lockdown' measures, such as travel, financial services, and energy companies. Shares in financial companies sank as dividends were suspended, interest rates were slashed and higher future losses on loans were anticipated. Energy companies witnessed material drops in demand as 'lockdown' policies restricted physical movement, and companies in the travel and leisure sector saw demand vanish after being instructed to cease trading until it was deemed safe enough for them to reopen.

Thirdly, the fund's bias to equity assets resulted in lower exposure to fixed income

assets, which often rise in value thanks to their 'safe haven' status during times of uncertainty. This has been particularly pronounced during the COVID-19 crisis, as interest rates were cut and accompanied by monetary policy support from major central banks. UK government bonds (gilts) performed strongly during the period, especially those with longer maturity dates, as markets priced for a new reality of 'lower-for-longer' interest rates and hammered yields down to historic lows.

During bouts of market weakness, the fund made selected purchases in some energy companies, such as BP and Shell. A well-timed purchase in the mining company Rio Tinto provided useful exposure to the rapid economic recovery we have seen in China, the initial source of the virus outbreak. Purchases of adidas, Prudential and Visa, all made during the significant market falls in March, have also yielded healthy returns. Proceeds from a number of short-dated UK government treasury bills, which can serve as an alternative to gilt market purchases, were reinvested into newly issued government bills. A surge in new corporate bonds being issued, as corporations sought to strengthen their balance sheets, also led to several selective purchases being made at attractive yields.

The full list of portfolio holdings can be found later in this report.

Fund outlook

The COVID-19 pandemic is undoubtedly providing an uncertain backdrop for investors around the globe, with concerns around additional waves of infection being

monitored closely. Markets are paying attention to clinical trials for a vaccine, which may yield promising results that could help to gradually boost consumer confidence. Political events around the world may also lead to potential volatility, particularly the ongoing EU-UK trade deal and US-China trade talks, which continue to make the headlines.

As long-term investors, we believe there is little value in government bonds when yields are at historic lows. However, we are cognisant that additional gilt purchases might be made by the Bank of England. Inflationary pressures are absent for the foreseeable future but the enormous global stimulus packages that have been launched could rekindle inflation in the long run.

Holding our nerve in these uncertain times, applying our contrarian stance of buying assets which are temporarily out of favour, can be a difficult task whilst markets are declining. We are encouraged by the gradual recovery stock markets have delivered, since the low point they reached in March, but we remain alert to the headwinds that geopolitics and additional virus waves may present. The steep falls in stock markets, and stark underperformance of equities versus bonds, only serves to support our view of the attractiveness of equities on a longer-term basis, but patience and a long-term view is required.

Marc O'Sullivan became the Fund Manager for the Wesleyan Moderate Risk/Reward Growth Fund from 1 January 2020. Martin Lawrence continues to serve as a Director of Wesleyan Unit Trust Managers and as the Director of Investments for Wesleyan Assurance Society.

WESLEYAN MODERATE RISK / REWARD GROWTH FUND continued

GENERAL INFORMATION

Investment objective and policy

The fund aims to provide capital growth over a period of at least five years. We measure the success of the fund as outperforming a benchmark over a rolling 5-year period. We do this by comparing the investment performance, before fees and charges, to a composite benchmark which reflects the current risk rating of the fund.

The composite benchmark is composed as follows: 40% UK FTSE All Share - Total Return, 12.5% FTSE Developed ex UK - Total Return, 2.5% FTSE Emerging Markets – Total Return, 20% FTSE Actuaries UK Conventional Bonds Gilts All Stocks – Total Return, 20% iBoxx £ Corporates – Total Return Indices and 5% SONIA interest rate benchmark. Invested capital is however at risk and there is no guarantee that the objective will be attained over this or any period.

The Fund will invest predominantly in a diversified portfolio of UK and international equities, government bonds, corporate bonds and cash. Investments will be made across various sectors and may include companies anywhere in the world.

The Fund may also invest in other fixed interest and transferable securities, near cash, deposits and money-market instruments and other collective investment schemes. More than 35% of the Fund may be invested in government and public securities issued by or on behalf of or guaranteed by the Government of the United Kingdom.

The Fund may use derivatives for the purposes of efficient portfolio management.

Risk and reward profile

The risk category is based on the rate the fund's value has moved up and down in the past and has remained unchanged from the prior year.

The fund's value can be influenced by changes in stock market prices, currencies and interest rates which can be affected by factors such as political and economic events.

This risk category is calculated in line with European Securities Markets Authority (ESMA) rules using historical data.

This is not a guarantee and may not be a reliable indication of the fund's future risk and reward category.

A fund in the lowest category does not mean a 'risk free' investment.

A fuller explanation of the risk and reward profile and how it can move up and down based on the market volatility, is contained in the fund's Key Investor Information Document (KIID). KIIDs are available at www.wesleyan.co.uk/fund-prices

More information about fund performance, including benchmarks and comparisons, can be found later in this report.

Corporate unitholders information

For corporate unitholders, all of the income relating to the distribution is 100% franked.

Equalisation

Many funds receive dividends from the companies they invest in. These payments are added to the fund's cash reserve. As this reserve grows, so does the fund's net asset value, which in turn increases the offer price for the fund's units.

At the point of the fund's next dividend payment date, these dividends are paid out to the fund's unitholders and no longer form part of the fund's cash reserve. This usually causes the unit price of the fund to fall.

Group 1 and 2 (see top of the page for dates) unitholders receive the same dividend amount per unit. Group 1 payments entirely comprise of income and therefore Equalisation does not apply to this group.

Group 2 payments take into account two components as they are between two dividend dates. Part of the payment for Group 2 unitholders comes from the income that accumulated from the date of unit purchase. The second part comes from partial returns on units that were bought at a higher price when the cash reserve grew. This is known as capital repayment. It is not liable to Income Tax but must be deducted from the cost of the shares for Capital Gains Tax purposes.

WESLEYAN RISK AVERSE FUND

FUND REVIEW

This is the full-year report for the Wesleyan Risk Averse Fund, covering the year to 30 June 2020. The underlying unit price performance generated a return of 3.27% over the period, trailing the IA UK Gilts sector average which grew by 11.89% over the same period.

Whilst the difference in performance is significant it should be noted that the Wesleyan Risk Averse Fund's investment objectives changed from a money market fund – investing in short-term cash deposits – to a UK government bond (gilt) fund in January 2019. This was done with the aim of achieving a return greater than that available on cash, by investing in short-dated gilts and money market assets.

In the year to 30 June 2020, the Bank of England (BoE) base rate of interest fell from 0.75% to 0.25% on 11 March and then to 0.1% on 19 March, the level at which it ended the period. Thus, an investment in short-dated deposits would have earned just over 0.5% over this twelve-month period, below that achieved by the Risk Averse Fund.

Whilst the fund has failed to keep pace with the double-digit returns of the gilt sector, it is ahead of what unitholders would have achieved in short-dated deposits. It also exceeds what would have been achieved by investing in gilts maturing within five years, which is perhaps more comparable given the Risk Averse Fund's positioning.

The two reductions in interest rates were part of the BoE's Monetary Policy Committee's (MPC) actions to stimulate the economy, and to protect against

some of the economic effects of national lockdown measures put in place – from the middle of March – to control the spread of COVID-19.

Andrew Bailey, the new Governor of the BoE, has suggested it is possible that a negative base rate could be voted for at future MPC meetings. However, it seems more likely that the MPC will announce further tranches of Quantitative Easing (QE) before voting in favour of such a move.

Price inflation has remained low, as consumer demand has declined in several areas. An example of this is the price of oil, which fell dramatically as the global economy slowed and more people stayed at home, either to work or on furlough, during and after lockdown. At one stage, US oil prices briefly went negative as the cost of storage was deemed to outweigh the value of owning it in large quantities.

The strong performance of the gilt market was predominantly a result of a 'flight to quality' from mid-February, as investors sold equities and bought gilts. This trend was largely fuelled by investors anticipating a dramatic economic slowdown, as the BoE announced £200bn of QE in March and a further £100bn in June.

The scale of contraction in the economy is exceptionally difficult to predict with UK GDP estimated to have declined by approximately 20% in the three months to June 2020. Several economists have predicted a quick bounce back in activity (a so-called 'V-shaped' recovery) although the timing is difficult to forecast, as is the extent of the recovery.

The full list of portfolio holdings can be found later in this report.

Fund outlook

The strong price performance of gilts in recent years has seen redemption yields move below 1% across all durations. At the time of writing, no gilt yield is more than 0.8%.

We do not believe that long-dated gilts provide good value for unitholders' money with such low yields and, for the time being, they are not considered an appropriate investment for the Risk Averse Fund.

It is our intention to continue to position the fund in short-dated gilts with the average duration unlikely to exceed five years, but we will seek opportunities to lengthen the duration of the portfolio if yields rise. We will also seek short-term trading opportunities in these circumstances, to try to add value for unitholders, and estimate that similar trading opportunities contributed more than 0.25% to the fund's return so far in the current calendar year.

Financial markets face many uncertainties in the immediate future. These include ongoing Brexit negotiations, the US presidential election and geopolitical tensions between major global powers, as well as recovering from the measures imposed to protect the health of the world's population from the worst effects of COVID-19. In these circumstances, we expect interest rates to remain at low levels for several years, and so we expect that unitholders will see low returns for the foreseeable future.

Paul Burton became the Fund Manager for the Wesleyan Risk Averse Fund from 1 January 2020.

GENERAL INFORMATION

Investment objective and policy

The fund aims to provide capital growth over a period of at least five years. We measure the success of the fund as outperforming a benchmark over a rolling 5- year period. We do this by comparing the investment performance, before fees and charges, to a composite benchmark which reflects the current risk rating of the fund.

The composite benchmark is composed as follows: 90% FTSE Actuaries UK Conventional Bonds Gilts All Stocks – Total Return, 5% FTSE Actuaries UK-Index Linked Gilts All Stocks – Total Return Indices and 5% SONIA interest rate benchmark. Invested capital is however at risk and there is no guarantee that the objective will be attained over this or any period.

The Fund will invest predominantly through Sterling denominated (or hedged back to Sterling) government backed securities, with a rating the same or higher than that of the UK, with at least 80% invested in UK government securities (Gilts).

The Fund may also invest in other fixed interest and transferable securities, near cash, deposits, money-market instruments and other collective investment schemes.

More than 35% of the Fund may be invested in government and public securities issued by or on behalf of or guaranteed by the Government of the United Kingdom.

Risk and reward profile

The risk category is based on the rate the fund’s value has moved up and down in the past and has remained unchanged from the prior year.

The fund’s value can be influenced by changes in stock market prices, currencies and interest rates which can be affected by factors such as political and economic events.

This risk category is calculated in line with European Securities Markets Authority (ESMA) rules using historical data.

This is not a guarantee and may not be a reliable indication of the fund’s future risk and reward category.

A fund in the lowest category does not mean a ‘risk free’ investment.

A fuller explanation of the risk and reward profile and how it can move up and down based on the market volatility, is contained in the fund’s Key Investor Information Document (KIID). KIIDs are available at www.wesleyan.co.uk/fund-prices

More information about fund performance, including benchmarks and comparisons, can be found later in this report.

Corporate unitholders information

For corporate unitholders, all of the income relating to the distribution is 100% unfranked.

Equalisation

Many funds receive dividends from the companies they invest in. These payments are added to the fund's cash reserve. As this reserve grows, so does the fund's net asset value, which in turn increases the offer price for the fund's units.

At the point of the fund's next dividend payment date, these dividends are paid out to the fund's unitholders and no longer form part of the fund's cash reserve. This usually causes the unit price of the fund to fall.

Group 1 and 2 (see top of the page for dates) unitholders receive the same dividend amount per unit. Group 1 payments entirely comprise of income and therefore Equalisation does not apply to this group.

Group 2 payments take into account two components as they are between two dividend dates. Part of the payment for Group 2 unitholders comes from the income that accumulated from the date of unit purchase. The second part comes from partial returns on units that were bought at a higher price when the cash reserve grew. This is known as capital repayment. It is not liable to Income Tax but must be deducted from the cost of the shares for Capital Gains Tax purposes.

WESLEYAN UK GROWTH FUND

FUND REVIEW

This is the full-year report for the Wesleyan UK Growth Fund covering the year to 30 June 2020. The underlying unit price performance generated a return of -19%, underperforming the IA UK All Companies sector average which fell by 11%* over the same period.

The global COVID-19 pandemic has inflicted enormous human, economic and financial hardship, with many nations forced to close their economies. The UK stock market has been among the worst-performing global markets during the year to 30 June, a feature of the cyclical sectors (such as the financial, energy and leisure sectors) which form a high proportion of the overall market. UK equities plummeted as concerns around COVID-19 grew and the gravity of the impact from 'lockdown' measures started to become apparent.

This backdrop has translated into a painful year for the fund's performance, as the share prices of those companies which are more dependent on economic growth posted substantial declines as the economy fell into recession. The UK economy is estimated to have shrunk by around 17% in the first half of 2020, with several sectors faring much worse than others. Central banks, such as the Bank of England (BoE), announced emergency interest rate cuts and additional government bond purchases, with the intention of pushing interest rates down to effectively zero. However, low interest rates tend to reduce profitability for many

of the financial companies held within the fund – most of which are well-known banks and insurance firms. Despite this, these banks and insurers remain well-capitalised and have been stress-tested for a number of adverse scenarios.

Other large sectors of the UK stock market were severely affected by the pandemic and global 'lockdown' policies. For example, deserted streets, school closures and a rise in the number of people working from home resulted in a swift decline in demand for energy products and services. Travel and leisure companies have also detracted from the fund's performance, as those businesses were forced to press the 'pause' button while shutters were pulled down. Demand for new planes and vehicles also evaporated, forcing highly-skilled specialist engineers to mothball production facilities, which transmitted shockwaves through many industrial supply chains and sent share prices sharply lower for those affected companies.

During the year, the fund reduced positions in AstraZeneca, Mitchells & Butlers and Next after strong performances. The fund also exited its Merlin Entertainments (theme park operator) holding, following a successful takeover. The fund initiated a new position in Bodycote and added to its holding of Senior, both of which are industrial engineering companies. Purchases have also been made in UK housebuilders Persimmon and Taylor Wimpey, during pronounced periods of

weakness, with the expectation that they should perform well over the longer term.

The full list of portfolio holdings can be found later in this report.

Fund outlook

The UK stock market has undoubtedly suffered from the fallout of the pandemic, although it should be noted that markets have, at the time of writing, regained some ground from the depths of the immediate sell-off. Global attention is now – unsurprisingly – focused on the threat of additional infection waves and this is something we are monitoring closely. We remain cautiously optimistic that medical and scientific advances can help to contain the virus and provide a much-needed confidence boost to help reignite growth prospects.

The pace of stock market recoveries remains very difficult to forecast, because there will inevitably be scarring from the current economic climate, particularly from rising unemployment and the requirement for business models to adapt. Volatility is also likely to remain a notable feature over the course of 2020 because of the current pandemic, as well as other factors such as the EU-UK trade talks and global geopolitics.

It is clear that the sharp price falls we have witnessed will have been very disappointing for our unitholders. However, we ultimately believe, as long-term investors, that unitholders' patience will be rewarded once an economic recovery gains traction.

GENERAL INFORMATION

Investment objective and policy

The fund aims to provide capital growth over a period of at least five years. We measure the success of the fund as outperforming a benchmark over a rolling 5-year period. We do this by comparing the investment performance, before fees and charges, to a composite benchmark which reflects the current risk rating of the fund.

The composite benchmark is composed as follows: 95% FTSE All Share - Total Return Index, and 5% SONIA interest rate benchmark. Invested capital is however at risk and there is no guarantee that the objective will be attained over this or any period.

The Fund will invest predominantly in a diversified portfolio of UK equities. Under normal circumstances the emphasis will be on equity shares in the UK. The Fund may invest in various sectors.

The Fund may also invest in fixed interest and other transferable securities (including non-UK equities), cash, near cash, deposits, money-market instruments and other collective investment schemes.

The Fund may use derivatives for the purposes of efficient portfolio management.

Risk and reward profile

The risk category is based on the rate the fund’s value has moved up and down in the past and has increased from the prior year.

The fund’s value can be influenced by changes in stock market prices, currencies and interest rates which can be affected by factors such as political and economic events.

This risk category is calculated in line with European Securities Markets Authority (ESMA) rules using historical data.

This is not a guarantee and may not be a reliable indication of the fund’s future risk and reward category.

A fund in the lowest category does not mean a ‘risk free’ investment.

A fuller explanation of the risk and reward profile and how it can move up and down based on the market volatility, is contained in the fund’s Key Investor Information Document (KIID). KIIDs are available at www.wesleyan.co.uk/fund-prices

More information about fund performance, including benchmarks and comparisons, can be found later in this report.

Group 1	3.8072	-	3.8072	7.4987
Group 2	3.5339	0.2733	3.8072	7.4987

Corporate unitholders information

For corporate unitholders, all of the income relating to the distribution is 100% franked.

Equalisation

Many funds receive dividends from the companies they invest in. These payments are added to the fund's cash reserve. As this reserve grows, so does the fund's net asset value, which in turn increases the offer price for the fund's units.

At the point of the fund's next dividend payment date, these dividends are paid out to the fund's unitholders and no longer form part of the fund's cash reserve. This usually causes the unit price of the fund to fall.

Group 1 and 2 (see top of the page for dates) unitholders receive the same dividend amount per unit. Group 1 payments entirely comprise of income and therefore Equalisation does not apply to this group.

Group 2 payments take into account two components as they are between two dividend dates. Part of the payment for Group 2 unitholders comes from the income that accumulated from the date of unit purchase. The second part comes from partial returns on units that were bought at a higher price when the cash reserve grew. This is known as capital repayment. It is not liable to Income Tax but must be deducted from the cost of the shares for Capital Gains Tax purposes.

*Collectively, comprises of the Authorised Fund Manager Report.

NOTES TO THE TRUST'S FINANCIAL STATEMENTS

1. ACCOUNTING POLICIES

a. Basis of preparation

The financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments, in compliance with the Financial Conduct Authority's Collective Investments Schemes sourcebook. They have been prepared in accordance with applicable UK accounting standards, Trust Deed and in accordance with FRS 102 and in accordance with the Statement of Recommended Practice for Financial Statements of UK Authorised Funds issued by the Investment Association (IA) in May 2014 (the 2014 SORP) and amended in June 2017. Unless otherwise stated all accounting policies are consistent with those of the prior year.

These financial statements are prepared on a going concern basis. The Manager has made an assessment of the Funds' ability to continue as a going concern, and is satisfied it has the resources to continue in business for the foreseeable future and is not aware of any material uncertainties that may cast significant doubt on this assessment. This assessment is made as at the date of issue of these financial statements covering a period of at least 12 months and considers liquidity, declines in global capital markets, known redemption levels, expense projections, key service provider's operational resilience, and the impact of COVID-19.

As stated in the Statement of the Manager's Responsibilities in relation to the Report and Financial Statements of the Trust on page 143, the Manager continues to adopt the going concern basis in the preparation of the financial statements of the Trust.

The accounting policies outlined below have been applied on a consistent basis throughout the year.

b. Recognition of revenue and interest payable

All dividends from companies declared ex-dividend by 30 June 2020, deposit interest and interest payable, are accrued to 30 June 2020 and are included in the Statement of Total Return.

Bond revenue is accounted for on an effective yield basis, calculated with reference to the purchase price.

Underwriting commission is taken to revenue and recognised when the issue takes place, unless the Trust is required to take up all or some of the underwritten shares. In this case the commission is used to reduce the cost of the shares.

c. Treatment of stock and special dividends

The ordinary element of stock dividends is treated as revenue and forms part of the distribution. In the case of an enhanced stock dividend, the value of the enhancement is treated as capital and does not form part of the distribution.

Special dividends are treated as revenue or capital depending on the facts of each particular case.

d. Treatment of expenses

All expenses are charged to revenue, except for Wesleyan Moderate-High Risk/Reward Income Fund where the manager's periodic charge is charged to capital. Expenses relating to the purchase or sale of investments are charged to capital.

e. Distribution policies

Any revenue available for distribution will be paid as either income or accumulated distributions.

The manager's periodic charge in Wesleyan Moderate-High Risk/Reward Income Fund is charged against capital for the purposes of calculating the amount available for distribution.

All of the net revenue available for distribution at the end of the year will be distributed or reinvested in the Trust.

f. Basis of valuation of investments

The listed investments of the Trust have been valued at bid-value at closing on 30 June 2020, being the last valuation point of the year, net of any accrued interest which is included in the balance sheet as a revenue-related item and is in accordance with the recommendations contained in the 2014 SORP.

Any unlisted, delisted, suspended or unapproved securities have been valued at the Manager's best estimate of fair value.

g. Foreign currencies

Transactions in foreign currencies are translated into Sterling at the rates ruling at the dates of the transactions. Assets and liabilities expressed in foreign currencies are translated at the rates ruling at closing on 30 June 2020, being the last valuation point of the year.

h. Taxation

The charge for taxation is based on the results for the year. In general, the tax accounting treatment follows that of the original amount. Deferred tax is provided on all timing differences that have originated but not reversed at the balance sheet date other than those recorded as permanent differences.

Deferred tax is provided at the average rate of tax expected to apply.

Deferred tax assets and liabilities are not discounted to reflect the time value of money.

Note that deferred tax assets are recognised only to the extent they are regarded as recoverable.

i. Income Distributions from Real Estate Investment Trusts (REITs)

Income distributions from Real Estate Investment Trusts (UK REITs) will be split into two parts, a Property Income Distribution (PID) made up of rental revenue and a non-PID element, consisting of non-rental revenue. The PID element is subject to Corporation Tax as schedule A revenue, while the UK dividend will be treated as franked revenue.

5. TAXATION

	30 June 2020	30 June 2019
Wesleyan International Growth Fund	£	£
a) Analysis of charge in the year:		
Overseas tax	59,802	68,768
Reclaimable tax written off	7,247	-
Total current tax for the year (see note 5b)	67,049	68,768
b) Factors affecting current tax charge for the year:		
The tax assessed for the year is higher than the standard rate of corporation tax in the UK for an authorised unit trust (20%) (2019: 20%).		
The differences are explained below:	£	£
Net revenue before taxation	105,546	178,602
Corporation tax at 20% (2019: 20%)	21,109	35,720
Effects of:		
Revenue not subject to taxation	(130,608)	(141,632)
Movement in excess management expenses	109,499	105,912
Irrecoverable overseas tax	59,802	68,768
Reclaimable tax written off	7,247	-
Current tax charge for the year (see note 5a)	67,049	68,768
c) Factors affecting future tax charge:		
At 30 June 2020 there is a potential deferred tax asset of £415,191 (30 June 2019: £305,692) in relation to surplus management expenses. It is unlikely the fund will generate sufficient taxable profits in the future to utilise this amount and therefore no deferred tax asset has been recognised in the year.		

	£	£
Wesleyan Low Risk/Reward Growth Fund		
a) Analysis of charge in the year:		
Corporation tax	2,988	3,165
Overseas tax	1,374	-
Reclaimable tax written off	510	841
Total current tax for the year (see note 5b)	4,872	4,006
b) Factors affecting current tax charge for the year:		
The tax assessed for the year is lower than the standard rate of corporation tax in the UK for an authorised unit trust (20%) (2019: 20%).		
The differences are explained below:	£	£
Net revenue before taxation	205,448	233,796
Corporation tax at 20% (2019: 20%)	41,090	46,759
Effects of:		
Revenue not subject to taxation	(54,311)	(51,734)
Movement in excess management expenses	12,891	4,849
Taxable property income distributions	2,988	3,165
Irrecoverable overseas tax	1,374	841
Reclaimable tax written off	510	-
Taxable adjustment for UK index-linked gilts	330	126
Current tax charge for the year (5a)	4,872	4,006
c) Factors affecting future tax charge:		
At 30 June 2020 there is a potential deferred tax asset of £29,416 (30 June 2019: £16,525) in relation to surplus management expenses. It is unlikely the fund will generate sufficient taxable profits in the future to utilise this amount and therefore no deferred tax asset has been recognised in the year.

Irrecoverable overseas tax on capital special dividend	444	-
Reclaimable tax written off	16,746	-
Current tax charge for the year (see note 5a)	25,069	23,318
c) Factors affecting future tax charge:		
At 30 June 2020 there is a potential deferred tax asset of £691,324 (30 June 2019: £529,118) in relation to surplus management expenses. It is unlikely the fund will generate sufficient taxable profits in the future to utilise this amount and therefore no deferred tax asset has been recognised in the year.

11. CAPITAL COMMITMENTS AND CONTINGENT LIABILITIES

There were no material capital commitments or contingent liabilities as at the balance sheet date (30 June 2019 : £nil).

12. RELATED PARTY TRANSACTIONS

Wesleyan Unit Trust Managers Ltd, as Manager, is a related party, and acts as principal in respect of all transactions of units in the Trust.

The aggregate monies received through issue and paid on cancellation are disclosed in the Statement of Change in net assets attributable to unitholders. Any amounts due to, or from Wesleyan Unit Trust Managers Ltd at the end of the accounting year are disclosed in notes 6 (distribution), 8 (debtors) and 9 (other creditors).

Wesleyan Unit Trust Managers Ltd did not enter into securities transactions with the Trust during the year.

Wesleyan International Growth Fund

Amounts paid to Wesleyan Unit Trust Managers Ltd in respect of Manager's periodic charge are disclosed in note 4 (expenses). £38,560 was due to the Manager at the year end (30 June 2019: £35,619).

Wesleyan Low Risk Reward Growth Fund

Amounts paid to Wesleyan Unit Trust Managers Ltd in respect of Manager's periodic charge are disclosed in note 4 (expenses). £28,496 was due to the Manager at the year end (30 June 2019: £22,641).

Wesleyan Moderate-High Risk/Reward Income Fund

Amounts paid to Wesleyan Unit Trust Managers Ltd in respect of Manager's periodic charge are disclosed in note 4 (expenses). £20,979 was due to the Manager at the year end (30 June 2019: £18,116).

Wesleyan Moderate Risk/Reward Growth Fund

Amounts paid to Wesleyan Unit Trust Managers Ltd in respect of Manager's periodic charge are disclosed in note 4 (expenses). £47,389 was due to the Manager at the year end (30 June 2019: £36,810).

Wesleyan Risk Averse Fund

Amounts paid to Wesleyan Unit Trust Managers Ltd in respect of Manager's periodic charge are disclosed in note 4 (expenses). £201 was due to the Manager at the year end (30 June 2019: £165).

Wesleyan UK Growth Fund

Amounts paid to Wesleyan Unit Trust Managers Ltd in respect of Manager's periodic charge are disclosed in note 4 (expenses). £52,415 was due to the Manager at the year end (30 June 2019: £61,110).

NOTES TO THE TRUST'S FINANCIAL STATEMENTS continued

13. RISK DISCLOSURES ON FINANCIAL INSTRUMENTS

In pursuing its investment objectives the Trust holds a number of financial instruments. The Trust's financial instruments comprise securities and other investments, cash balances, debtors and creditors that arise directly from its operations, for example, amounts receivable for creations and payable on liquidations, and debtors for accrued revenue.

The Trust has little exposure to credit or cash flow risk as all its transactions are settled in cash against delivery and therefore the failure of a third-party broker will not give rise to a loss. There are no material borrowings or unlisted securities and so there is little exposure to liquidity risk.

The main risks it faces arising from its financial instruments are (i) foreign currency risk; (ii) market price risk, being the risk that the value of holdings will fluctuate as a result of changes in market prices caused by factors other than interest rate or currency movement; (iii) interest rate risk and (iv) liquidity risk (v) credit risk.

The Manager's policies for managing these risks are summarised below and have been applied throughout the current and preceding year.

Risk management process

The stock selection and asset allocations of the portfolios are reviewed at periodic Board meetings. Consideration is given to whether the risk associated with the exposure to particular investment categories or stocks is prudent in the context of the investment objective. The Investment Manager has the responsibility for monitoring existing portfolios in accordance with an overall investment category deviation parameter and seeks to ensure that the portfolios as a whole meet an acceptable risk/reward profile.

(i) Foreign Currency risk

Wesleyan International Growth Fund

A substantial proportion of net assets of the Trust are denominated in currencies other than Sterling, with the effect that the balance sheet and total return can be affected by currency movements.

Currency risk profile

The currency risk profile of the Trust's net assets and liabilities at the balance sheet date was as follows:

Currency	Net Currency assets 30 June 2020			Net Currency assets 30 June 2019		
	Monetary exposures	Non-monetary exposures	Total	Monetary exposures	Non-monetary exposures	Total
	£	£	£	£	£	£
Canadian Dollar	6,427	-	6,427	6,503	-	6,503
Danish Krone	58,679	954,284	1,012,963	45,886	668,512	714,398
Euro	121,400	6,452,967	6,574,367	343,185	6,524,638	6,867,823
Japanese Yen	48,882	-	48,882	47,521	-	47,521
Sterling	298,447	7,734,723	8,033,170	132,447	6,786,710	6,919,157
Swedish Krona	1,294	-	1,294	1,263	-	1,263
Swiss Franc	84,232	1,263,239	1,347,471	57,382	1,085,660	1,143,042
US Dollar	183,663	14,807,577	14,991,240	157,146	15,819,916	15,977,062
Total	803,024	31,212,790	32,015,814	791,333	30,885,436	31,676,769

If Sterling to foreign currency exchange rates had increased by 10% as at the balance sheet date, the net asset value of the Trust would have decreased by £2,398,264 (30 June 2019 : £2,475,761). A 10% decrease would have an equal and opposite effect. These calculations assume all other variables remain constant.

Wesleyan Low Risk/Reward Growth Fund

A proportion of net assets of the Trust are denominated in currencies other than Sterling, with the effect that the balance sheet and total return can be affected by currency movements.

Currency risk profile

The currency risk profile of the Trust's net assets and liabilities at the balance sheet date was as follows:

Currency	Net Currency assets 30 June 2020			Net Currency assets 30 June 2019		
	Monetary exposures	Non-monetary exposures	Total	Monetary exposures	Non-monetary exposures	Total
	£	£	£	£	£	£
Euro	25,724	159,299	185,023	16,768	195,476	212,244
Sterling	1,219,172	24,822,630	26,041,802	951,026	20,414,200	21,365,226
US Dollar	3,244	-	3,244	1,770	-	1,770
Total	1,248,140	24,981,929	26,230,069	969,564	20,609,676	21,579,240

If Sterling to foreign currency exchange rates had increased by 10% as at the balance sheet date, the net asset value of the Trust would have decreased by £18,827 (30 June 2019 : £21,401). A 10% decrease would have an equal and opposite effect. These calculations assume all other variables remain constant.

NOTES TO THE TRUST'S FINANCIAL STATEMENTS continued

Wesleyan Moderate-High Risk/Reward Income Fund

A substantial proportion of net assets of the Trust are denominated in currencies other than Sterling, with the effect that the balance sheet and total return can be affected by currency movements.

Currency risk profile

The currency risk profile of the Trust's net assets and liabilities at the balance sheet date was as follows:

Currency	Net Currency assets 30 June 2020			Net Currency assets 30 June 2019		
	Monetary exposures £	Non-monetary exposures £	Total £	Monetary exposures £	Non-monetary exposures £	Total £
Danish Krone	9,915	338,572	348,487	4,323	258,424	262,747
Euro	49,186	696,232	745,418	29,552	810,236	839,788

Swiss Franc	4,846	61,680	66,526	3,535	48,676	52,211
US Dollar	8,514	1,613,035	1,621,549	6,554	1,266,652	1,273,206
Total	1,498,495	14,821,144	16,319,639	960,813	14,107,459	15,068,272

If Sterling to foreign currency exchange rates had increased by 10% as at the balance sheet date, the net asset value of the Trust would have decreased by £278,198 (30 June 2019 : £242,795). A 10% decrease would have an equal and opposite effect. These calculations assume all other variables remain constant.

Wesleyan Moderate Risk/Reward Growth Fund

A substantial proportion of net assets of the Trust are denominated in currencies other than Sterling, with the effect that the balance sheet and total return can be affected by currency movements.

Currency risk profile

The currency risk profile of the Trust's net assets and liabilities at the balance sheet date was as follows:

Currency	Net Currency assets 30 June 2020			Net Currency assets 30 June 2019		
	Monetary exposures £	Non-monetary exposures £	Total £	Monetary exposures £	Non-monetary exposures £	Total £
Euro	55,095	2,400,123	2,455,218	233,874	1,902,678	2,136,552
Sterling	2,197,826	32,099,694	34,297,520	1,405,158	26,523,630	27,928,788
Swiss Franc	18,928	250,366	269,294	13,649	197,580	211,229
US Dollar	250,072	2,948,389	3,198,461	176,513	2,470,746	2,647,259
Total	2,521,921	37,698,572	40,220,493	1,829,194	31,094,634	32,923,828

If Sterling to foreign currency exchange rates had increased by 10% as at the balance sheet date, the net asset value of the Trust would have decreased by £592,297 (30 June 2019 : £499,504). A 10% decrease would have an equal and opposite effect. These calculations assume all other variables remain constant.

Wesleyan Risk Averse Fund

No portion of net assets of the Trust are denominated in currencies other than sterling, with the effect that the balance sheet and total return can be affected by currency movements.

Wesleyan UK Growth Fund

A proportion of net assets of the Trust are denominated in currencies other than Sterling, with the effect that the balance sheet and total return can be affected by currency movements.

Currency risk profile

The currency risk profile of the Trust's net assets and liabilities at the balance sheet date was as follows:

Currency	Net Currency assets 30 June 2020			Net Currency assets 30 June 2019		
	Monetary exposures	Non-monetary exposures	Total	Monetary exposures	Non-monetary exposures	Total
	£	£	£	£	£	£
Euro	69,294	-	69,294	147,264	-	147,264
Sterling	880,839	49,727,298	50,608,137	1,030,072	64,353,202	65,383,274
US Dollar	9,933	-	9,933	142,371	-	142,371
Total	960,066	49,727,298	50,687,364	1,319,707	64,353,202	65,672,909

If Sterling to foreign currency exchange rates had increased by 10% as at the balance sheet date, the net asset value of the Trust would have decreased by £7,923 (30 June 2019 : £28,963). A 10% decrease would have an equal and opposite effect. These calculations assume all other variables remain constant.

(ii) Market Price Risk

The Trust's investment portfolio is exposed to market price fluctuations which are monitored by the Manager in pursuance of the investment objective and policy set out in the general information page for each fund.

Adherence to investment guidelines and to investment and borrowing powers set out in the Trust Deed, Scheme Particulars and in the rules of the FCA's Collective Investment Schemes Sourcebook mitigates the risk of excessive exposure to any particular type of security or issuer.

Price Risk Sensitivity**Wesleyan International Growth Fund**

A 10% increase in the value of the Fund's portfolio would have the effect of increasing the net assets by £3,121,279 (30 June 2019: £3,088,544). A 10% decrease would have an equal and opposite effect.

Wesleyan Low Risk/Reward Growth Fund

A 10% increase in the value of the Fund's portfolio would have the effect of increasing the net assets by £2,498,193 (30 June 2019: £2,060,968). A 10% decrease would have an equal and opposite effect.

Wesleyan Moderate-High Risk/Reward Income Fund

A 10% increase in the value of the Fund's portfolio would have the effect of increasing the net assets by £1,482,114 (30 June 2019: £1,410,746). A 10% decrease would have an equal and opposite effect.

Wesleyan Moderate Risk/Reward Growth Fund

A 10% increase in the value of the Fund's portfolio would have the effect of increasing the net assets by £3,769,857 (30 June 2019: £3,109,463). A 10% decrease would have an equal and opposite effect.

Wesleyan Risk Averse Fund

A 10% increase in the value of the Trust's portfolio would have the effect of increasing the net assets by £261,076 (30 June 2019: £248,772). A 10% decrease would have an equal and opposite effect.

Wesleyan UK Growth Fund

A 10% increase in the value of the Fund's portfolio would have the effect of increasing the net assets by £4,972,730 (30 June 2019: £6,435,320). A 10% decrease would have an equal and opposite effect.

NOTES TO THE TRUST'S FINANCIAL STATEMENTS continued

(iii) Interest rate risk

The interest rate risk profile of the Trust's financial assets and liabilities at 30 June 2020 compared to the previous year end was:

Wesleyan International Growth Fund

The only significant interest-bearing assets are cash balances of £723,060 (30 June 2019: £805,470), which earn interest by reference to LIBOR or its overseas equivalent.

There are no significant interest-paying liabilities (30 June 2019: £nil).

There is no material difference between the value of the financial assets and liabilities, as shown in the balance sheet, and their fair value.

Wesleyan Low Risk/Reward Growth Fund

If interest rates had increased by 10% as at the balance sheet date, the net asset value of the Trust would have increased by £237,384 (30 June 2019 : £200,737). A 10% decrease would have an equal and opposite effect. These calculations assume all other variables remain constant.

Changes in interest rates would have no material impact to the valuation of fixed rate financial assets or liabilities as at the balance sheet date.

Wesleyan UK Growth Fund

The only significant interest-bearing assets are cash balances of £856,091 (30 June 2019: £803,139), which earn interest by reference to LIBOR or its overseas equivalent.

There are no significant interest-paying liabilities (30 June 2019: £nil).

There is no material difference between the value of the financial assets and liabilities, as shown in the balance sheet, and their fair value.

(iv) Inflation risk

Inflation erodes the real (buying power) value of future income payments or capital repayment. Consequently, where these future payments are fixed in nominal terms, as is the case with bonds, a rise in inflation will reduce the present value of the financial instrument in question. The further in the future that the payments are to be made, the greater the negative impact will be of an increase in inflation, since the erosion of the value will accumulate over a greater number of years. Hence, fixed rate bonds with many years to maturity will be most at risk from a rise in inflation. The returns from cash deposits can vary and may even benefit from an increase in anticipated inflation if it is associated with an increase in current interest rates. As a result, cash holdings may or may not suffer from an increase in anticipated inflation.

(v) Liquidity risk

The Fund's assets are comprised of mainly readily realisable securities. If insufficient cash is available to finance unitholder redemptions then securities held by the Fund may need to be sold. The risk of low market liquidity, through reduced trading volumes, may affect the ability of the Fund to trade financial instruments at values previously indicated by financial brokers. From time to time, liquidity may also be affected by stock specific or economic events. To manage these risks the Manager performs market research in order to achieve the best price for any transactions entered into on behalf of the Fund. All stocks are valued daily but those stocks identified as being less liquid are reviewed on a regular basis for pricing accuracy.

(vi) Credit risk

The Fund's transactions in securities expose it to the risk that the counterparty will not deliver the investment for a purchase or the cash for a sale. To minimise this, the Fund only deals with an approved list of brokers maintained by the Manager.

In the case of share, commissions and taxes are paid by the Fund on each transaction. In addition, there is a dealing spread between the buying and selling prices of the underlying investments. Unlike shares, other types of investments (such as bonds, money market instruments, derivatives) have no separately identifiable transaction costs; these costs form part of the dealing spread. Dealing spreads vary considerably depending on the transaction value and market sentiment. At the balance sheet date the average dealing spread was 0.23% (30 June 2019: 0.17%).

Commissions and taxes as % of average Net Assets

Commissions	0.00%
Taxes	0.02%
Expenses	0.00%

In the case of share, commissions and taxes are paid by the Fund on each transaction. In addition, there is a dealing spread between the buying and selling prices of the underlying investments. Unlike shares, other types of investments (such as bonds, money market instruments, derivatives) have no separately identifiable transaction costs; these costs form part of the dealing spread. Dealing spreads vary considerably depending on the transaction value and market sentiment. At the balance sheet date the average dealing spread was 0.28% (30 June 2019: 0.12%).

15. Fair Value of Investments

The fair value of investments has been determined using the following hierarchy :

- Category 1 The unadjusted quoted price in an active market for identical assets or liabilities that the entity can access at the measurement date.
- Category 2 Inputs other than quoted prices included within Level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly.
- Category 3 Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability.

AUTHORISED FUND MANAGER'S RESPONSIBILITIES STATEMENT

The Collective Investment Schemes source book ("COLL"), as issued (and amended) by the Financial Conduct Authority (FCA) requires the Manager to prepare the annual report and financial statements for each financial year which give a true and fair view of the financial affairs of the Scheme and of its net revenue and net losses for the year.

In preparing the financial statements the Manager is required to:

- a) Select suitable accounting policies and then apply them consistently.
- b) Comply with requirements of the Statement of Recommended Practice for Authorised Funds issued by the Investment Management Association in May 2014. Previously the requirements for the Statement of Recommended Practice (SORP) issued by the Investment Management Association had been applied as amended in June 2017.
- c) Follow generally accepted accounting principles and applicable net asset value accounting standards.
- d) Keep proper accounting records which enable it to demonstrate that the financial statements as prepared comply with the above requirements.
- e) Make judgements and estimates that are reasonable and prudent.
- f) Prepare the financial statements on the going concern basis unless it is inappropriate to presume that this Scheme will continue in operation.

The Manager is responsible for the management of the Scheme in accordance with its Trust Deed, Prospectus and COLL. The Manager is also responsible for taking reasonable steps for the prevention and detection of fraud and other irregularities. The Manager confirms that suitable accounting policies have been used and applied consistently and reasonable and prudent judgement and estimates have been made in the preparation of the financial statements for the year ended 30 June 2020. The Manager also confirms that applicable accounting standards have been followed.

UCITS V Remuneration (Unaudited)

Here at Wesleyan Group of companies, we are required to report annually on our Remuneration Governance Process as well as detailing our Remuneration Policies and Practices set as part of the Remuneration Code. This has been implemented by FCA under the Capital Requirements Directive and the Financial Service Act 2010.

The Remuneration Committee here at Wesleyan Group of companies has established a remuneration policy ensuring the UCITS Directive requirements are met for UCITS Material Risk Takers (UCITS MRTs). UCITS MRTs here at WUTM comprise of individuals in roles that significantly affect risks of WUTM or any UCITS fund that we manage. These roles have been identified in accordance with requirements set out by the UCITS Directive as well as guidance issued by the European Securities and Market Authority.

Meeting on a regular basis, our Remuneration Committee establish the Group's remuneration principles and oversee our governance. Together with the WUTM Board, WUTM remuneration strategy is also reviewed at least on an annual basis. Our Committee is comprised of three non-Executive Directors. Our Committee is also responsible for remuneration on our senior level employees with a specific review on identified Code Staff such as heads of Control Functions.

Remuneration total expenditure is determined based on a share in profit ratio. It measures fixed pay such as salary and benefits as well as variable pay such as performance against the pre-bonus profit of the Group. It is also based on a total compensation ratio that measures total remuneration expenses against net income. By doing this our employee interests are aligned with our performance. When determining our remuneration expenditure each year, the strength and sustainability of the Group is factored in alongside reports on risk, legal and compliance matters from heads of the Control Functions in question.

The remuneration data below reflects amounts paid for the year ended 30 June 2020 for WUTM.

The total remuneration paid by WUTM to its staff and those staff in its parent undertaking that undertake duties relating to WUTM was £563,576 and all relates to fixed remuneration.

The following relates to UCITS MRTs of WUTM who were employed by and provided services to other entities of Wesleyan Group of Companies for the year ended 30 June 2020. Portions of their remuneration is included in the aggregated figures below, based on apportionment of their roles attributed to WUTM or the UCITS fund that it manages. The aggregated total remuneration paid to the 33 UCITS MRTs of WUTM was £563,576, of which £371,946 was paid to senior management, £172,814 to MRTs deemed to be risk takers of WUTM or the UCITS fund that it manages and £18,816 to other UCITS MRTs.

More information on our Remuneration Policies and Practices is available at www.wesleyan.co.uk/ucits

Assessment of Value

WUTM separately produces an assessment of value report covering each unit class of the funds it manages. This will be published on 31 October 2020 and available at www.wesleyan.co.uk/about-us/mediacentre/WUTM-assessment-of-value-report

RESPONSIBILITIES AND REPORT OF THE TRUSTEE

STATEMENT OF THE TRUSTEE'S RESPONSIBILITIES IN RESPECT OF THE SCHEME AND REPORT OF THE DEPOSITARY TO THE UNITHOLDERS OF THE WESLEYAN UNIT TRUST MANAGERS ("THE TRUST") FOR THE PERIOD ENDED 30TH JUNE 2020

The Depositary in its capacity as Trustee of Wesleyan Authorised Unit Trust must ensure that the Trust is managed in accordance with the Financial Conduct Authority's Collective Investment Schemes Sourcebook, the Financial Services and Markets Act 2000, as amended, (together "the Regulations"), the Trust Deed and Prospectus (together "the Scheme documents") as detailed below.

The Depositary must in the context of its role act honestly, fairly, professionally, independently and in the interests of the Trust and its investors.

The Depositary is responsible for the safekeeping of all custodial assets and maintaining a record of all other assets of the Trust in accordance with the Regulations.

The Depositary must ensure that:

- a) the Trust's cash flows are properly monitored and that cash of the Trust is booked in cash accounts in accordance with the Regulations;
- b) the sale, issue, repurchase, redemption and cancellation of units are carried out in accordance with the Regulations;
- c) the value of units of the Trust are calculated in accordance with the Regulations;
- d) any consideration relating to transactions in the Trust's assets is remitted to the Trust within the usual time limits;
- e) the Trust's income is applied in accordance with the Regulations; and
- f) the instructions of the Authorised Fund Manager ("the AFM"), which is the UCITS Management Company, are carried out (unless they conflict with the Regulations).

The Depositary also has a duty to take reasonable care to ensure that the Trust is managed in accordance with the Regulations and the Scheme documents of the Trust in relation to the investment and borrowing powers applicable to the Trust.

Having carried out such procedures as we considered necessary to discharge our responsibilities as Depositary of the Trust, it is our opinion, based on the information available to us and the explanations provided, that, in all material respects the Trust, acting through the AFM:

- i) has carried out the issue, sale, redemption and cancellation, and calculation of the price of the Trust's units and the application of the Trust's income in accordance with the Regulations and the Scheme documents of the Trust; and
- ii) has observed the investment and borrowing powers and restrictions applicable to the Trust in accordance with the Regulations and the Scheme documents of the Trust.

INDEPENDENT AUDITOR'S REPORT TO THE UNIT HOLDERS OF WESLEYAN AUTHORISED UNIT TRUST

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS

Opinion

We have audited the financial statements of Wesleyan Authorised Unit Trust ("the Trust") comprising each of its funds, for the year ended 30 June 2020 which comprise the Statement of Total Return and the Statement of Change in Net Assets Attributable to Unit Holders together with the Balance Sheet for each of the Trust's funds, the accounting policies and risk profile of the Trust, the related notes for each fund and the Distribution Tables, including a summary of significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards (United Kingdom Generally Accepted Accounting Practice) including FRS 102 'The Financial Reporting Standard applicable to the UK and Republic of Ireland'.

In our opinion, the financial statements:

- ▶ give a true and fair view of the financial position of the Trust comprising each of its funds as at 30 June 2020 and of the net revenue and the net capital gains/losses on the scheme property of the Trust comprising each of its funds for the year then ended; and
- ▶ have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice including FRS 102 'The Financial Reporting Standard applicable in the UK and Republic of Ireland'.

BASIS FOR OPINION

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report below. We are independent of the Trust in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

CONCLUSIONS RELATING TO GOING CONCERN

In relation to the Trust, we have nothing to report in respect of the following matters in relation to which the ISAs (UK) require us to report to you where:

- ▶ the Manager's use of the going concern basis of accounting in the preparation of the financial statements is not appropriate; or
- ▶ the Manager has not disclosed in the financial statements any identified material uncertainties that may cast significant doubt about the Trust's ability to continue to adopt the going concern basis of accounting for a period of at least twelve months from the date when the financial statements are authorised for issue.

INDEPENDENT AUDITOR'S REPORT TO THE UNIT HOLDERS OF WESLEYAN AUTHORISED UNIT TRUST

OTHER INFORMATION

The other information comprises the information included in the annual report, other than the financial statements and our auditor's report thereon. The Manager is responsible for the other information.

Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in this report, we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of the other information, we are required to report that fact.

We have nothing to report in this regard.

OPINIONS ON OTHER MATTERS PRESCRIBED BY THE RULES OF THE COLLECTIVE INVESTMENT SCHEMES SOURCEBOOK OF THE FINANCIAL CONDUCT AUTHORITY

In our opinion:

- ▶ the financial statements have been properly prepared in accordance with the Statement of Recommended Practice relating to Authorised Funds, the rules of the Collective Investment Schemes Sourcebook of the Financial Conduct Authority and the Trust Deed;
- ▶ the information given in the Manager's report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- ▶ there is nothing to indicate that proper accounting records have not been kept or that the financial statements are not in agreement with those records.

MATTERS ON WHICH WE ARE REQUIRED TO REPORT BY EXCEPTION

We have nothing to report in respect of the following matter in relation to which the Collective Investment Schemes Sourcebook of the Financial Conduct Authority rules requires us to report to you if, in our opinion:

- ▶ we have not received all the information and explanations which, to the best of our knowledge and belief, are necessary for the purposes of our audit

RESPONSIBILITIES OF THE MANAGER

As explained more fully in the Manager's responsibilities statement set out on page 142, the Manager is responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the Manager determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Manager is responsible for assessing the Trust's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Manager either intends to liquidate the Trust or to cease operations, or has no realistic alternative but to do so.

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at <https://www.frc.org.uk/auditorsresponsibilities>. This description forms part of our auditor's report.

USE OF OUR REPORT

This report is made solely to the Trust's unitholders, as a body, pursuant to Paragraph 4.5.12 of the rules of the Collective Investment Schemes Sourcebook of the Financial Conduct Authority. Our audit work has been undertaken so that we might state to the Trust's unitholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Trust and the Trust's unitholders as a body, for our audit work, for this report, or for the opinions we have formed.

Ernst & Young LLP, Statutory Auditor, Edinburgh
